The Interim Report and other information in relation to Bank of Ireland is available on the Investors page of our website at: www.bankofireland.com

These are the consolidated results of The Governor and Company of the Bank of Ireland (the 'Bank') and its subsidiaries (together the 'Group')

The Group's forward-looking statement can be found on page 95.

Business review

Operating and Financial Review

Basis of presentation

The operating and financial review (OFR) is presented using IFRS and non-IFRS measures / alternative performance measures (APMs) to analyse the Group's performance. APMs include 'underlying' basis, which excludes non-core items the Group believes obscure the underlying performance trends in the business. Further information on measures referred to in the OFR are found in APMs on page 96. The income statements are presented for the six months ended 30 June 2025 (H125) compared to the six months ended 30 June 2024 (H124). The balance sheets are presented for 30 June 2025 compared to 31 December 2024. Percentages presented throughout this document are calculated on the absolute underlying figures and so may differ from the percentage variances calculated on the rounded numbers presented. Where the percentages are not measured this is indicated by n/m.

Summary consolidated income statement on an underlying basis

	6 months ended 30 June 2025 €m	6 months ended 30 June 2024 €m
Net interest income	1,650	1,788
Net other income ¹	371	393
Operating income	2,021	2,181
Operating expenses (before levies and regulatory charges) ¹	(986)	(961)
Levies and regulatory charges	(113)	(111)
Operating profit before net impairment losses on financial instruments	922	1,109
Net impairment losses on financial instruments ¹	(137)	(50)
Share of results of associates and joint ventures (after tax)	9	17
Underlying profit before tax	794	1,076
Non-core items ¹	(83)	(11)
Profit before tax	711	1,065
Tax charge	(111)	(201)
Profit for the period	600	864
Return on assets (bps) (annualised)	75	109

¹ Performance is reported on an underlying basis and has been adjusted to exclude non-core items that the Group believes obscure the underlying performance trends in the business and is considered an APM. A reconciliation between the IFRS and summary consolidated income statement on an underlying basis is set out on page 7. For further information on APMs see page 96.

Profit before tax of €711 million was reported by the Group for H125, €354 million lower compared to H124.

Underlying profit before tax of €794 million was €282 million lower than H124.

Net interest income was 8% lower than H124, with the impact of the lower interest rate environment on lending and liquid asset yields along with higher deposit costs partially offset by higher lending and deposit volumes, higher structural hedge income and lower wholesale funding costs.

Net other income is €22 million lower period on period, with an increase in business income driven by strong performance in Wealth and Insurance and higher Corporate and Commercial fee income, more than offset by the negative impact of derivative related valuation adjustments.

Operating expenses (before levies and regulatory charges) were up 3%, reflecting inflation and investments to drive sustainable future benefits, offset by pension costs and efficiencies.

Levies and regulatory charges increased by €2 million or 2% in H125 due to the Bank of England (BoE) Levy introduced in H224.

Net impairment losses on financial instruments increased by €87 million. Actual impairment losses on financial instruments increased by €170 million reflecting actual loan loss experience, the impact on IFRS 9 models of Forward-looking information (FLI) from the Group's latest macro-economic outlook and movement in management adjustments in the period. However, these losses have been partially offset by movements in reimbursement assets of €83 million, arising from financial guarantee contracts related to the corporate loan portfolio.

Summary consolidated income statement on an underlying basis *(continued)*

Share of results of associates and joint ventures (after tax) decreased by €8 million, primarily due to non-recurrence of investment gains recorded in H124.

Non-core items increased by €72 million to €83 million (H124: €11 million) due to an increase in transformation programme costs of €46 million, lower (net) gain on portfolio divestments of €20 million, a loss of €2 million (H124: €14 million gain) in Gross-up for policyholder tax in the Wealth and Insurance business, offset by lower acquisition costs of €6 million and lower liability management exercise costs of €4 million.

The tax charge for H125 of €111 million (H124: €201 million) reflected an effective statutory taxation rate of 16% (H124: 19%) for the Group. On an underlying basis, the effective taxation rate for H125 was 15% (H124: 17%). The movement in the effective tax rate is influenced by the Irish bank levy, the tax impacts of changes in the jurisdictional mix of profits and policyholder investment returns in New Ireland.

Non-core items

	6 months ended 30 June 2025 €m	6 months ended 30 June 2024 €m	Change %
Non-core items			
Transformation programme costs	(71)	(25)	n/m
Cost of restructuring programme	(69)	(25)	n/m
Other transformation costs	(2)	-	n/m
Acquisition costs	(13)	(19)	(32%)
Portfolio divestments (net)	5	25	(80%)
Gross-up for policyholder and shareholder tax in the Wealth and Insurance business	(2)	14	n/m
Investment loss on treasury shares held for policyholders	(2)	(2)	-
Liability management exercises	-	(4)	(100%)
Total non-core items	(83)	(11)	n/m

Transformation programme costs

During H125, the Group recognised net transformation programme costs of €71 million (H124: €25 million) which included:

- restructuring charges of €69 million (H124: €25 million) were incurred and relate predominantly to the Simpler Business programme costs and associated redundancy scheme costs; and
- other transformation programme costs of €2 million (H124: €nil) relate to the design and development of a number of key business initiatives in Retail UK. These costs are associated with the implementation of the Group's UK future state operating and business model.

Acquisition costs

The Group acquired Davy in 2022 as a business combination in line with IFRS 3. In H125, €13 million (H124: €19 million) of costs associated with the acquisition were expensed to the income statement:

- deferred remuneration expense of €4 million (H124: €12 million) was accrued and includes the remuneration related to a Special Incentive and Retention Plan (SIRP). The costs are payable to some Davy employees on the fulfilment of certain conditions;
- integration costs of €2 million (H124: €4 million) include external costs relating to project management, professional advice and support; and internal integration costs related to an internal dedicated team to deliver the integration of Davy;
- deferred consideration expense of €4 million (H124: €nil) for the Davy acquisition; and

- amortisation of €3 million (H124: €3 million) related to the acquired intangible assets (customer relationships and brand).

Portfolio divestments

In 2024, the Group sold its UK personal loans portfolio. Migration of these loans concluded in May 2025. As a result, in H125, the Group recognised a net portfolio divestment gain of €5 million (H124: €25 million), of which €4 million was recognised in other income and €1 million recognised in net impairment losses.

Gross-up for policyholder and shareholder tax in the Wealth and Insurance business

IFRS requires that the income statement be grossed up for the total tax payable by Wealth and Insurance, comprising both policyholder and shareholder tax. In H125, this was a non-core loss of €2 million (H124: €14 million gain).

Investment loss on treasury shares held for policyholders

The Group's income statement excludes the impact of the change in value of Bank of Ireland Group plc ('BoIG plc') shares held by Wealth and Insurance for policyholders. In H125, this was a loss of €2 million (H124: €2 million). At 30 June 2025, there were 0.6 million shares (H124: 0.7 million shares) held for the benefit of policyholders.

Liability management exercises

In H125, no expenses were incurred on liability management exercises (H124: €4 million), reflecting the repurchase of certain Group perpetual non-call instruments.

Summary consolidated balance sheet

	30 June 2025 €bn	31 December 2024 €bn
Summary consolidated balance sheet		
Assets		
Loans and advances to customers	82	83
Liquid assets	45	44
Wealth and Insurance assets	27	28
Other assets	8	7
Total assets	162	162
Liabilities		
Customer deposits	105	103
Wholesale funding	9	11
Wealth and Insurance liabilities	27	27
Other liabilities	7	6
Subordinated liabilities	2	2
Total liabilities	150	149
Stockholders' equity	11	12
Other equity instruments - Additional tier 1	1	1
Total liabilities and stockholders' equity	162	162

The Group's **loans and advances to customers (after impairment loss allowances (ILAs))** of €82.2 billion were €0.3 billion lower than 31 December 2024. Net new lending of €0.8 billion was more than offset by impairment of €0.2 billion and FX / other movements of €0.9 billion. On a constant currency basis, the loan book increased by €0.8 billion reflecting positive net new lending in the period.

The Group's portfolio of **liquid assets** at 30 June 2025 of €45.0 billion increased by €1.0 billion from 31 December 2024, primarily due to higher customer deposits of €2.6 billion (constant currency basis), increase in AT1 volumes of €0.4 billion, and other items (includes retained earnings) of €0.3 billion, partially offset by lower wholesale funding volumes of €1.5 billion and higher lending volumes of €0.8 billion (constant currency basis).

The Group's **asset quality** remains robust despite the impact of elevated trade policy uncertainty and geopolitical risk. Non-performing exposures (NPEs) increased by €0.3 billion to €2.2 billion, representing 2.6% of gross loans at 30 June 2025 (31 December 2024: 2.2%). The increase in NPEs reflected the emergence of new defaults in corporate portfolios, primarily the US Acquisition Finance portfolio.

At 30 June 2025, Group **customer deposit** volumes of €105.4 billion were €2.1 billion higher than 31 December 2024, predominantly driven by higher Retail Ireland volumes of €2.3 billion and higher Retail UK volumes of £0.4 billion, partially offset by lower Corporate and Commercial volumes of €0.3 billion and FX movement. However, due to sterling weakening against the Euro, Retail UK balances increased on a headline basis by €0.1 billion from €14.7 billion to €14.8 billion.

Wholesale funding balances of €9.4 billion at 30 June 2025 were €1.5 billion lower than 31 December 2024. This is primarily due to Asset Covered Securities (ACS) bond maturities of €0.8 billion, repayment of BoE Monetary Authority funding of €0.6 billion and net minimum requirement for own funds and eligible liabilities (MREL) senior bond maturities of €0.5 billion, partially offset by a UK Residential Mortgage-Backed Security (RMBS) issuance of €0.4 billion.

	30 June 2025	Restated ¹ 31 December 2024
Key ratios		
Credit-impaired loans (€bn) ¹	2.1	1.8
NPEs (€bn)	2.2	1.9
NPEs ratio (%)	2.6	2.2
Liquidity Coverage Ratio (%) ²	194	198
Net Stable Funding Ratio (%)	154	155
Loan to Deposit Ratio (%)	78	80

¹ Excludes POCI assets of €56 million (31 December 2024: €55 million) which were no longer credit-impaired at the reporting date due to improvement in credit risk since purchase or origination. These loans will remain classified as POCI loans until derecognition.

² The comparative figure for the Liquidity Coverage Ratio (LCR) has been restated following a refinement of the calculation of certain outflows totalling €0.3 billion. As a result, the LCR decreased by 4 percentage points, from 202% to 198%.

Summary consolidated balance sheet *(continued)*

Capital

The Group's proforma fully loaded CET1 ratio with inclusion of the H1 unaudited profits was 16.0% at 30 June 2025 (31 December 2024: 14.6%). The increase of c.140 basis points since 31 December 2024 is primarily due to the implementation of Capital Requirements (CRR3) (c.+115 basis points), organic capital generation (c.+110 basis points), partially offset by a foreseeable distribution deduction (c.-45 basis points) and RWA growth (c.-35 basis points). The Group's fully loaded and regulatory CET1 ratio (excluding the H125 unaudited profits) was 15.3%¹.

CRD IV - 31 December 2024 ²			CRD IV - 30 June 2025	
Regulatory	Fully loaded		Regulatory	Fully loaded
Capital ratios¹				
14.6%	14.6%	Common equity tier 1	15.3%	15.3%
16.5%	16.5%	Tier 1	18.2%	18.2%
19.6%	19.6%	Total capital	21.4%	21.4%
6.7%	6.7%	Leverage ratio	6.7%	6.7%

The capital ratios are calculated under the prudential scope of consolidation of the BOIG plc Group. Further details on the capital position of BOIG plc Group and The Governor and Company of the Bank of Ireland can be found in BOIG plc's Pillar 3 disclosure.

¹ In accordance with ECB guidance and EBA Q&A 2023_6887, no interim profits have been recognised under Article 26(2) of the Capital Requirements Regulation. The interim capital ratios for June 2025 have therefore been presented excluding the benefit of H1 interim profits. Inclusion of H1 interim profits results in a CET1 Ratio of 16.0% and a total capital ratio of 22.1%.

² The December 2024 capital ratios have been presented including the benefit of the retained profits in the period. Under Article 26 (2) of the Capital Requirements Regulation, financial institutions may include independently verified interim profits in their regulatory capital only with the prior permission of the competent authority, namely the ECB, and such permission has been obtained. The capital ratios are calculated using unrounded risk weighted asset amounts.

¹ Comparative figures have been restated to reflect the small business and agriculture (SB&A) transfer from Corporate and Commercial to Retail Ireland as many of these customers have banking requirements closer to Retail Ireland's Consumer customer base. As a result, comparative figures have been restated to reflect a €261 million increase in the underlying divisional contribution and a €261 million increase in non-core in Retail Ireland, with the corresponding decrease in Corporate and Commercial.

² Performance is reported on an underlying basis and has been adjusted to exclude non-core items that the Group believes obscure the underlying performance trends in the business and is considered an APM. For further information on APMs see page 96.

Principal Risks and Uncertainties

Principal risks and uncertainties facing the Group for the remaining six months of 2025 are set out below. This summary should not be regarded as a complete and comprehensive statement of all potential risks as other factors not yet identified, or not currently material, may also emerge and adversely affect the Group's operations, financial conditions, or reputation. The Group remains vigilant in monitoring the evolving macroeconomic environment and ongoing geopolitical developments, including the potential implications of tariff related risks, with impacts on the Group's risk profile subject to monitoring and evaluation to ensure that appropriate and effective risk mitigation strategies are implemented. For further detail on risks facing the Group, see pages 151 to 159 of The Governor and Company of the Bank of Ireland's 2024 Annual Report.

Business and strategic risk is the risk of not delivering the agreed strategy and business and financial targets, designed to ensure the long term sustainability of the Group's businesses. This can be as a result of internal or external factors. For example, implementing a strategy that does not support the Group's target outcomes, inadequate planning or implementation of the strategy, changes in the external environment or economic factors. Drivers include:

- macroeconomic conditions and geopolitical uncertainties. Whilst inflation has moderated and interest rates are reducing, ongoing conflicts, trade tensions and shifting international alliances have resulted in an escalation in overall geopolitical tensions. The potential impacts of these macroeconomic and geopolitical dynamics represent a risk to the Group in its markets and may result in a more adverse environment than assumed in the Group's plans. This may manifest in adverse impacts to pricing, customer confidence and credit demand, collateral values, and customers' ability to meet their financial obligations;
- the risk attached to the implementation of the Group Strategic Plan;
- changing business model for the Group including the evolving competitive landscape, accelerated digitisation, and changing consumer and business behaviours; and
- challenges and risks to the Group's strategy to transform, as well as customer considerations. Failure to transform successfully, or respond to the other risks above, could prevent the Group from realising its strategic priorities.

Capital adequacy risk is the risk that the Group does not hold sufficient capital to (i) remain compliant with regulatory capital requirements, (ii) support its business and medium-term objectives, and (iii) absorb losses should unexpected events occur. While principal risks impact on the Group's capital adequacy to some extent, capital adequacy is primarily impacted by significant increases in credit risk or risk weighted assets (RWAs), materially worse than expected financial performance and changes to minimum regulatory requirements.

