ROTE 17.3% (+7ppts y/y)

Strong **TNAV** per share growth +12%²

48% growth in net interest income

Net interest income movement

Increase in 2023

- **Liquid asset income** from higher rates and growing deposit franchise
- **Lending income** driven by higher yields, Irish franchise momentum and KBCI transaction, marginally offset by UK personal loans impact¹
- **Higher wholesale and deposit** funding costs

2024 outlook

- Q4 2023 annualised run-rate of c.€3.65bn
- 2024 NII expected to be 5-6% lower than Q4 2023, reflecting interest rates* and higher deposit costs, partially offset by business momentum

For footnotes please refer to slide 30

¹Interest rate assumptions for end 2024: ECB deposit rate of 2.75%, BOE base rate of 4.0%, Fed Funds rate of 4.0%

Structural hedge providing NII resilience

Structural hedge (gross fixed leg income)¹

Higher structural hedge volumes in 2023 primarily due to growth in current a/c balances and decisions taken in 2022

c.€9bn maturing annually; average hedge duration 3.5yrs; exit rate 1.65%

c.10% growth of gross hedge income expected in 2024

Hedge volumes to decrease modestly reflecting flow to term assumption

NII sensitivity to lower rates materially reduced through increased structural hedge

Strong retail deposit franchise

Growth in customer deposits

Term migration trends

2023 deposit trends

- Increase in volumes primarily due to growth in Everyday Banking of €2.5bn
- Everyday Banking performance in H2 reflects underlying growth offset by flows to Davy
- H223 migration of €0.7bn into term/ other products, concentrated in Q4

2024 outlook

- Modest growth in customer balances expected
- Pace of migration to term expected to be similar to Q4 run rate

Loan book growth reflects KBCI and Irish net lending

Group loan book movement

Net lending in Irish non-property loan books of €2.0bn supported by 25% increase in new mortgage lending

Reduction in property and international corporate lending reflects cautious approach

2024 outlook

Expected to grow modestly reflecting:

- Growth in Ireland, primarily mortgages
- Stabilisation of UK (excluding exit from personal loans¹)
- Cautious approach to property and international corporate

Increase in business income

- **Wealth and Insurance +42%**; growth in New Ireland and full year Davy contribution³
- **Retail Ireland** fee income growth, with small positive one-off items in FY22
- **Corporate and Commercial**; strong SME fee growth and cessation of a business activity
- **Associates / JVs** reduction primarily reflects exit costs

2024 outlook

- Total business income (incl. JVs) expected mid-single digit % higher

Operating expenses¹ in line with c.€1.85bn guidance

Operating expenses movement²

FY24 outlook

Acquisitions primarily Davy and KBCI

€39m (c.2.5%) net growth reflects inflation and BAU investment, partially offset by pension costs and efficiencies

Other includes accrual for performance-related variable pay and additional investment to drive future efficiencies

2024 outlook

Operating expenses mid-single digit % higher

- net growth (BAU investment, inflation partially offset by efficiencies)
- additional investment to drive future efficiencies

- **Portfolio divestments;** exit from UK personal loans, transferred to non-core from 1 Sept 2023¹

2024 outlook

Expected to be similar to 2023

Improved asset quality and strong coverage maintained

Group loan book segment mix (net)

Group loan asset quality

Diversified loan book with strong collateralisation

- c.60% residential mortgages; weighted average LTV of 55%; FY23 new lending LTV of 74%
- Non-property SME and corporate includes acquisition finance (AF) of €4.7bn; CRT covers c.50% of AF

Lower NPEs and improved staging profile

- Reduced NPE ratio by c.50bps to 3.1%
- Coverage of 1.5%; reduction reflects resolution of high coverage legacy NPEs, mix impact and KBCI portfolio acquisition; like-for-like coverage unchanged

Pro-active approach to CRE

12% y/y reduction in CRE loans; cautious approach and pro-active portfolio management

Ireland c.70% of lending; modest US CRE exposure with prudent coverage

Average LTVs (60%) and interest cover (1.9x)

Coverage levels increased from 2.4% to 3.4% at Dec 2023

- Stage 2 cover 1.3% to 4.1%, pro-active approach to potential risks
- Stage 3 cover lower; resolution of high coverage legacy cases

Asset quality stable with unchanged NPE ratio of 5.1%

Higher impairment charge primarily due to additional management adjustments

Slightly higher loan loss experience; portfolio activity charge of €265m

- Net losses on portfolio activity €232m (vs €214m FY22²)
- KBCI Day 1 charge (€17m) and additional affordability assessment of retail portfolios (€16m)³

Additional management adjustments

- €79m charge from model updates and IFRS 9 updated macroeconomic assumptions⁴
- PMA charge of €59m (PMA stock €85m) primarily due to proactive management adjustments for CRE

FY24 Outlook

FY24 charge expected to be low 30s bps, subject to no material change in economic conditions or outlook

