Bank of Ireland

Update to credit analysis

Summary

We rate [Bank of Ireland's](#) (BOI's) long-term bank deposits and long-term senior unsecured debt at A2 and A3, respectively. The ratings are driven by the bank's baseline credit assessment (BCA) of baa3, the results of our Advanced Loss Given Failure Analysis (LGF) leading to a preliminary rating assessment (PRA) three notches above the BCA for deposits and two notches above the BCA for senior unsecured debt and an expectation of a moderate level of government support, which translates into one notch of further uplift for both the deposit and senior unsecured ratings. BOI's counterparty risk assessment (CRA) is A2(cr)/Prime-1(cr). The bank's short-term deposit and debt ratings are Prime-1.

BOI's BCA of baa3 reflects (1) improving asset quality, with the problem loan ratio standing at 6.7% at end-June 2018 and which the bank plans to reduce to below 5% by end-2019; (2) sound capital ratios, with the group's regulatory common equity tier 1 (CET1) ratio of 15.1% at end-September 2018 comfortably above the SREP requirement of 8.625%; (3) stable profitability and net interest margin, sustained in 1H18 by write-backs on impaired loans; and (4) a strong funding profile. The BCA remains constrained by the remaining sizeable stock of non-performing loans in addition to a significant stock of forborne loans.

Exhibit 1

Rating Scorecard - Key Financial Ratios

Source: Moody's Banking Financial Metrics

Credit strengths

- » Leading domestic franchise in Ireland and established position in the UK through partnerships with the Post Office and AA plc;

- » Sound capitalisation supported by sustained earnings generation and conservative capital management;
- » Ample customer deposits base and sufficient liquidity buffers.

Credit challenges

- » Sizeable stock of problem loans, albeit declining aided by a favorable operating environment in Ireland;
- » Macroeconomic uncertainties in the UK and Ireland related to the UK's exit from the EU;
- » Pressures on the net interest margin given the increasing pricing competition in the Irish mortgage market and the low interest rate environment in both the UK and Ireland.

Outlook

The outlook on BOI's long-term senior unsecured debt and issuer ratings is positive, reflecting our expectation that BOI's BCA could be upgraded if the bank continues to reduce its stock of problem loans, improves its profitability, and maintains adequate capital levels.

The outlook on BOI's long-term deposit rating is stable as the rating currently includes one notch of government support and is in line with the ratings of the [Government of Ireland](#) (A2 stable). Should the BCA be upgraded, the deposit rating would likely be affirmed because this potential government support would no longer benefit these creditors.

Factors that could lead to an upgrade

- » BOI's long-term senior unsecured and issuer ratings could be upgraded as a result of an upgrade in its standalone BCA or following a significant increase in the bank's bail-in-able debt.
- » The bank's BCA could be upgraded following (1) further significant reductions in non-performing loans and/or improving provisioning coverage; (2) improving capitalisation and risk absorption capacity, while maintaining (3) stable profitability, funding and liquidity metrics.

Factors that could lead to a downgrade

- » BOI's ratings could be downgraded as a result of (1) a downgrade of its standalone BCA; or (2) the redemption of maturing subordinated instruments without their replacement.
- » BOI's BCA could be downgraded due to (1) a significant deterioration in the bank's asset quality; (2) a significant and sustained drop in the bank's capitalisation; (3) a deterioration in its core profitability metrics; or (4) a significant reduction in liquid assets.

Profile

Bank of Ireland (BOI) is an Irish retail and commercial bank. Its products and services include deposit-taking, current accounts, personal loans, business and corporate lending, leasing, international asset finance, financial advice, mortgages, foreign exchange, life assurance, pensions and credit cards. As of 30 June 2018, BOI accounted for almost one-third of the domestic market assets held by Irish credit institutions, based on its total consolidated assets of €121.8 billion.

The Bank of Ireland Group (the group) operates mainly in Ireland, but also has operations in the UK and internationally. In Ireland it operates through more than 250 branches and in the UK it also operates in partnership with the UK Post Office. The bank also has branches in France, Germany and the US.