Conduct risk is the risk of poor outcomes for, or harm to, customers, clients and markets, arising from the delivery of the Group's products and services. The Group is exposed to conduct risk as a consequence from all the activities that the Group engages in during the normal conduct of its business. These risks may materialise from failures to comply with regulatory requirements or expectations, as an outcome of risk events in other principal risk categories, from changes in external market expectations or conditions, provision of products and services and the various activities performed by staff, contractors and third party suppliers. Conduct risk includes market integrity, customer protection, financial crime, and data privacy risks.

Credit risk is the risk of loss resulting from a counterparty being unable to meet its contractual obligations to the Group in respect of loans or other financial transactions, or any other deterioration in a counterparty's creditworthiness. This risk includes debt underwriting risk, loan origination risk, credit concentration risk, cross border transfer risk, credit quality deterioration risk, default risk, and collateral valuation risk. Credit risk arises from loans and advances to customers and from certain other financial transactions such as those entered into by the Group with financial institutions, sovereigns, and state institutions. Increased economic and trade policy uncertainty has led to a weaker macroeconomic outlook. The Group's FLI scenarios and associated probability weights reflect, among other factors, the prevailing geopolitical environment. Post-model adjustments have been applied where appropriate, to ensure the final impairment loss allowance appropriately reflects the Group's underlying credit risk profile.

Funding and liquidity risk is the risk that the Group will experience difficulty in financing its assets and / or meeting its contractual payment obligations as they fall due, or will only be able to do so at substantially above the prevailing market cost of funds. Liquidity risk arises from the differences in timing between cash inflows and outflows. Cash inflows are driven by, amongst other things, the maturity structure of loans and investments held by the Group, while cash outflows are driven by items such as the term maturity of debt issued by the Group and outflows from customer deposit accounts. The liquidity risk of the Group may also be impacted by external events which could result in a sudden withdrawal of deposits or the potential changes in customer behaviour. Funding risk can occur where there is an over-reliance on a particular type of funding, a funding gap, or a concentration of wholesale funding (including securitisations) maturities. The Group funds an element of its sterling balance sheet in part from euro (via cross currency derivatives), which creates an exposure to the cost of this hedging.

Life insurance risk is the risk of unexpected variation in the amount and timing of claims associated with insurance benefits. This variation, arising from changing customer mortality, life expectancy, health, or behavioural characteristics, may be short or long-term in nature.

Market risk is the risk of loss arising from movements in interest rates, FX rates, equity, credit spreads, or other market prices. Market risk arises from the structure of the balance sheet, the Group's business mix and includes discretionary risk taking. The Group permits discretionary risk taking activity in Davy and it can arise through market-making, whereby positions can be held to facilitate client orders. Market risk can also arise through the conduct of customer business, particularly in respect to fixed-rate lending and the execution of derivatives and FX business. The nature of the business mix and the Group's balance sheet profile can create interest rate risk in the banking book exposures which result in economic value of equity and net interest income sensitivities. Earnings for New Ireland Assurance Company plc (NIAC) are directly exposed to movements in market prices as a sizeable portion of shareholder surplus is invested in high yield funds. In addition, NIAC's earnings are also indirectly exposed to changes in equity and property markets through fee income generated on unit-linked customer investments.

Principal Risks and Uncertainties *(continued)*

Operational risk is the risk of loss resulting from suboptimal or failed internal processes, systems, human factors, or from external events. These risks may arise from failures in technology, change management, information security and cyber threats, third party risk and outsourcing, data quality, transaction processing, talent recruitment and retention, financial and regulatory reporting, or legal and tax compliance. Operational risk may also arise from transformation initiatives, design or implementation errors, poor data handling or a failure to meet regulatory obligations. The frequency and complexity of risks are increasing due to an evolving threat landscape, particularly in the area of cyber security, however, the Group continues to strengthen its operational resilience to identify, respond to, adapt to and recover from disruptions irrespective of whether the issue originated internally or from a third party.

Regulatory risk is the risk that the Group does not identify legal or regulatory change or appropriately manage its relationships with its regulators. The Group is exposed to regulatory risk as a consequence from all the activities that the Group engages in during the normal conduct of its business. Regulatory risk may materialise from failure to identify new or existing regulatory and / or legislative requirements or deadlines, ensure appropriate governance is in place to embed regulatory requirements into processes, or failure to appropriately manage the Group's regulatory relationships. Regulatory risk includes ineffective regulatory change governance and ineffective regulatory engagement risks.

Model risk is the potential for adverse consequences due to model design or implementation errors or the inappropriate use of model outputs. The Group uses models to support activities, including determining capital and impairment requirements; informing business and credit decisions; valuing exposures; transaction monitoring and supporting customer analytics. The adverse consequences from model issues could include financial loss, negative customer outcomes, poor decision making, regulatory criticism or damage to the Group's reputation.

Other risk themes that span the Group's principal risk types include:

Environmental (Climate and Other Environmental), Social and Governance: ESG risk is defined in the Group as the risk to the Group that ESG factors (environmental, social or governance matters) could cause a material negative impact on: the Group's earnings, capital, franchise value or reputation; the Group's regulatory standing; the long-term sustainability of our customer's operations and financial wellbeing; the communities and environment in which we and our customers operate. ESG factors represent a common risk driver across the Group's Principal and Sub risk types. The Group applies a risk lens to ensure that the impact of ESG across the Group's risk types is considered on an ongoing basis and that the aggregate impact arising from ESG risk drivers is given appropriate consideration. ESG risks and opportunities will continue to impact how the Group implements its strategy, business model, customer offering, and how it manages risk in the Group. Sustainability is embedded in the Group Strategy as one of the three core strategic pillars under 'Sustainable Company'.

Transformation: major initiatives such as digital transformation, re-platforming of core technology and other significant structural changes fundamentally alter how the Group operates or delivers its services.

Reputation: a negative impact on earnings and franchise value, the Group's relationship with its stakeholders and / or its ability to deliver its business strategy can result from a loss of trust in or adverse perception of the Group by its stakeholders.

Regulatory Compliance: the Group is committed to conducting its activities in accordance with all applicable legal and regulatory requirements.

Operational Resilience: the ability to identify and prepare for, respond and adapt to, recover and learn from an operational disruption.

Statement of Directors' responsibilities

for the six months ended 30 June 2025

The Directors are responsible for preparing the interim financial report in accordance with the Transparency (Directive 2004/109/EC) Regulations 2007 ('Transparency Directive'), and the Central Bank (Investment Market Conduct) Rules 2019 ('Transparency Rules of the Central Bank of Ireland').

In preparing the condensed set of consolidated financial statements included within the interim financial report, the Directors are required to:

- prepare and present the condensed set of consolidated financial statements in accordance with IAS 34 Interim Financial Reporting as adopted by the EU, the Transparency Directive and the Transparency Rules of the Central Bank of Ireland;
- ensure the condensed set of consolidated financial statements has adequate disclosures;
- select and apply appropriate accounting policies;
- make accounting estimates that are reasonable in the circumstances; and
- assess the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Directors either intend to liquidate the Group or to cease operations, or have no realistic alternative but to do so.

Those charged with governance are responsible for designing, implementing and maintaining such internal controls as they determine are necessary to enable the preparation of the condensed set of consolidated financial statements that is free from material misstatement whether due to fraud or error.

We confirm that to the best of our knowledge:

The condensed set of consolidated financial statements included within the interim financial report of The Governor

and Company of the Bank of Ireland for the six months ended 30 June 2025 (the 'interim financial information') which comprises the condensed consolidated income statement, condensed consolidated statement of comprehensive income, condensed consolidated balance sheet, condensed consolidated statement of changes in equity, condensed consolidated cash flow statement and the related explanatory notes, have been presented and prepared in accordance with IAS 34 Interim Financial Reporting, as adopted by the EU, the Transparency Directive and Transparency Rules of the Central Bank of Ireland.

The interim financial information presented, as required by the Transparency Directive, includes a fair review of:

- an indication of important events that have occurred during the first six months of the financial year, and their impact on the condensed set of consolidated financial statements;
- a description of the principal risks and uncertainties for the remaining six months of the financial year;
- related parties' transactions that have taken place in the first six months of the current financial year and that have materially affected the financial position or the performance of the Group during that period; and
- any changes in the related parties' transactions described in the last annual report that could have a material effect on the financial position or performance of the Group in the first six months of the current financial year.

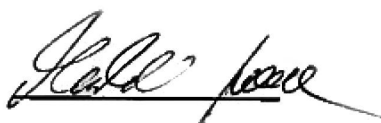

The Directors are responsible for the maintenance and integrity of the corporate and financial information included on the Group's website. Legislation in the Republic of Ireland governing the preparation and dissemination of financial statements may differ from legislation in other jurisdictions.

Independent review report

to The Governor and Company of the Bank of Ireland

Conclusion

We have been engaged by The Governor and Company of the Bank of Ireland (the 'Bank') to review the Bank's condensed set of consolidated financial statements in the half-yearly financial report for the six months ended 30 June 2025 which comprises the condensed consolidated income statement, condensed consolidated statement of comprehensive income, condensed consolidated balance sheet, condensed consolidated statement of changes in equity, condensed consolidated cash flow statement, a summary of material accounting policies and other explanatory notes.

Based on our review, nothing has come to our attention that causes us to believe that the condensed set of consolidated financial statements in the half-yearly financial report for the six months ended 30 June 2025 is not prepared, in all material respects in accordance with International Accounting Standard 34 Interim Financial Reporting ("IAS 34") as adopted by the EU, the Transparency (Directive 2004/109/EC) Regulations 2007 ("Transparency Directive"), and the Central Bank (Investment Market Conduct) Rules 2019 ("Transparency Rules of the Central Bank of Ireland").

Basis for conclusion

We conducted our review in accordance with International Standard on Review Engagements (Ireland) 2410 Review of Interim Financial Information Performed by the Independent Auditor of the Entity ("ISRE (Ireland) 2410") issued for use in Ireland. A review of interim financial information consists of making enquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures.

A review is substantially less in scope than an audit conducted in accordance with International Standards on Auditing (Ireland) and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Conclusions relating to going concern

Based on our review procedures, which are less extensive than those performed in an audit as described in the Basis for conclusion section of this report, nothing has come to our attention that causes us to believe that the Directors have inappropriately adopted the going concern basis of accounting, or that the Directors have identified material uncertainties relating to going concern that have not been appropriately disclosed.

This conclusion is based on the review procedures performed in accordance with ISRE (Ireland) 2410. However, future events or conditions may cause the Bank to cease to continue as a going concern, and the above conclusions are not a guarantee that the Bank will continue in operation.

Directors' responsibilities

The half-yearly financial report is the responsibility of, and has been approved by, the Directors. The Directors are responsible for preparing the half-yearly financial report in accordance with the Transparency Directive and the Transparency Rules of the Central Bank of Ireland.

The Directors are responsible for preparing the condensed set of consolidated financial statements included in the half-yearly financial report in accordance with IAS 34 as adopted by the EU.

As disclosed in note 1, the annual financial statements of the Bank for the year ended 31 December 2024 are prepared in accordance with International Financial Reporting Standards as adopted by the EU.

In preparing the condensed set of consolidated financial statements, the Directors are responsible for assessing the Bank's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Directors either intend to liquidate the Bank or to cease operations, or have no realistic alternative but to do so.

Our responsibility

Our responsibility is to express to the Bank a conclusion on the condensed set of consolidated financial statements in the half-yearly financial report based on our review.

Our conclusion, including our conclusions relating to going concern, are based on procedures that are less extensive than audit procedures, as described in the Basis for conclusion section of this report.

The purpose of our review work and to whom we owe our responsibilities

This report is made solely to the Bank in accordance with the terms of our engagement to assist the Bank in meeting the requirements of the Transparency Directive and the Transparency Rules of the Central Bank of Ireland. Our review has been undertaken so that we might state to the Bank those matters we are required to state to it in this report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the Bank for our review work, for this report, or for the conclusions we have reached.

1 Group accounting policies

Basis of preparation

The interim financial statements of The Governor and Company of the Bank of Ireland (the 'Bank') and its subsidiaries (collectively the 'Group') for the six months ended 30 June 2025 (H125) have been prepared in accordance with International Accounting Standard (IAS) 34 'Interim Financial Reporting', as issued by the International Accounting Standards Board and as adopted by the European Union (EU). These interim financial statements should be read in conjunction with the Group's audited financial statements for the year ended 31 December 2024, which were prepared in accordance with International Financial Reporting Standards (IFRS) as adopted by the EU, and with those parts of the Companies Act 2014 applicable to companies reporting under IFRS and with the European Union (Credit Institutions: Financial Statements) Regulations 2015.

Statutory financial statements

These interim financial statements do not comprise statutory financial statements within the meaning of the Companies Act 2014. The statutory financial statements for the year ended 31 December 2024 were approved by the Board of Directors on 21 February 2025, contained an unqualified audit report and did not include a reference to any matters to which the statutory auditor drew attention by way of emphasis. The statutory financial statements were filed with the Companies Registration Office on 19 June 2025.

Interim financial statements

The interim financial statements comprise the condensed consolidated income statement, condensed consolidated statement of comprehensive income, condensed consolidated balance sheet, condensed consolidated statement of changes in equity, condensed consolidated cash flow statement and the notes to the consolidated interim financial statements.

Going concern

The time period that the Directors have considered in evaluating the appropriateness of the going concern basis in preparing the interim financial statements for H125 is a period of 12 months from the date of approval of these interim financial statements (the 'period of assessment').

In making this assessment, the Directors considered the Group's business, profitability projections, funding and capital plans, together with a range of other factors such as the outlook for the Irish economy and the current global macroeconomic and geopolitical environment.

The matters of primary consideration by the Directors are set out below.

Capital

The Group has developed capital plans under base and stress scenarios and the Directors believe that the Group has sufficient capital to meet its regulatory capital requirements throughout the period of assessment.

Funding and liquidity

The Directors have considered the Group's funding and liquidity position and are satisfied that the Group has sufficient funding and liquidity throughout the period of assessment.

Conclusion

On the basis of the above, the Directors consider it appropriate to prepare the interim financial statements on a going concern basis having concluded that there are no material uncertainties related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern over the period of assessment.

Comparatives

Comparative figures have been adjusted where necessary, to conform with changes in presentation or where additional analysis has been provided in the current period. Any adjustments to comparatives are disclosed in the relevant note or section as appropriate.

Accounting policies

The accounting policies and methods of computation and presentation applied by the Group in the preparation of these interim financial statements are consistent with those set out on pages 227 to 243 of The Governor and Company of the Bank of Ireland's 2024 Annual Report.

There have been no new standards, or amendments to standards, adopted by the Group during the six months ended 30 June 2025 which have had a material impact on the Group.

The following accounting policy has become material to the Group during the period.

Financial guarantees held by the Group

A financial guarantee contract requires the issuer to make specified payments to reimburse the holder for a loss it incurs because a specified debtor fails to make payment when due. Where the Group is the holder of such a guarantee and it is not considered integral to the contractual terms of the guaranteed debt instrument(s), the Group recognises a reimbursement asset when it recognises the expected credit losses (ECLs) on the guaranteed instrument, if it is considered virtually certain that a reimbursement would be received if the specified debtor fails to make payment when due in accordance with the terms of the debt instrument. Gains and losses on such reimbursement assets are presented in the income statement, within net impairment gains/losses on financial instruments.