Slide 16: FY23 financial performance; PBT +92%

1. Restated for impact of IFRS 17
2. TNAV calculation as at 31 Dec 2023 and does not include any adjustment for distributions announced at FY23 results
3. Statutory EPS is calculated post adjustment for Additional Tier 1 coupons and premium paid on redemption of legacy instruments

Slide 17: 48% growth in net interest income

1. 2023 NII reflects transfer of UK personal loans to non-core from 1 Sept 2023; €25m in non-core items, €55m in reported NII of €3,682m

Slide 18: Structural hedge providing NII resilience

1. Gross interest income from fixed leg of hedging swap; the Group's fixed rate assets (e.g. fixed rate lending) are fully hedged for interest rate risk; these hedges partially offset the Group's structural hedge
2. The sensitivity assumes (i) an instantaneous and parallel movement in all interest rates, with a starting point of an ECB deposit rate of 4%; (ii) a static balance sheet in size and composition; (iii) assets and liabilities whose pricing is mechanically linked to market or central bank policy rates repriced immediately; (iv) certain other inputs including pass throughs to assets and liabilities. The sensitivities should not be considered a forecast of future performance in rate scenarios as they do not capture potential management action in response to unexpected changes in the interest rate environment. Net interest income sensitivities will change depending on interest rate starting point

Residential mortgages / Consumer loans

Gross loans by stage

Residential mortgages

- Mortgage portfolios 59% of Group loan book
 - Average LTV of 55% on stock
 - 88% of the portfolio has LTV < 80%
- Stage 2 loans increased from €3.5bn at FY22 to €3.6bn at FY23 primarily reflecting credit risk assessments for emerging affordability risk and portfolio activity offset by impacts of model updates
- Stage 3 loans (incl. POCIs) increased by €0.4bn to €0.9bn partially due to acquisition of c.€0.1bn KBCI POCIs alongside emergence of new defaults (primarily UK)
- Stage 3 cover (excl. POCIs) decreased to 18.3% at FY23 (FY22 19.7%) reflecting evolution of asset mix in defaulted book (now weighted to owner occupied) and disposal of legacy NPE buy-to-let exposures
- €0.1bn increase in ILA stock reflects net impacts arising from portfolio activity, model updates, PMAs and KBCI acquisition leading to an increase in total impairment cover from 0.4% at FY22 to 0.5% at FY23

ILA movement

Consumer

- 7% of Group loan book
- Stage 2 loans increased from €0.5bn at FY 2022 to €0.8bn at FY23 primarily reflecting credit risk assessments for emerging affordability risk
- €7m increase in ILA stock reflects increases from portfolio activity and FLI/ model updates partly offset by ILA utilisation (primarily UK personal loans)
- Total impairment cover remained stable at 3.1% (3.2% at FY22)

Non-property SME and Corporate / Property and Construction

Gross loans by stage

Non-property SME and Corporate

- 25% of Group loan book, well diversified by geography and sector
- €0.1bn decrease in Stage 2 loans since FY22 driven by portfolio activity offset by FLI/model updates
- Stage 3 balances decreased by €0.4bn reflecting resolution activity including NPE portfolio disposal completed in H223
- Stage 3 cover reduced to 30.5% (FY22 36.7%) and total impairment cover reduced to 2.7% (FY22 3.6%) reflecting NPE disposal and resolution of highly provisioned legacy cases in the Corporate portfolio

Property & Construction

- 9% of Group loan book (FY22 11%); €6.7bn investment property; €0.5bn development lending
- €0.4bn reduction in stage 2 loans in FY23 due to portfolio activity including net repayments/redemptions
- Stage 3 loans have remained stable at €0.4bn (FY22 €0.4bn). Stage 3 cover reduced to 21.8% (FY22 28.7%) reflecting resolution activity including NPE disposal
- Total impairment cover increased from 2.4% at FY22 to 3.4% at FY23, driven by the application of the €48m Investment Property PMA
- Investment property exposures Office (37%), Retail (32%), Residential (20%) and Other (11%)

ILA sensitivity to macroeconomic scenarios

The following table indicates the approximate extent to which impairment loss allowance (ILA), excluding Group management adjustments, would be higher or lower than reported were a 100% weighting applied to the central, upside and downside future macroeconomic scenarios respectively.

31 December 2023	Multiple scenarios	Change in impairment loss allowance

The following table indicates the approximate extent to which impairment loss allowances for the residential mortgage portfolios, would be higher or lower than the application of a central scenario if there was an immediate change in residential property prices at the reporting date. Although such changes would not be observed in isolation, as economic indicators tend to be correlated in a coherent scenario, this gives insight into the sensitivity of the Group's impairment loss allowance to a once-off change in residential property values.