BOI was established in 1783, and in 1922 it became the official bank of the Irish government. The group's ordinary shares are listed on the Irish Stock Exchange (ticker: BIR) and the London Stock Exchange (ticker: BIRG). As of 31 December 2017, BOI's largest shareholder was the Irish government, through the Ireland Strategic Investment Fund, which owned 13.95% of the bank's total share capital

Detailed credit considerations

The financial data in the following sections are sourced from BOI's consolidated financial statements unless otherwise stated.

Improving asset quality but the stock of impaired and forborne loans remain sizeable

BOI is gradually reducing its level of problem loans, which decreased to €5.2 billion at June 2018 from €6.2 billion at December 2016, leading to a reduction in the bank's problem loan ratio to 6.7% from 7.6%. The reduction was supported by the favorable operating environment in Ireland leading to improvements in the labour market and the bank's significant effort to provide sustainable restructuring solutions to troubled borrowers. Upon implementation of IFRS9 on 1 January 2018 the level of problem loans increased due to the reclassification of material exposures to level 3 assets, but on a like-for-like basis the level of problem loans continued to improve in H1 2018 and we expect further improvements in 2H 2018 and 2019 as BOI plans to bring its NPL ratio below 5% by end-2019.

Exhibit 3

Problem loans continue to decrease and are adequately provisioned

Source: Moody's Banking Financial Metrics

Following improvements in property prices in Ireland, the bank is better positioned to negotiate restructuring of existing problem loans, assuming that positive momentum in the housing market is maintained. As a result, the proportion of the bank's portfolio in negative equity continues to decline, with the proportion of residential mortgages in Ireland with a loan-to-value above 100% falling to 4% at June 2018 (down from 7% at December 2017 and 16% at December 2016).

The reduced inflow of new non-performing loans should continue to support the strengthening of BOI's asset quality metrics. The bank has historically reported lower levels of problem loans compared to those of its Irish peers, reflecting its geographic diversification due to its lending activities in the UK as well as its conservative underwriting standards.

However, we believe that the bank still faces asset quality challenges in its domestic loan book: 30% of BOI's Irish buy-to-let loans (BTL loan book of €3.7 billion) were classified as non-performing at end-June 2018 (33% at December 2017). At the same date 14% of the Irish non-property SME portfolio was non-performing (SME loan book of €7.8 billion), while the non-property corporate book recorded a non-performing exposure ratio of 2.7%. The property and construction portfolio continues to be the worst performer with 15.3% non-performing exposures at June 2018, although the exposure to this segment has been reduced to €8.46 billion at end-June 2018 from €8.75 billion at end-2017.

BOI has a large portion of vulnerable restructured loans, which, in our view, have an increased probability of falling back into non-performance in the event of macro-economic headwinds. We note, however, that Forborne Collateral Realisation loans (FCRs) are included in the non-performing exposures (NPEs). The overall level of impaired and forborne loans and loans in negative equity is still relatively high, exposing the bank to material downside risk in case of adverse macroeconomic developments. We therefore consider the bank's asset quality remains a relative weakness for the bank, reflected in an assigned score of ba3.

Capitalisation expected to remain solid supported by sustained earnings generation

BOI reported a fully loaded common equity tier 1 (CET 1) ratio of 14.1% at June 2018, increasing from 13.8% at December 2017, driven by steady capital generation and a reduction in risk-weighted assets (RWAs). The bank's fully loaded leverage ratio was at 6.4% at June 2018, which we consider as solid. The group's regulatory CET1 of 15.1% at end-September 2018 comfortably exceeds its SREP requirement of 8.625%.

Exhibit 4

Regulatory capital ratios remain strong

Source: BOI financial reports

BOI recommenced modest dividend payments in 2018, in respect of the financial year 2017. We believe the bank's demonstrated ability to generate capital organically and conservative capital management will largely mitigate any potential future volatility due to movements in the pension deficit, sterling exchange rate changes (although the impact is limited due to hedging in place) and potential increase in impairment charges. We therefore expect BOI to continue to maintain adequate capital levels in excess of regulatory requirements and view its capitalisation as a relative strength for the BCA.