2 Critical accounting estimates and judgements

The preparation of interim financial statements requires the Group to make estimates and judgements that impact the reported amounts of assets, liabilities, income and expense. Other than as set out below, there have been no significant changes to the Group's approach to, and methods of, making critical accounting estimates and judgments compared to those applied at 31 December 2024, as set out on pages 244 to 254 of The Governor and Company of the Bank of Ireland's 2024 Annual Report.

Impairment loss allowance on financial assets

The Group's credit risk methodologies are set out on pages 320 to 325 of The Governor and Company of the Bank of Ireland's 2024 Annual Report.

Changes in estimates - Forward-looking Information

FLI refers to probability weighted future macroeconomic scenarios approved semi-annually by the Executive Risk Committee and used in the assessment of 'significant increase in credit risk' and in the measurement of impairment loss allowances under IFRS 9. The Group has used four RoI FLI scenarios and four UK FLI scenarios at 30 June 2025, comprising a central scenario, an upside scenario, and two downside scenarios, all extending over a five year forecast period, with reversion to long run averages for property for years beyond the forecast period. The Group keeps under review the number of FLI scenarios and the need to produce projections for other jurisdictions.

Historically, the Group has used an average of consensus forecasts to determine the central scenario. Given that a number of key forecasters have not updated macro-economic projections to reflect the evolving US tariffs and to avoid using outdated data as well as differing tariff assumptions, the central FLI scenario for the period ending 30 June 2025 was based on internal information and management judgement which incorporate latest US tariffs, as permitted under the Group's FLI methodology.

The alternative scenarios, comprising one upside and two downside scenarios, are narrative-driven and have been

constructed incorporating available reasonable and supportable information. This was the same approach as used in prior periods.

The FLI methodology framework was leveraged to assign an initial set of probability weightings to the narrative-driven scenarios. The FLI methodology is a simulation tool that uses recent actual observed values and historical data to produce a number of possible paths for the relevant economic variables based on their historical relationships and volatilities. The FLI model is used for scenario generation for a defined probability weighting and for assessing probability weights for a given scenario.

The narrative-driven scenarios were assessed relative to the simulated distribution.

The probability weightings attached to the scenarios are a function of their relative position on the distribution, with a lower probability weighting attached to the scenarios that were assessed to be more distant from the centre of the distribution.

The final set of probability weightings used in ECL estimates are more weighted to the downside scenarios than at 31 December 2024 and reflect the application of management judgement to the initial modelled probability weightings with increased weight assigned to the downside scenarios, and an offsetting decrease in the modelled upside scenario weight.

External economic and market indicators and ongoing economic uncertainty at 30 June 2025 including the potential impact of escalating trade tensions and geopolitical risk informed the application of this management judgement. The estimated ECL impact of this judgement was a c.€72 million increase in reported impairment loss allowance.

The table below shows the mean average forecast values for the key macroeconomic variables under each scenario for the forecast period 2025 to 2029, together with the scenario weightings for both the RoI and the UK.

30 June 2025	Republic of Ireland				United Kingdom			
	Central scenario	Upside scenario	Downside		Central scenario	Upside scenario	Downside	
			Scenario 1	Scenario 2			Scenario 1	Scenario 2

2 Critical accounting estimates and judgements *(continued)*

The central, upside and downside scenarios are described below for both the RoI and the UK:

Central scenario

RoI

Gross Domestic Product (GDP) has rebounded robustly over recent quarters following a soft patch, while Modified Domestic Demand (MDD) has continued to expand at a solid pace. However, growth is expected to soften following the announcement of tariffs by the Trump administration, which is likely to have both negative direct and indirect effects on the Irish economy. Incremental tariffs of 10% are assumed to apply to EU countries, including Ireland, but with the pharmaceutical sector exempted. This is likely to slow export growth and may negatively impact US Foreign Direct Investment (FDI) in Ireland. In addition, the tariffs are likely to slow global growth, which will have detrimental knock on effects on Ireland. However, the Irish economy does face this shock from a relatively healthy position – with solid growth, low unemployment and robust government finances.

As such, while economic activity is expected to slow somewhat, GDP and MDD growth will remain reasonably healthy, albeit the latter a bit lower than previously thought. Household consumption is likely to be supported by still healthy income gains, though investment and export growth may decline somewhat (and exports could be volatile in the short term due to attempts to front load ahead of the tariffs). Employment growth is likely to remain solid over the forecast horizon, though it is likely to gradually decelerate over time as output growth eases and labour supply tightens. Unemployment is expected to tick up a little in the first half of the horizon, but to remain low at just under 5%, before declining moderately later on. Inflation has been in line with the 2% target over recent months and is expected to remain at the rate over the forecast horizon. House price inflation has been fairly robust of late and solid wage growth and lower interest rates are likely to drive gains in the near term.

A rise in housing supply, slower growth and affordability considerations are likely to lead to a moderation in house price inflation from 2026 on. In relation to Commercial Real Estate (CRE), activity is anticipated to be slightly more subdued, leading to slower price recovery. The European Central Bank (ECB) is expected to continue easing monetary policy, particularly in light of the likely negative effects of the tariffs on Euro Area growth, before tightening gradually in the outer years of the projection period.

Key features - Economy to remain resilient, slightly slower growth, unemployment rising marginally over next few years before easing back, moderate house and CRE price growth

UK

Despite a robust GDP outturn for Q1 this year, expectations for UK growth in 2025 (and to a lesser extent 2026) have softened of late on foot of weak survey and sentiment data – with a further decline following the announcement of tariffs by the US in early April. Following an agreement in early May between the US and UK governments the UK will face 10% tariffs on most goods exports to the US going forward, higher than previously existing tariffs. GDP is now expected to expand by 1.0% this year, before picking up to 1.3% in 2026, with growth at trend (1.5%) over the balance of the forecast horizon. Employment growth is expected to remain fairly steady over the forecast horizon, in line with labour supply growth. The unemployment rate has ticked up a bit over recent quarters and it is expected to rise marginally over the balance of this

year and into 2026, before stabilising and then declining later in the projection period.

Inflation, which has proven sticky, and may be somewhat volatile in the near term, is expected to ease in the medium term, aided by somewhat lower energy prices and rising spare capacity, reaching the 2% target in a couple of years. With growth risks to the fore the BoE is expected to cut the base rate further, reaching 3.75% by the end of 2025. The BoE is expected to ease slightly further in 2026 before increasing the policy rate to 4.00% by 2029. Having picked up in the second half of last year, house price inflation has eased of late, while survey indicators have weakened. Given this backdrop, and with affordability stretched, house price growth is expected to be moderate this year, before picking up marginally in 2026 and 2027. In relation to CRE, activity is anticipated to be slightly more subdued, leading to slower price recovery.

Key features - Slightly lower growth near term, declining inflation, unemployment rising marginally over next few years before easing back, moderate house and CRE price gains

Upside scenario

In the Upside Scenario, following negotiations which are conducted reasonably promptly, tariffs on most EU and Ireland goods exports to US goods are set at 10%, though with the pharmaceutical sector exempted (no tariff). Following the UK-US 'trade deal' the same applies for the UK. After a period of negotiation similar rates apply to other US trading partners. In addition, the EU and UK agreement to roll back some Brexit related barriers to trade between the two markets proves beneficial for growth in Ireland and the UK. These developments bring some certainty and provide a boost to consumer and business confidence in Ireland, the UK and globally. Irish and UK exports are stronger than in the Central Scenario, both to the US and to other countries as a result of stronger global growth. Investment is also somewhat stronger in both economies, particularly FDI and business investment. In addition, new technologies, including Artificial Intelligence, boost productivity growth. Stronger output growth pushes unemployment down in both economies and it remains low throughout the forecast horizon. Stronger employment and wage growth leads to higher house price inflation than in the Central Scenario, while CRE price growth is also higher. Central banks, including both the ECB and BoE, curtail their easing cycles earlier, with rates at a higher level, than in the Central Scenario. Stronger activity and low levels of spare capacity eventually lead to rising inflation and as a result monetary policy is tightened later in the forecast period.

Key features - US tariffs apply but growth is resilient, low unemployment, higher house and CRE price inflation

Downside scenario 1

In Downside scenario 1, after a period of negotiation, tariffs on EU / Irish goods exports to the US are set at 20%, higher than in the Central Scenario. Tariffs on UK goods exports to the US are set at 10% for most categories, in line with the UK-US 'trade deal' and the same as the Central Scenario. In addition, tariffs on imports of pharmaceutical products to the US are set at 25%. US tariffs on other major economies, particularly China, are higher than in the Central Scenario. Other policy changes from the US raise non-tariff barriers to trade. The higher tariffs and trade barriers dent global consumer and business confidence, stress supply chains worldwide and lead to strains in financial markets. As a result, global GDP growth slows and inflation declines relative to the Central Scenario.

2 Critical accounting estimates and judgements *(continued)*

The direct and indirect effects of the tariffs slow Irish and UK growth. The public finances in the UK also come under strain, requiring slower spending growth. The UK economy falls into recession in 2025 / 2026, while MDD growth in Ireland is subdued. Employment growth is lower than in the Central Scenario, particularly in the first few years of the forecast period, leading to a rise in unemployment. Spare capacity in labour and product markets, and lower energy prices, leads to lower inflation in both economies, allowing the ECB and BoE to ease monetary policy to a greater degree. With higher unemployment and weaker wage growth housing markets in both Ireland and the UK come under pressure and house prices fall, though the extent of the decline is limited to a degree by lower interest rates.

CRE markets are also weaker and prices decline over the course of the next few years. Later in the forecast period the global economy completes an adjustment to the new tariff regime – this along with supportive monetary policy leads to a pickup in growth in Ireland and the UK while unemployment stabilises before starting to decline, and house and CRE prices begin to recover.

Key features – Higher tariffs, weak growth in RoI, UK in recession, rising unemployment, house and CRE price declines

Downside scenario 2

In Downside scenario 2, retaliation by US trading partners leads to a tit-for-tat ratcheting up of tariffs between the US and other countries, with tariffs ending up higher than in the Central Scenario or Downside 1 (c.30% for EU / Ireland, 20% for the UK and very high for China, with 25% tariffs on pharmaceutical imports to the US). Furthermore, the US adopts aggressive regulatory and tax measures to try and reshore production to the US. This leads to severe supply chain strains and financial market stress globally. In addition, geopolitical tensions escalate, while there is a climate stress related rise in the price of carbon, further dampening demand. These shocks lead to sharp declines in global consumer and business confidence, and global trade and growth are significantly lower.

The situation is compounded by a sharp slowdown in pharma and tech sector FDI inflows to Ireland, with some production relocated back to the US. The Irish public finances come under pressure as corporation tax and other tax revenues fall, necessitating spending cuts and some tax increases. The public finances in the UK also come under strain, requiring slower spending growth and tax rises, while UK business investment falls sharply. In the near-term disruption to global supply chains and higher prices for carbon permits pushes up price pressures, leading central banks including the ECB and BoE to adopt tighter near-term monetary policy than in the Central or Downside 1 scenarios.

The Irish and UK economies both go into recession – output growth moves into negative territory for a few years. Unemployment increases significantly and remains high over the entire forecast period. Household finances are put under significant pressure and this pushes house price inflation well into negative territory in both economies. CRE markets are also significantly weaker, and prices decline sharply. Eventually the Irish, UK and global economies adjust to the new tariff regime, inflation falls back and monetary policy is eased significantly – as a result confidence rebounds and growth recovers. Economic activity starts to expand again, picking up towards the end of the forecast horizon, and unemployment stabilises before beginning to decline in both Ireland and the UK. House and CRE prices also begin to recover, albeit gradually.

Key features – Elevated tariffs, financial market stress, geopolitical tensions, climate stress, recession / elevated unemployment in UK and RoI, sharp house and CRE price declines

Property price growth, all scenarios

In the central scenario, both RoI and UK experience growth in 2025. RoI growth of 5.0% will be stronger as supply remains low and demand remains, while the UK manages more moderate growth of 1.5% as it recovers from a period of high mortgage rates and cost of living pressures. Growth will cool off in RoI over the rest of the forecast period, stabilising at 2% by 2028 and 2029, while growth will remain consistent at 2.5% throughout the period in the UK. RoI commercial prices will see a smaller decline in 2025 of -0.5% before seeing growth of 1.5% in 2026 rising to 3.0% by 2029. Commercial prices in the UK will show a return to growth in 2025, at 1.5% before rising up to 3% by 2028 before stabilising at 2.5% in 2029.

This is predicated on growth in all sectors from 2026 on, while retail and office are still in decline in 2025 and other sectors bar Private Rented Sector see zero growth. UK commercial prices across all sectors are expected to see growth bar leisure in 2025.

In the upside scenario, RoI property price growth will gradually cool off over the forecast period, to reach 3% growth in 2029. UK price growth will climb in 2026 to 6.0%, before climbing back down to 2.5% growth in 2029. Commercial prices in both RoI and UK will see growth of 3% in 2025, coming from varied levels of decline in 2024 (-4% and -1% respectively). Both will see further growth in the range of 3% to 4% per annum for the rest of the forecast period, with UK stabilising at 4% by 2027 - 2029.

In the downside 1 scenario, property prices will see a sharp reversal in growth, reaching a trough of -4.5% and -6.5% in RoI and UK respectively in 2026, before a quick recovery within two years to return to moderate growth by 2028-2029. Commercial prices will see further negative growth, dropping to -7% and -6% respectively before gradually returning to zero growth in 2028 and 2.5% and 2% growth respectively by 2029.

In the downside 2 scenario, property prices will see a deeper negative price growth than in downside 1, reaching troughs of -9% in RoI and -11% in the UK territories in 2026 before a slower recovery into moderate growth in 2029.

Commercial prices will also decline by further levels than downside 1, as far as 14% in RoI and 13.5% in UK in 2025 before recovering to moderate growth in 2029 of 2% / 1.5%.

The quantum of impairment loss allowance is impacted by the application of four probability weighted future macroeconomic scenarios.

The following table indicates the approximate extent to which the impairment loss allowance at 30 June 2025, excluding post-model management adjustments (PMAs) to impairment loss allowances, was increased by virtue of applying multiple scenarios rather than only a central scenario. This analysis excludes PMAs, as such adjustments to impairment loss allowance are applied using management judgement outside of the macroeconomic conditioned ECL model framework (refer to the Management judgement in Impairment Measurement section below).

2 Critical accounting estimates and judgements *(continued)*

The scenarios outlined in the following tables are based on the FLI weightings outlined on page 23. Changes in the figures at 30 June 2025 compared to 31 December 2024 reflect a number of inter-related dynamics including changes in forward-looking scenarios and associated probability weights; impairment model methodology updates since 31 December 2024; and the composition of the underlying portfolios at the respective reporting date.