AUM ²	Dec 2022 (€bn)	Dec 2023 (€bn)
Davy	19	24
NIAC	20	22
Total AUM	39	46

- On 1 Jan 2023, the IFRS 17 accounting standard related to insurance contracts became effective, replacing IFRS 4. This has a material impact on the recognition, measurement, presentation and disclosure of the insurance business in the Group's financial statements. The application of IFRS 17 does not impact on the economic value created from the Wealth and Insurance division or the ability of the Group to upstream dividends from its NIAC life assurance subsidiary
- FY23 growth in operating income and operating expenses reflect a full year contribution from Davy (vs seven months in FY22), as well as underlying business momentum within NIAC; market movements have resulted in a positive investment valuation movement within NIAC of €36m for FY23
- Embedded value within the Wealth and Insurance division (excluding Davy) was €1.3bn at 31 Dec 2023 (+11% y/y)
- The impact of the introduction of IFRS 17 on shareholders' equity was €371m at the transition date of 1 Jan 2022 and €410m at the application date of 1 Jan 2023
- IFRS 17 has introduced contractual service margin (CSM) which represents the unearned profit of a group of insurance and reinsurance contracts which is released in line with insurance service provided. The CSM of the Group increased by €36m to €589m during FY23

¹ Restated for impact of IFRS 17

² NIAC and Davy AUM movements include impact of c.€0.95bn of client fund migration from NIAC to Davy in 2023

IAS19 pension sensitivities
(Dec 2017 / Dec 2018 / Dec 2019 / Dec 2020 / Dec 2021 / Dec 2022 / Dec 2023)

¹ Sensitivity of Group funding requirement to a 0.25% decrease in interest rates
² Sensitivity of IAS19 liabilities to a 0.10% decrease in credit spread over risk free rates
³ Sensitivity of Group funding requirement to a 0.10% increase in long term inflation
⁴ Sensitivity of Group assets to a 5% movement in global equity markets with allowance for other correlated diversified asset classes

- IAS19 net pension surplus of €0.68bn at Dec 2023 (€0.7bn net surplus Dec 2022). Schemes in surplus €0.69bn, schemes in deficit €0.01bn
- Both euro and sterling discount rates decreased over the year (20 bps and 25 bps respectively). The euro discount rate change was due primarily to reductions in long term risk free interest rates, while the sterling discount rate change was a combination of reductions in the corporate bond credit spreads and long term risk free interest rates
- The discount rate reductions resulted in an increase in Group DB pension scheme liabilities, partially offset by a corresponding increase in the interest rate hedging assets
- Long term euro inflation assumptions (2.3%) and sterling inflation assumptions (3.15%) reduced in the period (30 bps and 15 bps respectively). The resulting decrease in liabilities was partially offset by the decrease in inflation hedging assets
- Further progress was made over the course of the year on the de-risking of the investment strategy of the BSPF, the Group's largest pension scheme. When completed this will result in a further reduction in return-seeking assets and illiquid assets, and an increase in Credit/LDI/ Hedging assets
- The IAS19 pension sensitivities graphs demonstrate the reduction over recent years in the sensitivity of the Group's pension schemes to movements in interest rates, credit spreads, inflation and equities

Forward-Looking Statement

This document contains forward-looking statements with respect to certain of the Bank of Ireland Group plc (the 'Company' or 'BOIG plc') and its subsidiaries' (collectively the 'Group' or 'BOIG plc Group') plans and its current goals and expectations relating to its future financial condition and performance, the markets in which it operates and its future capital requirements. These forward-looking statements often can be identified by the fact that they do not relate only to historical or current facts. Generally, but not always, words such as 'may,' 'could,' 'should,' 'will,' 'expect,' 'intend,' 'estimate,' 'anticipate,' 'assume,' 'believe,' 'plan,' 'seek,' 'continue,' 'target,' 'goal,' 'would,' or their negative variations or similar expressions identify forward-looking statements, but their absence does not mean that a statement is not forward-looking.

Examples of forward-looking statements include, among others: statements regarding the Group's near term and longer term future capital requirements and ratios, LDRs, expected impairment charges, the level of the Group's assets, the Group's financial position, future income, business strategy, projected costs, margins, future payment of dividends, future share buybacks, the implementation of changes in respect of certain of the Group's pension schemes, estimates of capital expenditures, discussions with Irish, UK, European and other regulators, plans and objectives for future operations, and the impact of Russia's invasion of Ukraine particularly on certain of the above issues and generally on the global and domestic economies. Such forward-looking statements are inherently subject to risks and uncertainties, and hence actual results may differ materially from those expressed or implied by such forward-looking statements.

Such risks and uncertainties include, but are not limited to, those as set out in the Risk Management Report in the Group's Annual Report for the year ended 31 December 2023.

Nothing in this document should be considered to be a forecast of future profitability, dividend forecast or financial position of the Group and none of the information in this document is or is intended to be a profit forecast, dividend forecast, or profit estimate. Any forward-looking statement speaks only as at the date it is made. The Group does not undertake to release publicly any revision to these forward-looking statements to reflect events, circumstances or unanticipated events occurring after the date hereof.