We calculate a tangible common equity to risk weighted assets ratio of 16% at end-June 2018, corresponding to a macro-adjusted score of aa3. The assigned score of baa1 reflects our expectation of the maintenance of solid capital level but also takes into account

the downside risks arising from a still relatively high proportion of unprovisioned problem loans and NPEs in negative equity as a percentage of the bank's capital.

Profitability is supported by decreasing funding costs and impairment charges, but pressures persist from low asset margins

BOI's profitability is supported by growing lending volumes, decreasing impairment charges and improving efficiency, but pressures comes from heightened competition and high investments in digital transformation.

BOI reported statutory profit before tax of €454 million in 1H18, after reporting €852 million profit before tax in 2017. The 1H18 result is positively impacted by €81 million of net impairment gains, compared to €59 million loan losses in 1H17, which reflects successful resolution strategies and the positive economic environment in Ireland. Although there may be a further decline in impairments in the short term, we expect that provision releases will gradually diminish and the bank's impairment charges will stabilise at a somewhat higher level than the current one.

The Moody's-calculated net interest margin (NIM) stood at 1.82% in 1H 2018, overall stable from one year earlier. The NIM benefits from new lending which replaces legacy low yielding tracker mortgages and nonperforming assets, but rising competition in the mortgage market, in both Ireland and the UK, could put pressure on the margins. We also expect the high volume of planned MREL issuances to lead to relatively high overall cost of funding.

BOI reported a cost-to-income ratio of 66% in 1H18, which according to the current strategic plan, the bank plans to reduce to 50% by 2021 mostly through personnel cost reductions in line with the announced digital transformation plan.

BOI's profitability was negatively affected during 2017 by the announced additional provisions related to the [Tracker Mortgage Examination Review](#). Although the additional provisioning seeks to settle this conduct issue for BOI, in our view a risk of further provisions over the outlook period remains.

We assign a Profitability score of baa3 to BOI, in line with the macro-adjusted score. The assigned score also reflects the challenges the bank's profitability is facing from the prolonged period of low interest rates and the macroeconomic uncertainties related to the UK's exit from the EU.

Relatively low use of wholesale funding and sufficient liquidity

We see BOI's funding structure as a relative strength and we assign an a3 score to this factor. The bank's market funding mix is diverse, we calculate a market funds to tangible banking assets ratio of 9.79% at end-2017. The use of wholesale funding decreased to €11.4 billion at June 2018 from €12.7 billion at end-2017, but we expect an increase in market funding in the near future as we expect the bank to continue to issue debt at the holding company level to meet its Minimum Requirements for Eligible Liabilities (MREL) of 12.9% of total liabilities and own funds, or 26.4% of the bank's RWAs.

The gross loans to customer deposits (LTD) ratio is overall stable at 102% in June 2018, slightly down from 103% in 2017.

BOI has sufficient stock and good quality of liquid assets in both Ireland and the UK. At June 2018, the bank had a liquid banking assets to tangible banking assets ratio of 21.2%. BOI also comfortably meets regulatory liquidity requirements, reporting a Net Stable Funding Ratio of 127% and a Liquidity Coverage Ratio of 139% at June 2018. We assign a Liquid Resources score of baa3.

Support and structural considerations

Loss Given failure

BOI is subject to the EU Bank Resolution and Recovery Directive (BRRD), which we consider to be an Operational Resolution Regime. We assume residual tangible common equity of 3% and losses post-failure of 8% of tangible banking assets, a 25% run-off in "junior" wholesale deposits, a 5% run-off in preferred deposits, and assigns a 25% probability to deposits being preferred to senior unsecured debt. We also assume that the junior proportion of BOI's deposits is in line with our estimated EU-wide average of 26%. These are in line with our standard assumptions.

Our Advanced LGF analysis indicates that BOI's deposits are likely to face extremely low loss-given-failure, due to the loss absorption provided by subordinated debt and, potentially, by senior unsecured debt should deposits be treated preferentially in a resolution, as well as the substantial volume of deposits themselves. This results in a PRA of A3, three notches above the BCA.

BOI's senior unsecured debt is likely to face very low loss-given-failure due to the loss absorption provided by its own volume and the amount of debt subordinated to it. This results in a PRA of baa1, two notches above the BCA. This is lower than the PRA for deposits because of the probability that we incorporate in our LGF analysis that resolution authorities may take actions to preserve deposits in a bail-in, at the expense of senior unsecured debt.