30 June 2025 Impact of applying multiple scenarios rather than only central scenario	Additional impairment loss allowance							
	Stage 1		Stage 2		Stage 3		Total	
	Impact €m	Impact %	Impact €m	Impact %	Impact €m	Impact %	Impact €m	Impact %
Residential mortgages	7	29%	23	177%	9	8%	39	28%
<i>Retail Ireland</i>	4	24%	17	674%	5	7%	26	30%
<i>Retail UK</i>	3	38%	6	60%	4	10%	13	24%
Non-property SME and corporate	6	11%	52	39%	4	1%	62	11%
Property and construction	1	12%	15	38%	4	3%	20	12%
Consumer	4	14%	1	12%	–	–	5	6%
Total	18	15%	91	46%	17	3%	126	13%

31 December 2024 Impact of applying multiple scenarios rather than only central scenario	Additional impairment loss allowance							
	Stage 1		Stage 2		Stage 3		Total	
	Impact €m	Impact %	Impact €m	Impact %	Impact €m	Impact %	Impact €m	Impact %
Residential mortgages	6	25%	20	119%	6	6%	32	22%
<i>Retail Ireland</i>	4	22%	14	230%	4	7%	22	25%
<i>Retail UK</i>	2	33%	6	57%	2	4%	10	17%
Non-property SME and corporate	8	10%	33	23%	3	1%	44	8%

Property and construction	167	(24)	(16%)	(38)	(23%)	44	26%	180	108%
Consumer	108	(5)	(5%)	(12)	(11%)	12	11%	35	33%
Total	971	(105)	(11%)	(208)	(20%)	498	49%	1,163	113%

The following table indicates the approximate extent to which impairment loss allowances for the residential mortgage portfolios, excluding post-model management adjustments, would be higher or lower than the application of the central scenario if there was an immediate change in residential property prices at the reporting date. Although such changes would not be observed in isolation, as economic indicators tend to be correlated in a coherent scenario, this gives insight into the sensitivity of the Group's impairment loss allowance to a once-off change in residential property values.

30 June 2025 Impact of an immediate change in residential property prices compared to central scenario impairment loss allowances	Impairment loss allowance-central scenario €m	Residential property price reduction of 10%		Residential property price reduction of 5%		Residential property price increase of 5%		Residential property price increase of 10%	
		Impact €m	Impact %	Impact €m	Impact %	Impact €m	Impact %	Impact €m	Impact %
Residential mortgages	139	15	11%	6	4%	(8)	(6%)	(13)	(9%)

The sensitivity of impairment loss allowances to stage allocation is such that, based on the respective impairment cover ratios, a transfer of 1% of Stage 1 balances at 30 June 2025 to Stage 2 would increase the Group's impairment loss allowance by c.€21 million excluding post-model management adjustments.

Management judgement in impairment measurement

Management judgement has been incorporated into the Group's impairment measurement process for H125. Management judgement can be described with reference to:

- credit risk assessment for significant increase in credit risk;
- management judgement in impairment model parameters; and
- post-model management adjustments to impairment loss allowance and staging classification.

Credit risk assessment for tariff risk

Targeted evaluations of tariff related risks have been conducted within relevant corporate and Small and Medium Enterprise (SME) lending portfolios. Where exposures were identified as high risk, appropriate credit downgrades were applied, resulting in reclassification to Stage 2 or, where required, Stage 3.

Credit risk assessment for significant increase in credit risk

As outlined on page 323 of The Governor and Company of the Bank of Ireland's 2024 Annual Report, the Group considers other reasonable and supportable information that would not otherwise be taken into account that would indicate that a significant increase in credit risk had occurred.

2 Critical accounting estimates and judgements *(continued)*

In this regard, at 30 June 2025, the Group has assessed the impact of elevated affordability risk including impacts on UK residential mortgage interest only maturities and the possible lag effect of higher interest rates passing through on both RoI and UK residential mortgage customers rolling off fixed rate contracts. Accordingly, credit risk assessments have been implemented across the residential mortgage portfolios. Where appropriate, outputs have been utilised to identify significant increases in credit risk and the classification of assets in Stage 2. The credit risk assessments, which leveraged qualitative information not already captured in impairment models, resulted in a management decision to reclassify €0.9 billion of Stage 1 assets to Stage 2 at the reporting date, with an associated €9 million increase in impairment loss allowance.

Management judgement in impairment model parameters

RoI GDP and RoI Gross National Product (GNP) were removed as primary risk drivers from macro-economic regression

models in H125 due to the inherent volatility and potential risk of restatement for these macroeconomic indicators.

Post-model management adjustment (PMAs)

To ensure that the measurement of impairment reflects reasonable and supportable information that is available without undue cost or effort at the reporting date about past events, current conditions and forecasts of future economic conditions, the need for a PMA to the outputs of the Group's staging and impairment measurement methodologies is considered at each reporting date in arriving at the final impairment loss allowance. Such a need may arise, for example, due to a model limitation or a late breaking event. At 30 June 2025, the Group's stock of impairment loss allowance of €1.2 billion (31 December 2024: €1.0 billion) includes a €75 million total PMA (31 December 2024: €57 million). Details of the components of the PMAs are outlined below with a table providing an overview of Group PMAs.

	Post-model Group management adjustment							Total impairment loss allowance €m
	Impairment loss allowance-before PMAs €m	Investment Property €m	Geopolitical Risk €m	Retail Ireland Residential Mortgage NPEs €m	Climate risk ¹ €m	Retail UK mortgage potential affordability risk assessment €m	Total post-model adjustments €m

Total financial assets	1,058	48	–	5	3	1	57	1,115

¹ The table above includes a €0.3 million PMA for climate risk within Retail Ireland mortgages.

Post-model management adjustment for Investment Property

A €29 million PMA has been applied at 30 June 2025 (31 December 2024: €48 million) to reflect the estimated impact of enhancements to Investment Property impairment models planned in 2025.

Following implementation of new Internal Rating Based (IRB) models for the Property and construction portfolios in H125, the PMA previously held at 31 December 2024 in anticipation of these model updates is no longer required.

This PMA is recognised in the Property and construction portfolio at 30 June 2025 and is allocated to Stage 1 (€2 million) (31 December 2024: €7 million) and Stage 2 (€27 million) (31 December 2024: €41 million) assets. The requirement for this adjustment is expected to expire upon implementation of impairment model updates in H225.

Post-model management adjustment for Geopolitical Risk

A €20 million PMA has been applied at 30 June 2025 to reflect the potential second order economic impacts arising from the recent escalation in geopolitical risk in the Middle East. The PMA has been applied to Stage 2 exposures in the Corporate Non-property portfolio reflecting the increased credit risk that may arise within these internationally focused lending portfolios as a result of broader macroeconomic uncertainty.

Post-model management adjustment for Retail Ireland Residential Mortgage NPEs

The impairment loss allowance at 30 June 2025 includes a €17 million PMA (31 December 2024: €5 million) to reflect the Group's consideration of alternative resolution strategies for a specific cohort of long term NPEs in the Retail Ireland residential mortgage portfolio. The full post model adjustment is applied to credit-impaired assets within the Retail Ireland residential mortgage portfolio.

Post-model management adjustment for Climate Risk

The Group has considered the impact of physical and transitional climate-related risks on asset valuations within its residential mortgage and RoI SME non-property portfolios.

The PMA was quantified through scenario analysis using the Group's internal climate risk scenario analysis framework combined with external climate risk analysis. Accordingly a €9 million (31 December 2024: €3 million) PMA has been recognised to reflect the estimated ECL impact of climate-related risks within these portfolios.

This PMA is recognised in the residential mortgage portfolio Retail Ireland (€0.4 million) and Retail UK (€2.2 million) and RoI SME non-property portfolio (€6.6 million).

3 Operating segments

The Group has five reportable operating segments which reflect the internal financial and management reporting structure and are organised as follows:

Retail Ireland

Retail Ireland serves its customers delivering day-to-day services, products, propositions and a financial wellbeing programme tailored to meet customers' individual needs. Customers use their preferred channels to request and fulfil their banking requirements. These channels include our branches, 24/7 ATMs, digital, contact centre and our post office partnership for day-to-day banking services.

Wealth and Insurance

Wealth and Insurance includes the Group's life assurance subsidiary New Ireland Assurance Company (NIAC) and Davy, Ireland's leading provider of wealth management and capital markets services. NIAC distributes protection, investment and pension products to the Irish market, across three core channels made up of the Group's distribution channels, independent financial brokers and its own financial advisor network as well as corporate partners. Wealth and Insurance also includes investment markets, and the Group's general insurance brokerage, Bank of Ireland Insurance Services, which offers home, car and travel insurance cover through its agency with insurance providers.

Retail UK

Retail UK incorporates the UK residential mortgage business, the Group's branch network in Northern Ireland (NI), the Group's business banking business in NI, asset finance and contract hire, vehicle leasing and fleet management, incorporating Northridge Finance, as well as the financial services partnership and FX joint venture with the UK Post Office. The Retail UK division includes the activities of Bank of Ireland (UK) plc, the Group's wholly owned UK licensed banking subsidiary.

Corporate and Commercial

The Corporate and Commercial division provides a full range of lending, banking and treasury risk management services to the Group's national and international corporate and business customers, many of which are at the heart of the Irish economy. Our relationship teams are based in offices in Ireland and the UK with niche international businesses across Europe and in the US. Teams have a wealth of experience across a broad range of segments and sectors, including corporate and business banking, commercial real estate, acquisition finance, foreign direct investment and treasury solutions.

Group Centre

Group Centre incorporates the Group's central support and control functions. Core responsibilities of the segment include overseeing the Group-wide Customer Strategy, establishing clear governance and control frameworks with appropriate oversight, providing management services to the Group, and managing the key process and IT delivery platforms for the trading divisions.

Basis of preparation of segmental information

The analysis of results by operating segment is based on the information used by the chief operating decision maker to allocate resources and assess performance. The Group Chief Executive Officer (CEO) and Group Chief Financial Officer (CFO) are considered to be the chief operating decision makers for the Group. The Group's operating segments reflect its organisational and management structures. The CEO and CFO review the Group's internal reporting based around these segments to assess performance and allocate resources.

Transactions between the business segments are on normal commercial terms and conditions. Internal charges and transfer pricing adjustments have been reflected in the performance of each business.

Revenue sharing agreements are used to allocate external customer revenues to a business segment on a reasonable basis. The measures of segmental assets and liabilities provided to the chief operating decision maker are not adjusted for transfer pricing adjustments or revenue sharing agreements as the impact on the measures of segmental assets and liabilities is not significant. They also do not include adjustments for the impact of the assets and liabilities of BoIG plc, the Bank's holding company.

Capital expenditure comprises additions to property, plant and equipment and intangible assets.

On an ongoing basis, the Group reviews the methodology for allocating funding and liquidity costs in order to ensure that the allocations continue to reflect each division's current funding requirement.

External revenue comprises interest income, insurance revenue, net income / (expense) from reinsurance contracts held, insurance investment and finance result, fee and commission income, net trading income / (expense), other operating income, other leasing income and share of results of associates and joint ventures.

There were no revenues deriving from transactions with a single external customer that amounted to 10% or more of the Group's revenues.

The Group measures the performance of its operating segments through a measure of segment profit or loss which is referred to as 'underlying profit or loss' in its internal management reporting systems. Underlying profit or loss excludes the impact of non-core items which are outlined in the table below.

Underlying profit or loss excludes any operating profit or loss attributable to BoIG plc.

Other reconciling items

In the tables below, 'Other reconciling items' represent transactions between operating segments which are eliminated upon consolidation and the application of hedge accounting at Group level.

4 Interest income

	6 months ended 30 June 2025 €m	6 months ended 30 June 2024 €m
Financial assets measured at amortised cost		
Loans and advances to customers	1,718	2,098
Loans and advances to banks	432	645
Debt securities at amortised cost	135	129
Interest income on financial assets measured at amortised cost	2,285	2,872
Financial assets at fair value through other comprehensive income		
Debt securities at fair value through other comprehensive income	52	91
Interest income on financial assets at fair value through other comprehensive income	52	91
Interest income calculated using the effective interest method	2,337	2,963
Other interest income		
Non-trading derivatives (not in hedge accounting relationships - economic hedges)	210	368
Finance leases and hire purchase receivables	167	140
Loans and advances to customers at FVTPL	4	4
Other financial assets at FVTPL	1	2
Other interest income	382	514
Interest income	2,719	3,477

Interest income on loans and advances to customers

In H125, interest income of €43 million was recognised (H124: €53 million) and €60 million was received (H124: €57 million) on credit-impaired loans and advances to customers.

For H125, interest income was reduced by €24 million (H124 €39 million) relating to changes in the fair value of derivative financial instruments which economically hedge the performing mortgage book of KBC Bank Ireland (KBCI) acquired by the Group, partially offset by interest income earned and recognised on these derivative financial instruments.

Interest income recognised on non-trading derivatives

Interest income on non-trading derivatives was earned principally on pay fixed, receive floating interest rate swaps which are held with hedging intent, but for which hedge accounting is not applied.

5 Interest expense

	6 months ended 30 June 2025 €m	6 months ended 30 June 2024 €m
Financial liabilities measured at amortised cost		
Customer accounts	519	832
Debt securities in issue	224	299
Subordinated liabilities	60	70
Deposits from banks	23	68
Lease liabilities	6	5
Interest expense calculated using the effective interest method	832	1,274
Other interest expense		
Non-trading derivatives (not in hedge accounting relationships - economic hedges)	232	379
Customer accounts at FVTPL	5	6
Other interest expense	237	385
Interest expense	1,069	1,659

Interest expense recognised on customer accounts

Interest expense on customer accounts included interest expense of €210 million (H124: €579 million) arising on related derivatives which are in a hedge relationship with the relevant liability. The period on period movement was caused by lower interest rates.

Interest expense recognised on non-trading derivatives

Interest expense on non-trading derivatives was incurred principally on receive fixed, pay floating interest rate swaps which are held with hedging intent, but for which hedge accounting is not applied.

6 Insurance contracts

Under IFRS 17, there are three financial statement line items within insurance service result in the income statement which comprises insurance revenue, insurance service expense and net expense from reinsurance contracts held. The insurance finance income or expense is presented separately for both insurance and reinsurance in the notes to the financial statements, and aggregated together with total investment gains as insurance investment and finance result in the income statement. Disclosure is provided for both insurance contracts issued and reinsurance contracts held.

Insurance investment and finance result

The table on the following page comprises the investment gains and losses, realised gains and losses and unrealised gains and losses which accrue to the Group on all investment

assets held by the Wealth and Insurance division (excluding Davy), other than those held for the benefit of policyholders whose contracts are considered to be investment contracts. These instruments are mandatorily measured at fair value through profit or loss (FVTPL).

Total investment losses of €129 million in H125 (H124: gains of €815 million) were consistent with negative investment market performance during the period. The losses on the assets held on behalf of the insurance policyholders were consistent with the decrease in the insurance contract liabilities.

6 Insurance contracts *(continued)*

	6 months ended 30 June 2025 €m	6 months ended 30 June 2024 €m
Insurance investment and finance result		
(Losses) / gains on other financial assets held on behalf of Wealth and Insurance policyholders	(146)	815

Changes in recoveries of losses on onerous underlying contracts	1	11
Claims recovered and other directly attributable expenses	(11)	(6)
Changes relating to past service - adjustments to incurred claims	3	(7)
Total net expense from reinsurance contracts held	(17)	(25)
Finance (expense) / income from reinsurance contracts held	(14)	36
Total amounts recognised in comprehensive income	(31)	11
Cash flows		
Premiums paid net of ceding commissions and other deferred acquisition costs paid	51	183
Recoveries from reinsurance	(75)	(155)
Total cash flows	(24)	28
Closing assets	1,398	1,453

Insurance revenue and CSM by transition approach

Under the fair value approach, the CSM or loss component is calculated as the difference between the fair value of a group of insurance contracts, applying IFRS 13 (income approach), and the present value of the fulfilment cash flows (best estimate plus risk adjustment), applying IFRS 17, at the transition date. Comparative figures are presented for the twelve months ended 31 December 2024.

	30 June 2025 €m	31 December 2024 €m
Insurance revenue and CSM by transition approach		
Insurance contracts issued		
Insurance revenue		
Contracts measured using the fair value approach at transition date	147	296
New business and all other contracts	113	240
Total insurance revenue	260	536
CSM at period end		
Contracts measured using the fair value approach at transition date	(552)	(572)

6 Insurance contracts *(continued)*

Insurance CSM

The reconciliation below gives a total view of the movement of the insurance contractual service margin. Comparative figures are presented for the twelve months ended 31 December 2024.

	30 June 2025 €m	31 December 2024 €m
Insurance contractual service margin		
Opening insurance contract CSM	(718)	(749)
CSM recognised for services provided	36	74
Changes in estimates that adjust the CSM	6	(23)
Contracts initially recognised in the period	(10)	(19)
Finance expense from insurance contracts issued	(2)	(1)
Closing insurance contract CSM	(688)	(718)

Reinsurance CSM

The reconciliation below gives a total view of the movement of the reinsurance contractual service margin. Comparative figures are presented for the twelve months ended 31 December 2024.

	30 June 2025 €m	31 December 2024 €m
Reinsurance contractual service margin		
Opening reinsurance contract CSM	144	160
CSM recognised for services provided	(7)	(16)
Changes in estimates that adjust the CSM	(1)	(1)
Contracts initially recognised in the period	(4)	(10)
Changes in recoveries of losses on onerous underlying contracts that adjust CSM	1	11
Closing reinsurance contract CSM	133	144

A total of €29 million (H124: €32 million; H224: €26 million) was released from the CSM for services provided. The release represents services provided on insurance contracts offset with services provided on reinsurance contracts.

7 Fee and commission income and expense

6 months ended 30 June 2025 Income	Retail Ireland €m	Wealth and Insurance €m	Retail UK €m	Corporate and Commercial €m	Group Centre €m	Group €m
Retail banking customer fees	151	–	16	52	–	219
Asset management fees	–	94	–	–	–	94
Credit related fees	2	–	1	11	–	14
Insurance commissions	–	6	–	–	–	6
Other	11	15	2	17	–	45
Fee and commission income	164	115	19	80	–	378

Net fee and commission income included €89 million (H124: €95 million) arising from trust and other fiduciary duties.

Expense

Fee and commission expense of €97 million (H124: €105 million) primarily comprises brokerage fees, sales commissions and other fees paid to third parties.

7 Fee and commission income and expense *(continued)*

<i>Restated</i> ¹ 6 months ended 30 June 2024 Income	Retail Ireland ¹ €m	Wealth and Insurance €m	Retail UK €m	Corporate and Commercial ¹ €m	Group Centre €m	Group €m
Retail banking customer fees ¹	148	–	16	53	–	217
Asset management fees	–	81	–	–	–	81

Insurance commissions	–	5	–	–	–	5
Other ¹	9	12	2	15	–	38
Fee and commission income	159	98	19	77	–	353

¹ Comparative figures have been restated to reflect the SB&A customer base transfer from Corporate and Commercial to Retail Ireland. As a result, fee and commission income of €51 million have been reallocated from Corporate and Commercial to Retail Ireland.

8 Net trading income

Net trading income includes the gains and losses on financial instruments mandatorily measured at FVTPL and those designated at FVTPL (other than unit-linked life assurance assets and investment contract liabilities). It includes the fair value movement on these instruments and the realised gains and losses arising on the purchase and sale. It also includes the interest income receivable and expense payable on financial instruments held for trading and €1 million of a net gain arising from FX (H124: net gain €9 million).

It does not include interest income on debt financial assets mandatorily measured at FVTPL, interest expense on financial liabilities designated at FVTPL and interest income or expense on derivatives that are held with hedging intent, but for which hedge accounting is not applied (economic hedges).

Net income from financial instruments mandatorily measured at FVTPL includes dividend income from equities, realised and unrealised gains and losses.

Net fair value hedge ineffectiveness reflected a net loss from hedged items of €184 million (H124: net gain €319 million) offsetting a net gain from hedging instruments of €184 million (H124: net loss €319 million).

Staff costs included in transformation programme costs (note 12)	44	17
Total staff costs recognised in the income statement	539	508

Pension costs

Pension costs of €38 million for H125 were €4 million lower than H124. Defined benefit pension costs have decreased by €6 million. New joiners are added to the Group's defined contribution plans, the cost of which has increased by €2 million compared to H124.

Staff numbers

At 30 June 2025, the number of staff (full time equivalents (FTE)) for the Group was 11,386 (30 June 2024: 11,180). The average number of staff (FTE) for the Group for the 6 months ended 30 June 2025 was 11,268 (6 months ended 30 June 2024: 11,053).

12 Cost of restructuring programme

In H125, the Group recognised a restructuring charge of €69 million (H124: €25 million).

	6 months ended 30 June 2025 €m	6 months ended 30 June 2024 €m

Taxation charge	111	201

¹ The Group is within the scope of the Organisation for Economic Co-operation and Development (OECD) 15% minimum effective tax rate Model Rules (Pillar 2). However, the impact of Pillar 2 on the current tax charge in the current period is insignificant due primarily to the ability to take into account certain historic tax losses in the Bank at 15% and also due to profits arising in jurisdictions with an effective tax rate in excess of 15%. See note 20 for further details.

16 Debt securities at amortised cost

The following table details the significant categories of debt securities at amortised cost. Debt securities at amortised cost have increased by €6.2 billion at 30 June 2025 due to the purchase of government bonds and other debt securities. The rationale for the increase was the higher credit spreads available on these securities.

	30 June 2025 €m	31 December 2024 €m
Government bonds	7,459	4,364
Other debt securities at amortised cost	5,083	2,003
Asset backed securities	18	21
Less impairment loss allowance	(3)	(1)
Debt securities at amortised cost	12,557	6,387

17 Loans and advances to customers

Loans and advances to customers at amortised cost

Loans and advances to customers at amortised cost (after ILA) at 30 June 2025 included cash collateral of €125 million (31 December 2024: €138 million) placed with derivative counterparties in relation to net derivative liability positions.

Sustainable finance

Loans and advances to customers at 30 June 2025 included sustainable finance of €15.5 billion (31 December 2024: €14.7 billion), as detailed in the following table.

	30 June 2025 €bn	31 December 2024 €bn
Rol green mortgages	9.6	8.6
Green commercial real estate lending	1.9	2.2
Sustainability-linked loans	1.6	1.5
UK green mortgages	1.6	1.7
Renewables project finance	0.4	0.4
Rol electric vehicles funding	0.2	0.2
UK electric vehicles funding	0.2	0.1
Total sustainable finance	15.5	14.7

Loans and advances to customers at FVTPL

Loans and advances to customers at FVTPL are not subject to impairment under IFRS 9. At 30 June 2025, loans and advances to customers at FVTPL included €175 million (31 December 2024: €185 million) relating to the Life Loan mortgage product, which was offered by the Group until November 2010. The cash flows of the Life Loans are not considered to consist solely of payments of principal and interest, and as such are classified as FVTPL.

	30 June 2025 €m	31 December 2024 €m
Loans and advances to customers at amortised cost	77,868	78,656
Finance leases and hire purchase receivables	5,350	4,725

Loans and advances to customers at FVTPL	175	185
Total loans and advances to customers	82,212	82,538

17 Loans and advances to customers *(continued)*

The following tables show the gross carrying amount and ILAs subject to 12 month and lifetime ECL on loans and advances to customers at amortised cost. The Purchased or Originated Credit-impaired (POCI) assets of €131 million at 30 June 2025 (31 December 2024: €133 million) included €56 million (31 December 2024: €55 million) of assets which, while credit-impaired upon purchase or origination were no longer credit-impaired at the reporting date due to improvements in credit risk. These assets will remain classified as POCI until derecognition.

30 June 2025 Gross carrying amount at amortised cost (before impairment loss allowance)	Residential mortgages €m	Non-property SME and corporate €m	Property and construction €m	Consumer €m	Total €m

17 Loans and advances to customers *(continued)*

The following tables show the changes in gross carrying amount and ILAs of loans and advances to customers at amortised cost for H125 and the year ended 31 December 2024. The tables are prepared based on a combination of aggregation of monthly movements for material term loan portfolios (i.e. incorporating all movements a loan in these portfolios has made during the period) and full year movements for revolving-type facilities and less material (primarily consumer) portfolios.

Transfers between stages represent the migration of loans from Stage 1 to Stage 2 following a 'significant increase in credit risk' or to Stage 3 as loans enter defaulted status. Conversely, improvement in credit quality and loans exiting default result in loans migrating in the opposite direction. The approach taken to identify a 'significant increase in credit risk' and identifying defaulted and credit-impaired assets is outlined in the financial risk management note on page 323 to 324 of The Governor and Company of the Bank of Ireland's 2024 Annual Report with updates for 2025 outlined in note 18.

Transfers between each stage reflect the balances and ILAs prior to transfer. The impact of re-measurement of ILA on stage transfer is reported within 're-measurement' in the new stage that a loan has transferred into. For those tables based on an aggregation of the months transfers between stages, transfers may include loans which have subsequently transferred back to their original stage or migrated further to another stage.

'Net changes in exposure' comprise the movements in the gross carrying amount and ILA as a result of new loans originated and repayments of outstanding balances throughout the reporting period.

'Net impairment losses / (gains) in income statement' does not include the impact of cash recoveries which are recognised directly in the income statement (note 13).

'Re-measurements' includes the impact of remeasurement on stage transfers noted above, other than those directly related to the update of FLI and / or other model and parameter updates, changes in management adjustments and remeasurement due to changes in asset quality that did not result in a transfer to another stage.

ECL model parameter and / or methodology changes represents the impact on ILAs of semi-annual updates to the FLI, and other model and parameter updates used in the measurement of ILAs, including the impact of stage migrations where the migration is directly related to the update of FLI and / or other model and parameter updates.

'Impairment loss allowances utilised' represents the reduction in the gross carrying amount and associated ILA on loans where the Group has no reasonable expectations of recovering a financial asset in its entirety or a portion thereof. The utilisation of an allowance does not, of itself, alter a customer's obligations nor does it impact on the Group's rights to take relevant enforcement action.

30 June 2025 Gross carrying amount (before impairment loss allowance)	Stage 1 - 12 month ECL (not credit- impaired) €m	Stage 2 - Lifetime ECL (not credit- impaired) €m	Stage 3 - Lifetime ECL (credit- impaired) €m	Purchased / originated credit- impaired €m	Total gross carrying amount €m

<i>ECL model parameter and / or methodology changes</i>	(21)	38	-	-	17
Impairment loss allowances utilised	-	-	(58)	-	(58)
Exchange adjustments	(1)	-	(2)	-	(3)
Measurement reclassification and other movements	(1)	(2)	(12)	1	(14)
Impairment loss allowance at 30 June 2025	137	355	689	-	1,181
Impairment coverage at 30 June 2025 (%)	0.19%	3.71%	33.50%	-	1.42%

Impairment loss allowances utilised on loans and advances to customers at amortised cost during H125 included €10 million of contractual amounts outstanding that are still subject to enforcement activity.

Total gross loans and advances to customers at amortised cost decreased during the period by €0.2 billion from €83.4 billion at 31 December 2024 to €83.2 billion at 30 June 2025.

Stage 1 loans have increased by €0.5 billion primarily reflecting the impact of net new lending of €2.8 billion, partially offset by FX movements of €0.8 billion. Total net transfers to other risk stages (primarily Stage 2) of €1.5 billion reflect updates for FLI weightings and other portfolio activity.

ILAs on Stage 1 loans have decreased by €31 million with coverage on Stage 1 loans of 0.19%, down slightly from 0.24% at 31 December 2024. Remeasurement reclassifications resulted in an ILA reduction of €105 million reflecting the impact of re-measuring net transfers from other stages of lifetime ECL to 12-month ECL. Reductions in ILA were partially offset by an increase due to net staging transfers of €75 million.

Stage 2 loans have decreased by €1.0 billion reflecting net repayments of €1.5 billion and FX movements of €0.3 billion, partially offset by transfers from other stages of €0.8 billion. Net transfers to other stages reflects portfolio activity in the period.

Cover on Stage 2 loans has increased from 3.37% at 31 December 2024 to 3.71% at 30 June 2025, with the impact of net transfers of €123 million and net repayments of €44 million offset by ILA increases of €131 million due to remeasurement. Stage 2 cover is also impacted by the application of post-model adjustments for climate and geopolitical risk (see page 30) and ECL model parameter and methodology changes of €38 million.

Stage 3 loans have increased by €0.3 billion, with the key drivers being the impact of net migration from other stages of €0.7 billion driven by the emergence of new defaults, offset by repayments of €0.3 billion (including repayments from case specific resolution activities), FX movements of €0.1 billion and the utilisation of ILAs of €0.1 billion.

Stage 3 ILAs have increased by €175 million due to remeasurement of €278 million which includes the application of a post-model adjustment for Retail Ireland residential mortgage NPEs. This was offset by the impact of net reductions in exposure of €79 million and utilisation of ILAs of €58 million.

Cover on Stage 3 loans has increased from 29.29% at 31 December 2024 to 33.50% at 30 June 2025. The increase primarily reflects changes in the underlying asset / portfolio mix of the stage 3 population following the migration of assets with higher than average impairment requirements to stage 3 in the period.

18 Credit risk exposures

The following disclosures provide quantitative information about credit risk within financial instruments held by the Group. Details of the Group's credit risk methodologies are set out on pages 320 to 325 of The Governor and Company of the Bank of Ireland's 2024 Annual Report, with updates for 2025 outlined below.

In addition to credit risk, the primary risks affecting the Group through its use of financial instruments are: funding and liquidity risk, market risk and life insurance risk. The Group's approach to the management of these risks, together with its approach to Capital adequacy, are set out in the Risk Management Report of The Governor and Company of the Bank of Ireland's 2024 Annual Report.

Approach to measurement of impairment loss allowances

The Group's methodology for loan loss provisioning under IFRS 9 is set out on pages 322 to 323 of The Governor and Company of the Bank of Ireland's 2024 Annual Report.

During February 2025 three new Internal Rating Based (IRB) Probability of Default (PD) models were implemented for the Property Investment, Leveraged Acquisition Finance, and Project Finance segments of the Non-Retail portfolio. The ECL model framework was also updated in February 2025 to reflect the implementation of these new models.

The Exposure at Default (EAD) component used for Non-Retail impairment models was enhanced to include greater risk differentiation in May 2025 to address model weaknesses. The model update resulted in a c.€8 million increase in impairment loss allowance. RoI GDP and RoI GNP were removed as primary risk drivers from macro-economic regression models in H125 due to the inherent volatility and risk of restatement for these macroeconomic indicators. The impacted models now include factors such as MDD.