BOI's subordinated instruments are likely to face a high level of loss-given-failure according to our LGF analysis given the relatively small volume of debt and limited protection from more subordinated instruments and residual equity. The rating of BOI's subordinated debt and junior subordinated debt is Ba1 and Ba2(hyb), respectively.

Government support

We believe that there is a moderate probability of government support for BOI should the bank fail, which leads to one notch of uplift from the Preliminary Rating Assessments for both deposits and senior unsecured ratings.

For other junior securities, we continue to believe that the probability of government support is low, and, as such, the ratings for these instruments do not include any related uplift.

Counterparty Risk (CR) Assessment

CR Assessments are opinions of how counterparty obligations are likely to be treated if a bank fails and are distinct from debt and deposit ratings in that they (1) consider only the risk of default rather than both the likelihood of default and the expected financial loss suffered in the event of default and (2) apply to counterparty obligations and contractual commitments rather than debt or deposit instruments. The CR assessment is an opinion of the counterparty risk related to a bank's covered bonds, contractual performance obligations (servicing), derivatives (e.g., swaps), letters of credit, guarantees and liquidity facilities.

BOI's CR Assessment is positioned at A2(cr)/Prime-1(cr).

The CR Assessment, prior to government support, is positioned three notches above the BOI's BCA of baa3, based on the cushion against default provided to the senior obligations represented by the CR Assessment by subordinated instruments. The main difference with our Advanced LGF approach used to determine instrument ratings is that the CR Assessment captures the probability of default on certain senior obligations, rather than expected loss, therefore we focus purely on subordination and take no account of the volume of the instrument class.

The CR Assessment also benefits from one notch of government support, in line with our support assumptions on deposits and senior unsecured debt. This reflects our view that any support provided by governmental authorities to a bank which benefits senior unsecured debt or deposits is very likely to benefit operating activities and obligations reflected by the CR Assessment as well, consistent with our belief that governments are likely to maintain such operations as a going-concern in order to reduce contagion and preserve a bank's critical functions.

Counterparty Risk (CR) Rating

CRRs are opinions of the ability of entities to honour the uncollateralised portion of non-debt counterparty financial liabilities (CRR liabilities) and also reflect the expected financial losses in the event such liabilities are not honoured. CRRs are distinct from ratings assigned to senior unsecured debt instruments and from issuer ratings because they reflect that, in a resolution, CRR liabilities might benefit from preferential treatment compared with senior unsecured debt. Examples of CRR liabilities include the uncollateralised portion of payables arising from derivatives transactions and the uncollateralised portion of liabilities under sale and repurchase agreements.

BOI's CR Rating is positioned at A2/Prime-1.

About Moody's bank scorecard

Our Scorecard is designed to capture, express and explain in summary form our Rating Committee's judgment. When read in conjunction with our research, a fulsome presentation of our judgment is expressed. As a result, the output of our Scorecard may materially differ from that suggested by raw data alone (though it has been calibrated to avoid the frequent need for strong divergence). The Scorecard output and the individual scores are discussed in rating committees and may be adjusted up or down to reflect conditions specific to each rated entity.

MOODY'S adopts all necessary measures so that the information it uses in assigning a credit rating is of sufficient quality and from sources MOODY'S considers to be reliable including, when appropriate, independent third-party sources. However, MOODY'S is not an auditor and cannot in every instance independently verify or validate information received in the rating process or in preparing the Moody's publications.

To the extent permitted by law, MOODY'S and its directors, officers, employees, agents, representatives, licensors and suppliers disclaim liability to any person or entity for any indirect, special, consequential, or incidental losses or damages whatsoever arising from or in connection with the information contained herein or the use of or inability to use any such information, even if MOODY'S or any of its directors, officers, employees, agents, representatives, licensors or suppliers is advised in advance of the possibility of such losses or damages, including but not limited to: (a) any loss of present or prospective profits or (b) any loss or damage arising where the relevant financial instrument is not the subject of a particular credit rating assigned by MOODY'S.