The probability weightings for FLI scenarios at H125 include consideration of economic uncertainty, primarily driven by elevated geopolitical risk and trade policy uncertainty.

The total net impact of all model factor updates in H125, including those outlined above, and the application of updated FLI for the Group's loans and advances to customers and other financial instruments is a €22 million increase in impairment loss allowances. The Group's critical accounting estimates and judgements, including those with respect to impairment of financial instruments, including FLI are set out in note 2 of the consolidated financial statements.

Credit Risk associated with geopolitical risk, trade policy uncertainty and interest rates

The impact of heightened geopolitical tensions and ongoing trade policy uncertainty has been integrated into individual credit assessments across the relationship-managed commercial portfolios during H125. Targeted evaluations of tariff related risks have been conducted within relevant corporate and SME lending portfolios. Where exposures were identified as high risk, appropriate credit downgrades were applied, resulting in reclassification to Stage 2 or, where required, Stage 3.

A new PMA of €20 million has been applied at H125 to reflect the potential second order economic impacts arising from the

recent escalation in geopolitical risk in the Middle East. This adjustment reflects the increased credit risk that may arise within internationally focused Corporate Non-property lending portfolios as a result of broader macroeconomic uncertainty.

All US Commercial Real Estate exposures continue to be downgraded to ensure all loans in this portfolio are classified as stage 2 or lower (i.e. stage 3). In addition to this, an Investment Property post-model adjustment to the Group's impairment loss allowance of c.€29 million has been retained to reflect model enhancements to the Investment Property portfolio planned in 2025.

In H125, the Group conducted a number of assessments in relation to credit risk associated with the impact of elevated affordability risk, including impacts on UK residential mortgage interest only maturities and the possible lag effect of higher interest rate pass through on both RoI and UK residential mortgage customers rolling off fixed rate contracts.

In this regard, credit risk assessments were implemented across the residential mortgage portfolio and the outputs have been utilised to identify significant increases in credit risk and the reclassification of Stage 1 assets as Stage 2. These credit risk assessments, which leveraged qualitative information not already captured in impairment models, resulted in a credit management decision to classify c.€0.9 billion of Stage 1 assets as Stage 2 at the reporting date (31 December 2024: c.€0.9 billion), with a corresponding c.€9 million increase in impairment loss allowance (31 December 2024: €9 million).

Furthermore, the final set of probability weightings applied to FLI scenarios utilised in the Group's impairment models incorporated the application of management judgement to initial modelled probability weightings to reflect economic uncertainty associated with factors including geopolitical risk and trade policy uncertainty. The estimated impact of this judgement was a c.€72 million increase in impairment loss allowance (31 December 2024: c.€7 million). Further details on the selected FLI scenarios for the reporting period, Group post-model adjustments and management judgement incorporated into impairment model parameters are provided in note 2 of the consolidated financial statements.

Composition and impairment

The tables below summarise the composition, credit-impaired volumes and related impairment loss allowance of the Group's loans and advances to customers at amortised cost at 30 June 2025. These tables exclude €175 million (31 December 2024: €185 million) of loans and advances to customers that are measured at fair value through profit or loss (FVTPL) and are therefore not subject to impairment under IFRS 9.

Credit-impaired includes Stage 3 and POCI assets of €75 million (31 December 2024: €78 million). Total POCI assets at 30 June 2025 were €131 million (31 December 2024: €133 million). €56 million of POCI assets (31 December 2024: €55 million) were no longer credit-impaired at the reporting date due to improvement in credit risk since purchase or origination. These loans will remain classified as POCI loans until derecognition.

Total	83,381	1,833	2.2%	515	28%

At 30 June 2025, loans and advances to customers (pre impairment loss allowance) of €83.2 billion were €0.2 billion lower than 31 December 2024. Positive net new lending in the period, particularly within the RoI mortgage portfolio, was offset by the combined impacts of net redemptions, currency translation and utilisation of impairment loss allowances.

Credit-impaired loans increased to €2.1 billion or 2.6% of customer loans at 30 June 2025 from €1.8 billion or 2.2% at 31 December 2024. The increase reflected emergence of new defaults in the corporate portfolio, primarily the US Acquisition Finance portfolio.

The application of updated FLI, individually assessed risk ratings, credit risk assessments, impairment model methodology updates, and other portfolio activity (including

net repayments / redemptions in the period) resulted in the net reduction of c.€1.0 billion of loans in Stage 2 (i.e. cases that are identified as having experienced a significant increase in credit risk) in the period.

The stock of impairment loss allowance on credit-impaired loans was €0.7 billion at 30 June 2025, which was €0.2 billion higher than the stock at 31 December 2024. The net increase incorporates the gross impairment loss on credit impaired loans of €0.2 billion, partially offset by impairment loss allowance utilisation.

The total impairment loss allowance at 30 June 2025 includes a total post-model adjustment (PMA) of €75 million (31 December 2024: €57 million), which was recognised against loans and advances to customers.

18 Credit risk exposures *(continued)*

Details on the post-model management adjustments are provided in note 2 on pages 29 and 30. Impairment loss allowance cover for credit-impaired loans increased to 33% at 30 June 2025 compared to 28% at 31 December 2024.

This primarily reflects changes in the underlying asset / portfolio mix of the Stage 3 population, with higher-than-average impairment requirements for assets migrating to Stage 3 in the period.

Risk profile of forborne loans and advances to customers

The Group's total risk profile of loans and advances to customers at amortised cost at 30 June 2025 of €83.2 billion (31 December 2024: €83.4 billion) is available in note 17. The tables below exclude €175 million of loans and advances to customers at 30 June 2025 (31 December 2024: €185 million) that are measured at FVTPL and are therefore not subject to impairment under IFRS 9. Exposures are before impairment loss allowance.

Stock of Retail Ireland mortgages at period end					53%					37%					53%
New Retail Ireland mortgages during the period					78%					51%					78%

Weighted average loan to value ratios are calculated at a property level and reflect the average property value in proportion to the outstanding mortgage. Property values are determined by reference to the property valuations held, indexed to the Central Statistics Office (CSO) Residential Property Price Index (RPPI). The indexed LTV profile of the Retail Ireland mortgage loan book is based on the CSO RPPI at April 2025. The CSO RPPI for April 2025 reported that average national residential property prices were 17.8% above peak (October 2024: 15.2% above peak), with Dublin residential prices 4.2% above peak and outside of Dublin residential prices 19.8% above peak (October 2024: 3.4% above peak and 15.8% above peak respectively). In the four months to April 2025, residential property prices at a national level increased by 0.8% (October 2024: 7.2% increase).

At 30 June 2025, €35.3 billion or 99.8% of Retail Ireland mortgages were classified as being in positive equity, 99.9% for Owner occupied mortgages and 97.4% for Buy to Let (BTL) mortgages.

Financial assets

Composition and risk profile

The tables below and on the following page summarise the composition and risk profile of the Group's financial assets subject to impairment and the impairment loss allowances on these financial assets. The tables exclude loan commitments, guarantees and letters of credit of €18,607 million at 30 June 2025 (31 December 2024: €18,316 million) that are subject to impairment. Loans and advances to customers exclude €175 million (31 December 2024: €185 million) of loans mandatorily measured at FVTPL at 30 June 2025 which are not subject to impairment under IFRS 9 and are therefore excluded from impairment related tables.

At 30 June 2025, POCI assets of €131 million (31 December 2024: €133 million) included €75 million (31 December 2024: €78 million) of credit-impaired POCI assets and €56 million of assets (31 December 2024: €55 million) which, while credit-impaired upon purchase or origination were no longer credit-impaired at the reporting date due to improvements in credit risk. These assets will remain classified as POCI until derecognition.

At 30 June 2025, other financial assets (before impairment loss allowance) includes cash and balances at central banks of €27,325 million (31 December 2024: €32,441 million) and items in the course of collection from other banks of €119 million (31 December 2024: €114 million).

Loans and advances to customers at amortised cost

Composition and risk profile

The table below summarises the composition and risk profile of the Group's loans and advances to customers at amortised cost, including POCI assets. Credit-impaired includes Stage 3 and POCI assets of €75 million (31 December 2024: €78 million). Total POCI assets at 30 June 2025 were €131 million (31 December 2024: €133 million). €56 million of POCI assets (31 December 2024: €55 million) were no longer credit-impaired at the reporting date due to improvement in credit risk since purchase or origination. These loans will remain classified as POCI loans until derecognition.

Asset quality - not credit-impaired

The tables below summarise the composition and impairment loss allowance of the Group's loans and advances to customers at amortised cost that are not credit-impaired. Excluded from the tables are POCI assets of €56 million (31 December 2024: €55 million) which were no longer credit-impaired at the reporting date due to improvement in credit risk since purchase or origination. These assets will remain classified as POCI loans until derecognition.

¹ 'Advances' refers to the portfolio loan balance (pre-impairment loss allowance) excluding POCI assets.

Asset quality - credit-impaired

Credit-impaired loans include loans where the borrower is considered unlikely to pay in full without recourse by the Group to actions such as realising security, and loans where the borrower is greater than or equal to 90 days past due and the arrears amount is material. All credit-impaired loans and advances to customers are risk rated PD grade 12.

The table below summarises the composition and impairment loss allowance of the Group's loans and advances to customers at amortised cost that are credit-impaired. Credit-impaired includes Stage 3 and POCI assets of €75 million (31 December 2024: €78 million). €56 million of POCI assets (31 December 2024: €55 million) were no longer credit-impaired at the reporting date due to improvement in credit risk since purchase or origination. These loans will remain classified as POCI loans until derecognition.

Asset quality - PD Grade of loans and advances to customers

The tables below provide analysis of the asset quality of loans and advances to customers at amortised cost based on mapping the IFRS 9 twelve month PD of each loan to a PD grade based on the table provided on page 67. Credit-impaired includes Stage 3 and POCI assets of €75 million (31 December 2024: €78 million). Not credit-impaired includes Stage 1 & 2 and POCI assets of €56 million (31 December 2024: €55 million) which were no longer credit-impaired at the reporting date due to improvement in credit risk since purchase or origination. These assets will remain classified as POCI loans until derecognition.

Geographical and industry analysis of loans and advances to customers

The following tables provide a geographical and industry breakdown of loans and advances to customers at amortised cost, and the associated impairment loss allowances. The geographical breakdown is primarily based on the location of the business unit where the asset is booked. The Non-property SME & corporate portfolio is analysed by Nomenclature of Economic Activities (NACE) code. The NACE code classification system is a pan-European classification system that groups organisations according to their business activities. Exposures to NACE codes totalling less than €400 million are grouped together as 'Other sectors'. The NACE codes reported in the table below can therefore differ period on period.

30 June 2025 Geographical / industry analysis	Gross carrying amount (before impairment loss allowance)				Impairment loss allowance			
	Rol €m	UK €m	RoW €m	Total €m	Rol €m	UK €m	RoW €m	Total €m

Sectoral analysis of loans and advances to customers

The following tables provide an analysis of loans and advances to customers at amortised cost, and the associated impairment loss allowances, by portfolio, sub-sector and stage. The Non-property SME & corporate portfolio is analysed by NACE code. The NACE code classification system is a pan-European classification system that groups organisations according to their business activities. Exposures to NACE codes totalling less than €400 million are grouped together as 'Other sectors'. The NACE codes reported in the tables below can therefore differ period on period.

Asset quality - other financial instruments

Other financial instruments as set out in the table below include instruments that are not within the scope of IFRS 9 or are not subject to impairment under IFRS 9. These include trading securities (excluding equity trading securities), derivative financial instruments, loans and advances to banks at FVTPL, loans and advances to customers at FVTPL and other financial instruments at FVTPL (excluding equity instruments). Reinsurance contract assets are excluded from this table as they are included in a separate table below under IFRS 17. The table summarises the asset quality of these financial instruments by equivalent external risk ratings.

Other financial instruments with ratings equivalent to:	30 June 2025		31 December 2024	
	€m	%	€m	%
AAA to AA-	5,586	57%	4,936	50%
A+ to A-	3,561	36%	4,031	41%
BBB+ to BBB-	413	4%	499	5%
BB+ to BB-	70	1%	64	1%
B+ to B-	138	1%	166	2%
Lower than B-	56	1%	62	1%
Total	9,824	100%	9,758	100%

Credit risk for reinsurance contract assets

The table below provides information relating to the reinsurance contract assets with reinsurance counterparties split by credit ratings:

Reinsurance contract assets with ratings equivalent to:	30 June 2025 €m	31 December 2024 €m
AA- or higher	1,055	961
A / A+	343	492
Total	1,398	1,453

19 Modified financial assets

The following table provides analysis of financial assets for which the contractual cash flows have been modified while they had an impairment loss allowance measured at an amount equal to lifetime ECL, and where the modification did not result in derecognition.

	30 June 2025 €m	31 December 2024 €m
Financial assets modified during the period		
Amortised cost before modification	379	870
Financial assets modified since initial recognition		
Gross carrying amount of financial assets for which impairment loss allowance has changed from lifetime to 12 month expected credit losses during the period	1,562	1,825

20 Deferred tax

The DTA of €488 million (31 December 2024: €546 million) includes an amount of €542 million (31 December 2024: €624 million) in respect of operating losses which are available to shelter future profits from tax, of which €500 million relates to Irish tax losses carried forward by The Governor and Company of the Bank of Ireland (the 'Bank'), €40 million relates to UK tax losses carried forward by Bank of Ireland (UK) plc, and €2 million relates to US tax losses carried forward by the US branch of the Bank.

The recognition of a DTA in respect of tax losses carried forward requires the Directors to be satisfied that it is probable that the Group will have sufficient future taxable profits against which the losses can be utilised.

In considering the available evidence to support recognition of the DTA, the Group takes into consideration the impact of both positive and negative evidence including historical financial performance, projections of future taxable income and the impact of tax legislation.

Positive factors which have been considered include:

- as evidenced by continuing profitability, and with the exception of 2020 and the years of the financial crisis, the Group has a sustained history of Irish operating profits and a large market share and it is considered likely that the Group's Irish activities will be profitable into the future;
- the absence of any expiry dates for Irish and UK tax losses; and
- external economic forecasts for Ireland and the UK which indicate continued economic growth and improved employment levels.

The Group also considered the following in assessing the financial assumptions and projections:

- the absolute level of deferred tax assets compared to the Group's equity;
- the quantum of profits required to be earned and the period over which it is projected that the tax losses will be utilised;
- the challenges of projecting, taking account of the level of competition and the evolving interest rate environment; and
- accelerated transformation of banking business models.

Based on the Group's proven earnings history, its strong position within the Irish financial services market and its strategic priorities to deliver sustained future Irish profits, the Directors believe that the Group will continue to be profitable but acknowledge the external challenges facing the banking industry, in particular, the traditional, full service banks and the inherent uncertainties of financial projections.

The Group's assessment of deferred tax recoverability is based on its financial projections covering its five year initial planning period, with an annual 2% growth rate thereafter and, based

on these projections, the DTA in respect of Irish tax losses is estimated to be recovered in full by the end of 2028 (31 December 2024: 2028). The use of reasonably possible alternative assumptions within those projections would not impact the carrying value of the DTA.

Notwithstanding the absence of any expiry date for trading losses in the UK, the Group continues to conclude that, for the purpose of valuing its UK DTA, the brought forward trading losses within the Bank's UK branch will be limited by reference to a ten year period of projected UK branch profits at the prevailing UK tax rates. This ten year timescale is the period over which the Group believes it can conclude that it is probable that future taxable profits will be available in the UK branch.

On this basis, no DTA is currently recognised for losses of the Bank's UK branch (31 December 2024: €nil). However, any remaining unutilised carried forward trading losses of the UK branch have been recognised for DTA purposes at the Irish tax rate, on the basis that it is expected that these will be utilised against future Bank profits in Ireland as permitted by current tax legislation.

The Group has not recognised a DTA of €165 million (2024: €170 million) in respect of unused tax losses of which €51 million (2024: €51 million) relates to US tax losses which are subject to a 20 year life and are scheduled to expire unused in the period 2028 - 2029 due to an annual limitation of use. The balance relates to UK tax losses which have no expiry date but are currently not projected to be recovered within ten years.

Based on the Group's financial projections, the Directors believe that BOI (UK) plc will continue to be profitable for the foreseeable future and the DTA in respect of tax losses is estimated to be recoverable in full by the end of 2029 (31 December 2024: 2029).

There is a risk that the final taxation outcome could be different to the amounts currently recorded. If future profits or subsequent forecasts differ from current forecasts, a further adjustment may be required to the DTA.

Pillar 2 model rules

The Group currently estimates that there could be a future top-up tax payable in Ireland on an element of Irish profits but, the impact on the current tax charge in the current period is insignificant due primarily to the ability to take into account certain historic tax losses in the Bank at 15% and also due to profits arising in jurisdictions with an effective tax rate in excess of 15%.

The Group applies the mandatory exception to recognising and disclosing information about deferred tax assets and liabilities related to Pillar 2 income taxes, as provided in the amendments to IAS 12 issued in May 2023.

21 Deposits from banks

At 30 June 2025, the Group held Monetary Authority secured funding of €0.5 billion (31 December 2024: €1.1 billion) under the BoE Term Funding Scheme for Small and Medium-sized Enterprises (TFSME) and Indexed Long-Term Repo (ILTR) facility. Drawings under the TFSME from the BoE are projected to be repaid during 2026 and 2030 with the final residual amount due to be repaid in October 2030 under the Second Phase of TFSME extension. The ILTR facility is due to be repaid in August 2025.

At 30 June 2025, the Group's Monetary Authority secured funding is secured by loans and advances to customers.

Deposits from banks include cash collateral of €0.5 billion (31 December 2024: €0.3 billion) received from derivative counterparties in relation to net derivative asset positions.

	30 June 2025 €m	31 December 2024 €m
Deposits from banks	806	597
Monetary Authority secured funding	503	1,122
Securities sold under agreement to repurchase - private market repos	53	86
Deposits from banks	1,362	1,805

22 Customer accounts

The carrying amount of the customer accounts designated at FVTPL at 30 June 2025 was €57 million, €2 million lower than the contractual amount due at maturity of €59 million (31 December 2024: the carrying amount was €114 million, €4 million lower than the contractual amount due at maturity of €118 million).

At 30 June 2025, the Group's largest 20 customer deposits amounted to 3% (31 December 2024: 3%) of customer accounts. Deposit accounts where a period of notice is required to make a withdrawal are classified within term deposits and other products.

	30 June 2025 €m	31 December 2024 €m
Current accounts	60,761	59,870
Demand deposits	30,154	29,538
Term deposits and other products	14,427	13,827
Customer accounts at amortised cost	105,342	103,235
Term deposits at FVTPL	57	114
Total customer accounts	105,399	103,349

Balance at end of the period	(2)	(2)

23 Debt securities in issue

The carrying amount of bonds and medium term notes has decreased by €1.3 billion at 30 June 2025 due to €1.8 billion in redemption of bonds and notes and €0.4 billion of FX adjustments, offset by senior issuances of €0.8 billion in bonds and €0.1 billion of other adjustments (31 December 2024: The carrying amount of bonds and medium term notes increased by €0.6 billion due to senior issuances of €0.9 billion in bonds, €0.2 billion of FX adjustments and €0.2 billion of other adjustments, offset by €0.7 billion in redemption of bonds and notes).

The carrying amount of the debt securities in issue designated at FVTPL at 30 June 2025 was €195 million, €25 million lower than the contractual amount due at maturity of €220 million (31 December 2024: the carrying amount was €204 million, €15 million lower than the contractual carrying amount due at maturity of €219 million).

In H125 €750 million of green bonds were issued through the Group's Green Bond framework, bringing total issuances to date to €5.45 billion. The Group has set targets for sustainable financing of c.€15 billion by 2025 and c.€30 billion by 2030. The 2025 target has been met ahead of schedule in H125.

Closing balance	42	7	188	237	20	8	207	235

The Group has recognised provisions in relation to restructuring costs, onerous contracts, legal and other. Such provisions are sensitive to a variety of factors, which vary depending on their nature. The estimation of the amounts of such provisions is judgemental because the relevant payments are due in the future and the quantity and probability of such

payments is uncertain. The methodology and the assumptions used in the calculation of provisions are reviewed regularly and, at a minimum, at each reporting date.

At 30 June 2025, the restructuring provision amounted to €42 million (31 December 2024: €20 million).

24 Provisions *(continued)*

This largely related to the Simpler Business Programme and associated redundancy costs of €33 million (31 December 2024: €10 million) and building exit costs of €9 million (31 December 2024: €10 million) in line with the Group's property strategy.

UK motor finance business

As disclosed by the Group in previous periods, the Group's UK motor finance business, similar to industry peers, has continued to receive a number of complaints and county court claims in respect of its historical use of commission arrangements. The Financial Conduct Authority (FCA) prohibited the use of Discretionary Commission Arrangements (DCAs) from January 2021, which the Group's UK motor finance business adhered to.

In January 2024, the UK FCA commenced a review of historical motor finance commission arrangements and sales across several firms (the 'FCA review'). The FCA stated that if they find there has been widespread misconduct and that consumers have lost out, they will identify how best to ensure people who are owed compensation receive an appropriate settlement in an orderly, consistent and efficient way. The FCA has paused the handling of these complaints, until December 2025.

On 25 October 2024, the UK Court of Appeal (CoA) published its combined judgement on three cases, relating to other lenders, on disclosure of dealer commissions on historical motor finance transactions. The CoA decided that, based upon the facts of those cases, motor dealers acting as credit brokers owe certain duties to their customers and set a higher bar for the disclosure of and consent to the existence, nature, and amount of commission paid to dealers than that required by current FCA rules, or regulatory requirements in force at the time of the cases in question. The lenders involved in the cases appealed this decision to the UK Supreme Court, and a hearing was held in April 2025. Both the FCA and the National Franchised Dealers Association intervened in the appeal by way of written and oral submissions. The Supreme Court President confirmed they aim to deliver their judgement before the end of July 2025. No Supreme Court judgement has been delivered as at 28 July 2025, the date of approval of these interim financial statements.

The FCA announced that it will confirm within six weeks of the Supreme Court appeal decision if it will be proposing a redress scheme, followed by a shorter than normal consultation period (e.g. six weeks). The FCA's statement outlines key considerations for implementing a potential consumer redress scheme and states that "any redress scheme must be fair to consumers who've lost out and ensure the integrity of the motor finance market, so it works well for future consumers".

The Group believes that its historical practices were compliant with previous legal authorities and regulations in place at the time and continues to engage with the current FCA review. The outcome of both the FCA's review of historical motor finance DCAs and the appeal before the Supreme Court remain uncertain, particularly in the context of the basis for any redress, and decisions on appropriate commission models along with clarity on the nature, extent and timing of any remediation. In addition, as the FCA review will conclude after the outcome of the Supreme Court hearing, this adds to the current significant uncertainty.

In line with the requirements of IAS 37, the Group continues to recognise a provision of €167 million updated for foreign exchanges rates and minor administration fees incurred (31 December 2024: €172 million). The provision represents the Group's best estimate of the redress and compensation that may be payable to impacted customers, along with costs that may be incurred by the Group in connection with any FCA consumer redress scheme and/or legal proceedings. It includes, inter alia, estimates for operational costs, the potentially impacted customer population, claim rates and redress amounts.

In establishing the provision estimate, the Group has created a number of scenarios to address significant uncertainties around a number of key assumptions, as well as the perimeters of the impacted population, and the nature, extent and timing of any remediation action if required. The key judgemental items include the outcome of the Supreme Court ruling, the assumption that the FCA will implement a redress scheme in all scenarios, the claims rate applied to each scenario, the basis of redress and population of customers eligible for redress and the probability weighting associated with each of the scenarios modelled.

The scenarios considered by the Group include consideration of the CoA judgement being upheld or overturned, the use of different bases for the calculation of redress, the application of varying time periods, customer behaviours and of the form of any FCA redress scheme for eligible customers including compensatory interest applied.

The probability weighting allocated to each scenario reflects the Group's consideration of the CoA judgement being upheld or overturned, and the nature and form of any redress scheme that the FCA may introduce in response to that judgement. Significant uncertainties exist around the nature, extent and timing of any remediation action if required. If the Group assumed that the CoA ruling would be upheld, the provision would increase by €99 million on a probability-weighted basis, keeping all other assumptions unchanged, while a reduction of €99 million would arise if it was assumed that the ruling would be overturned.

An average claim rate of 36%, based on industry experience of successful Payment Protection Insurance (PPI) claim rates against UK banks, which represents the portion of customers who make a successful request for reimbursement, has been applied in each of the scenarios and is a critical accounting estimate that could materially change the ultimate financial impact. A claim rate sensitivity has been modelled, holding all other assumptions constant, which represents the impact of a +/- 10% movement in the claim rate assumed in the scenarios which would increase/decrease the provision by +/- €34 million.

Given the developments identified above and the highlighted significant uncertainties, it is possible that the key areas of estimation uncertainty could change by more than the sensitivities illustrated and therefore significantly change the provision. The ultimate financial impact could be significantly higher or lower than the amount the Group has provided.

25 Contingent liabilities and commitments

	30 June 2025 €m	31 December 2024 €m
Contingent liabilities and guarantees / letters of credit		
Guarantees and irrevocable letters of credit	801	806
Acceptances and endorsements	1	2
Other contingent liabilities	234	245
	1,036	1,053
Loan commitments		
Documentary credits and short-term trade related transactions	11	12
Undrawn formal standby facilities, credit lines and other commitments to lend	17,795	17,498
<i>Revocable or irrevocable with original maturity of 1 year or less</i>	<i>11,439</i>	<i>9,914</i>
<i>Irrevocable with original maturity of over 1 year</i>	<i>6,356</i>	<i>7,584</i>
	17,806	17,510
Capital commitments	152	175

The table gives the contract amounts of contingent liabilities and commitments. The maximum exposure to credit loss under contingent liabilities and commitments is the contractual amount of the instrument in the event of non-performance by the other party where all counter claims, collateral or security prove worthless.

Other contingent liabilities

Other contingent liabilities primarily include performance bonds and are generally short-term commitments to third parties which are not directly dependent on the customers' credit worthiness. The Group is also party to legal, regulatory, taxation and other actions arising out of its normal business operations.

Loan commitments

In 2022, as part of the KBCI portfolio acquisition the Group committed to support the growth of non-bank lenders in the Irish mortgage market, making up to €1 billion in total funding available to certain non-bank lenders through the purchase of

securities issued by them, to increase their funding capacity and reduce their cost of funding. This commitment expired on 1 June 2025 (30 June 2025: €nil) (31 December 2024: €415 million). On expiry of this commitment, the Group had invested a total of €584 million.

Capital commitments

For full details on Davy's capital commitments, see note 40 of The Governor and Company of the Bank of Ireland's 2024 Annual Report. The total of Davy's capital commitments at 30 June 2025 was €152 million (31 December 2024: €175 million). In turn, Davy obtain legally binding commitments from private clients to meet their share of potential future cash calls up to indicative levels as outlined in the individual investment memoranda. The total of such cash calls for H125 was €17 million (31 December 2024: €44 million). At 30 June 2025, there were no unpaid cash calls in respect of third-party investment providers (31 December 2024: €nil).

26 Retirement benefit obligations

The net IAS 19 pension surplus at 30 June 2025 was €833 million (31 December 2024: €994 million). This is shown on the balance sheet as a retirement benefit asset of €835 million (31 December 2024: €997 million) and a retirement benefit obligation of €2 million (31 December 2024: €3 million). The significant financial assumptions used in measuring the Group's net defined benefit pension surplus under IAS 19 are set out in the table below.

Financial assumptions	30 June 2025 % p.a.	31 December 2024 % p.a.
Irish Schemes		
Discount rate	4.15%	3.80%
Inflation rate	2.10%	2.05%
UK Schemes		
Discount rate	5.80%	5.65%
Consumer Price Inflation	2.50%	2.65%
Retail Price Inflation	3.10%	3.25%

Sensitivity of defined benefit obligation to key assumptions

The table below sets out how the defined benefit obligation would have been affected by changes in the significant actuarial assumptions that were reasonably possible.

Impact on defined benefit obligations	Increase / (decrease) 30 June 2025 €m	Increase / (decrease) 31 December 2024 €m
Rol schemes		
Discount rate		
Increase of 0.25%	(174)	(190)
Decrease of 0.25%	185	202
Inflation rate		
Increase of 0.10%	46	51
Decrease of 0.10%	(45)	(50)
UK schemes		
Discount rate		
Increase of 0.25%	(32)	(35)
Decrease of 0.25%	34	37
RPI Inflation		
Increase of 0.10%	7	8
Decrease of 0.10%	(8)	(8)

26 Retirement benefit obligations *(continued)*

The table below sets out the estimated sensitivity of plan assets to changes in equity markets and interest rates.

	Increase / (decrease) 30 June 2025 €m	Increase / (decrease) 31 December 2024 €m
Impact on plan assets		
Sensitivity of plan assets to a movement in global equity markets with allowance for other correlated diversified asset classes		
Increase of 5.00%	64	69
Decrease of 5.00%	(64)	(69)
Sensitivity of liability matching assets to a 25bps movement in interest rates		
Increase of 0.25%	(220)	(260)
Decrease of 0.25%	237	276
Sensitivity of liability matching assets to a 10bps movement in inflation rates		
Increase of 0.10%	57	68
Decrease of 0.10%	(57)	(67)

The remeasurement of the net defined benefit pension asset is recognised in other comprehensive income as set out in the following table.

	6 months ended 30 June 2025 €m	6 months ended 30 June 2024 €m
Present value of obligation gain	309	348
Fair value of plan assets (loss)	(479)	(238)
Total (loss) / gain	(170)	110

27 Subordinated liabilities

The principal terms and conditions of all subordinated liabilities are set out in note 43 of The Governor and Company of the Bank of Ireland's 2024 Annual Report.