To the extent permitted by law, MOODY'S and its directors, officers, employees, agents, representatives, licensors and suppliers disclaim liability for any direct or compensatory losses or damages caused to any person or entity, including but not limited to by any negligence (but excluding fraud, willful misconduct or any other type of liability that, for the avoidance of doubt, by law cannot be excluded) on the part of, or any contingency within or beyond the control of, MOODY'S or any of its directors, officers, employees, agents, representatives, licensors or suppliers, arising from or in connection with the information contained herein or the use of or inability to use any such information.

NO WARRANTY, EXPRESS OR IMPLIED, AS TO THE ACCURACY, TIMELINESS, COMPLETENESS, MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE OF ANY SUCH RATING OR OTHER OPINION OR INFORMATION IS GIVEN OR MADE BY MOODY'S IN ANY FORM OR MANNER WHATSOEVER.

Moody's Investors Service, Inc., a wholly-owned credit rating agency subsidiary of Moody's Corporation ("MCO"), hereby discloses that most issuers of debt securities (including corporate and municipal bonds, debentures, notes and commercial paper) and preferred stock rated by Moody's Investors Service, Inc. have, prior to assignment of any rating, agreed to pay to Moody's Investors Service, Inc. for appraisal and rating services rendered by it fees ranging from \$1,500 to approximately \$2,500,000. MCO and MIS also maintain policies and procedures to address the independence of MIS's ratings and rating processes. Information regarding certain affiliations that may exist between directors of MCO and rated entities, and between entities who hold ratings from MIS and have also publicly reported to the SEC an ownership interest in MCO of more than 5%, is posted annually at www.moody's.com under the heading "Investor Relations — Corporate Governance — Director and Shareholder Affiliation Policy."

Additional terms for Australia only: Any publication into Australia of this document is pursuant to the Australian Financial Services License of MOODY'S affiliate, Moody's Investors Service Pty Limited ABN 61 003 399 657 AFSL 336969 and/or Moody's Analytics Australia Pty Ltd ABN 94 105 136 972 AFSL 383569 (as applicable). This document is intended to be provided only to "wholesale clients" within the meaning of section 761G of the Corporations Act 2001. By continuing to access this document from within Australia, you represent to MOODY'S that you are, or are accessing the document as a representative of, a "wholesale client" and that neither you nor the entity you represent will directly or indirectly disseminate this document or its contents to "retail clients" within the meaning of section 761G of the Corporations Act 2001. MOODY'S credit rating is an opinion as to the creditworthiness of a debt obligation of the issuer, not on the equity securities of the issuer or any form of security that is available to retail investors. It would be reckless and inappropriate for retail investors to use MOODY'S credit ratings or publications when making an investment decision. If in doubt you should contact your financial or other professional adviser.

Additional terms for Japan only: Moody's Japan K.K. ("MJKK") is a wholly-owned credit rating agency subsidiary of Moody's Group Japan G.K., which is wholly-owned by Moody's Overseas Holdings Inc., a wholly-owned subsidiary of MCO. Moody's SF Japan K.K. ("MSFJ") is a wholly-owned credit rating agency subsidiary of MJKK. MSFJ is not a Nationally Recognized Statistical Rating Organization ("NRSRO"). Therefore, credit ratings assigned by MSFJ are Non-NRSRO Credit Ratings. Non-NRSRO Credit Ratings are assigned by an entity that is not a NRSRO and, consequently, the rated obligation will not qualify for certain types of treatment under U.S. laws. MJKK and MSFJ are credit rating agencies registered with the Japan Financial Services Agency and their registration numbers are FSA Commissioner (Ratings) No. 2 and 3 respectively.

MJKK or MSFJ (as applicable) hereby disclose that most issuers of debt securities (including corporate and municipal bonds, debentures, notes and commercial paper) and preferred stock rated by MJKK or MSFJ (as applicable) have, prior to assignment of any rating, agreed to pay to MJKK or MSFJ (as applicable) for appraisal and rating services rendered by it fees ranging from JPY200,000 to approximately JPY350,000,000.

MJKK and MSFJ also maintain policies and procedures to address Japanese regulatory requirements.