	30 June 2025 €m	31 December 2024 €m
€500 million 5.150% Fixed Rate Reset Callable Subordinated Notes due 2034	514	515
€500 million 7.050% Fixed Rate Reset Callable Subordinated Notes due 2033	508	505
€500 million 1.675% Fixed Rate Reset Callable Subordinated Notes due 2031	491	483
£300 million 7.994% Fixed Rate Reset Callable Subordinated Notes due 2032	348	354
Total subordinated liabilities	1,861	1,857

28 Other equity instruments - Additional Tier 1

In March 2025, the Bank issued AT1 securities with a par value of €600 million at an issue price of 100%.

The principal terms of the AT1 securities in issue are as follows:

- The securities constitute direct, unsecured, unguaranteed and subordinated obligations of the Bank, rank behind Tier 2 instruments and preference shareholders and in priority to ordinary shareholders.
- The securities have no fixed redemption date and the security holders will have no right to require the Bank to redeem or purchase the securities at any time.
- The outstanding c.€169 million securities was redeemed on 19 May 2025.
- The €300 million securities issued September 2020 bear a fixed rate of interest of 6.300% until its first reset date (1 March 2026).
- The €600 million securities issued September 2024 bear a fixed rate of interest of 6.750% until the first reset date (10 September 2030).
- The €600 million securities issued March 2025 bear a fixed rate of interest of 6.500% until the first reset date (18 September 2032).

- The Bank may, in its sole and full discretion but subject to the satisfaction of certain conditions elect to redeem all (but not some only) of the securities at any time from and including the first call date (1 September 2025 for the €300 million issue, 10 March 2030 for the €600 million issued September 2024 and 18 March 2032 for the €600 million issued March 2025) to and including the first relevant reset date, or semi-annually on any interest payment date thereafter.

After the initial reset date, in the event that they are not redeemed, the AT1 securities will bear interest at rates fixed periodically in advance for five-year periods based on market rates at that time;

- the Bank may elect at its sole and full discretion to cancel (in whole or in part) the interest otherwise scheduled to be paid on any interest payment date for the securities;
- the securities will be written down and any unpaid interest will be cancelled if the Bank's CET1 ratio falls below 7%; and
- subsequent to any write-down event the Bank may, at its sole discretion, write-up some or all of the written-down principal amount of the AT1 securities provided regulatory capital requirements and certain conditions are met.

	30 June 2025 €m	31 December 2024 €m
€675 million Additional Tier 1 Perpetual Contingent Temporary Write-Down Securities issued May 2020	-	169
€300 million Additional Tier 1 Perpetual Contingent Temporary Write-Down Securities issued September 2020	300	300
€600 million Additional Tier 1 Perpetual Contingent Temporary Write-Down Securities issued September 2024	600	600
€600 million Additional Tier 1 Perpetual Contingent Temporary Write-Down Securities issued March 2025	600	-
	1,500	1,069

29 Cash and cash equivalents

Cash and balances at central banks of €27.3 billion decreased by €5.1 billion since 31 December 2024 primarily due to net bond purchases / maturities of €5.5 billion, lower wholesale funding volumes of €1.5 billion, higher customer loan volumes of €0.8 billion (constant currency basis), FX loss of €0.3 billion, partially offset by higher deposit volumes of €2.6 billion (constant currency basis) and an increase in AT1 volumes of €0.4 billion.

	30 June 2025 €m	31 December 2024 €m
Cash and balances at central banks	27,325	32,441
Less impairment loss allowance on cash and balances at central banks	(4)	(5)
Cash and balances at central banks (net of impairment loss allowance)	27,321	32,436
Loans and advances to banks (with an original maturity of less than 3 months)	1,807	1,738
Cash and cash equivalents at amortised cost	29,128	34,174

30 Liquidity risk and profile

The following tables summarise the maturity profile of the Group's non-derivative financial liabilities (excluding those arising from insurance and investment contracts in the Wealth and Insurance division) at 30 June 2025 and 31 December 2024, based on contractual undiscounted repayment obligations. The balances will not agree directly to the consolidated balance sheet as the tables incorporate all cash flows, on an undiscounted basis, related to both principal and interest payments.

Unit-linked investment liabilities and unit-linked insurance liabilities with a carrying value of €9,265 million and €16,513 million respectively (31 December 2024: €9,203 million and €16,685 million respectively) are excluded from this analysis as their repayment is linked to the financial assets backing these contracts.

30 June 2025 Group's non-derivative financial liabilities Contractual maturity	Demand €m	Up to 3 months €m	3-12 months €m	1-5 years €m	Over 5 years €m	Total €m

31 Fair values of assets and liabilities

A definition of fair value and the fair value hierarchy, along with a description of the methods, assumptions and processes used to calculate fair values of assets and liabilities is set out on pages 416 to 418 of The Governor and Company of the Bank of Ireland's Annual Report. At 30 June 2025, there have been no significant changes to those methods, assumptions, processes or the Group's policy for assessing transfers between the different levels of the fair value hierarchy.

Sensitivity of level 3 valuations

Derivative financial instruments

Certain derivatives are valued using unobservable inputs relating to counterparty credit such as credit grade and own credit spread, which are sourced from independent brokers. These unobservable inputs may be significant to their valuation. The effect of using reasonably possible alternative assumptions in the valuation of these derivatives at 30 June 2025 was immaterial. Where the impact of unobservable inputs is significant to the valuation of the asset or liability, it is categorised as level 3 on the fair value hierarchy.

In addition, a small number of derivative financial instruments are valued using significant unobservable inputs other than counterparty credit (level 3 inputs). However, changing one or more assumptions used in the valuation of these derivatives would not have a significant impact as they are entered into to hedge the exposure arising on certain customer accounts (see below), leaving the Group with no net valuation risk due to the unobservable inputs.

Loans and advances to customers held at fair value

These consist of assets mandatorily measured at FVTPL, of which €175 million (31 December 2024: €185 million) are 'Life loan mortgage products'. Unlike a standard mortgage product, borrowers do not make any periodic repayments and the outstanding loan balance increases through the life of the loan as interest due is capitalised. The mortgage is typically repaid out of the proceeds of the sale of the property.

These assets are valued using discounted cash flow (DCF) models which incorporate unobservable inputs (level 3 inputs). Using reasonably possible alternative assumptions would not have a material impact on the value of these assets.

Other financial assets at FVTPL

A small number of these assets have been valued using DCF models and a discounted equity value method, which incorporates unobservable inputs (level 3). Certain private equity funds, which predominantly invest in properties, are valued with reference to the underlying property value which in itself incorporates unobservable inputs (level 3). Using reasonably possible alternative assumptions would not have a material impact on the value of these assets.

Interest in associates

Investments in associates, which are venture capital investments, are accounted for at FVTPL and are valued in accordance with the 'International Private Equity and Venture

Capital Valuation Guidelines'. This requires the use of various inputs such as DCF analysis and comparison with the earnings multiples of listed comparative companies amongst others.

Although the valuation of unquoted equity instruments is subjective by nature, the relevant methodologies are commonly applied by other market participants and have been consistently applied over time.

As the inputs are unobservable, the valuation is deemed to be based on level 3 inputs. Using reasonably possible alternative assumptions would not have a material impact on the value of these assets.

Customer accounts

Customer accounts designated at FVTPL consist of deposits which contain an embedded derivative (typically an equity option).

These instruments are typically valued using valuation techniques which use observable market data. The Group incorporates the effect of changes in its own credit spreads when valuing these instruments. The Group sources own credit spreads from independent brokers (level 3 inputs) as observable own credit spreads are not available. Where the impact of unobservable inputs is significant to the valuation of a customer account, that account is categorised as level 3 on the fair value hierarchy. Using reasonably possible alternative assumptions would not have a material impact on the value of these liabilities.

A small number of customer accounts are valued using additional unobservable inputs (level 3 inputs). However, changing one or more assumptions used in the valuation of these customer accounts would not have a significant impact as these customer accounts are hedged with offsetting derivatives (see above), leaving the Group with no net valuation risk due to those unobservable inputs.

Fair value on offsetting positions

Where the Group manages certain financial assets and financial liabilities on the basis of its net exposure to either market risks or credit risk, the Group applies the exception allowed under paragraph 48 of IFRS 13.

That exception permits the Group to measure the fair value of a group of financial assets and financial liabilities on the basis of the price that would be received to sell a net long position (i.e. an asset) for a particular risk exposure or paid to transfer a net short position (i.e. a liability) for a particular risk exposure in an orderly transaction between market participants at the measurement date under current market conditions.

Accordingly, the Group measures the fair value of the group of financial assets and financial liabilities consistently with how market participants would price the net risk exposure at the measurement date.

31 Fair values of assets and liabilities *(continued)*

The following table sets out the level of the fair value hierarchy for financial assets and financial liabilities held at fair value.

	30 June 2025				31 December 2024			
	Level 1 €m	Level 2 €m	Level 3 €m	Total €m	Level 1 €m	Level 2 €m	Level 3 €m	Total €m

¹ 'Other liabilities' relate to contingent consideration recognised for the acquisition of Davy.

The transfers from level 3 to level 2 arose due to unobservable inputs becoming observable for the fair value measurement of these liabilities. The transfer from level 2 to level 3 at 31 December 2024, arose as a result of certain material inputs becoming unobservable.

Quantitative information about fair value measurements using significant unobservable inputs (Level 3)

Level 3 financial assets	Valuation technique	Unobservable input	Fair value		Range	
			30 June 2025 €m	31 December 2024 €m	30 June 2025 %	31 December 2024 %
Loans and advances to customers	Discounted cash flow	Discount on market rate	175	185	4.50% - 4.90%	4.5% - 6.40%
		Collateral charges			0% - 4.00%	0% - 4.30%
Other financial assets at FVTPL	Discounted cash flow	Discount rate	283	322	0% - 15%	0% - 15%
	Equity value less discount	Discount			0% - 50%	0% - 50%
	Market comparable property transactions	Yield			1.12% - 14.33%	3.05% - 14.17%
Derivative financial instruments	Discounted cash flow / Option pricing model	Counterparty credit spread	8	15	0% - 1%	0% - 1.5%
		Own credit spread			0.6% - 1.6%	0.3% - 1.7%
Interest in associates	Market comparable companies	Price of recent investment	78	76	-	-
		Earnings multiple				
		Revenue multiple				

31 Fair values of assets and liabilities *(continued)*

Quantitative information about fair value measurements using significant unobservable inputs (Level 3) *(continued)*

Level 3 financial liabilities	Valuation technique	Unobservable input	Fair value		Range	
			30 June 2025 €m	31 December 2024 €m	30 June 2025 %	31 December 2024 %
Derivative financial instruments	Discounted cash flow / Option pricing model	Counterparty credit spread	1	15	0% - 1%	0% - 1.5%
		Own credit spread			0.6% - 1.6%	0.3% - 1.7%

Valuation techniques and unobservable inputs

In the tables above:

- discount market rates represent a range of discount rates that market participants would use in valuing these assets;
- holdings in real estate property funds (within other financial assets at FVTPL) are valued through market comparable property transactions;
- counterparty and own credit spreads represent the range of credit spreads that market participants would use in valuing these contracts;
- earnings and revenue multiples represent multiples that market participants would use in valuing these investments;
- the Group does not disclose the ranges for interests in associates. Given the wide range of diverse investments and the correspondingly large difference in prices, the Group believes disclosure of ranges would not provide meaningful information without a full list of the underlying investments, which would be impractical.

Financial assets and liabilities carried at amortised cost

The carrying amount and the fair value of the Group's financial assets and liabilities which are carried at amortised cost are set out in the table below. Items where the carrying amount is a reasonable approximation of fair value are not included, as permitted by IFRS 7.

	30 June 2025		31 December 2024	
	Carrying amount €m	Fair values €m	Carrying amount €m	Fair values €m
Financial instruments				
Assets				
Loans and advances to banks	1,771	1,771	1,683	1,683
Debt securities at amortised cost	12,557	12,561	6,387	6,374
Loans and advances to customers	82,037	82,444	82,353	82,690
Liabilities				
Deposits from banks	1,362	1,362	1,805	1,805
Customer accounts	105,342	105,301	103,235	103,205
Debt securities in issue	7,822	7,783	8,935	8,915
Subordinated liabilities	1,861	1,920	1,857	1,920

32 Post balance sheet events

In respect of H125, the Court has approved an interim distribution of 1 cent per unit of ordinary stock, equivalent to €243 million, payable to its parent, BoIG plc.

33 Approval of interim report

The Court of Directors approved the Interim Report on 28 July 2025.

Other information

Forward-looking statement

This document contains forward-looking statements with respect to certain of The Governor and Company of the Bank of Ireland (the 'Bank') and its subsidiaries' (collectively the 'Group') plans and its current goals and expectations relating to its future financial condition and performance, the markets in which it operates and its future capital requirements. These forward-looking statements often can be identified by the fact that they do not relate only to historical or current facts.

Generally, but not always, words such as 'may,' 'could,' 'should,' 'will,' 'expect,' 'intend,' 'estimate,' 'anticipate,' 'assume,' 'believe,' 'plan,' 'seek,' 'continue,' 'target,' 'goal,' 'would,' or their negative variations or similar expressions identify forward-looking statements, but their absence does not mean that a statement is not forward-looking.

Examples of forward-looking statements include, among others: statements regarding the Group's near term and longer term future capital requirements and ratios, loan to deposit ratios, expected impairment charges, the level of the Group's assets, the Group's financial position, future income, business strategy, projected costs, margins, future payment of dividends, future share buybacks, the implementation of changes in respect of certain of the Group's pension schemes, estimates of capital expenditures, discussions with Irish,

United Kingdom, European and other regulators, plans and objectives for future operations, and the continued impact of regional conflicts and geopolitical uncertainties on the above issues and generally on the global and domestic economies. Such forward-looking statements are inherently subject to risks and uncertainties, and hence actual results may differ materially from those expressed or implied by such forward-looking statements.

Such risks and uncertainties include, but are not limited to, those as set out in the 'Principal Risks and Uncertainties' section of this document and also the discussion of risk in note 25 of The Governor and Company of the Bank of Ireland's 2024 Annual Report.

Nothing in this document should be considered to be a forecast of future profitability, dividend forecast or financial position of the Group and none of the information in this document is or is intended to be a profit forecast, dividend forecast or profit estimate. Any forward-looking statement speaks only at the date it is made. The Group does not undertake to release publicly any revision to these forward-looking statements to reflect events, circumstances or unanticipated events occurring after the date hereof.

Rates of exchange

Principal rates of exchange used in the preparation of the interim financial statements are as follows:

	30 June 2025		30 June 2024		31 December 2024	
	Average	Closing	Average	Closing	Average	Closing
€ / Stg£	0.8423	0.8555	0.8546	0.8464	0.8466	0.8292
€ / US\$	1.0928	1.1720	1.0813	1.0705	1.0824	1.0389

Credit Ratings

	30 June 2025	31 December 2024
The Governor and Company of the Bank of Ireland - Senior debt		
Standard & Poor's	A (Positive)	A (Positive)
Moody's	A1 (Positive)	A1 (Positive)
Fitch	A (Stable)	A- (Positive)

Alternative performance measures

Further information related to certain measures referred to in the Business Review.

Business income is net other income before other expenses / income and other valuation items.

Constant currency: To enable a better understanding of performance, certain variances are calculated on a constant currency basis by adjusting for the impact of movements in exchange rates during the period as follows:

- for balance sheet items, by reference to the closing rate at the end of the current and prior period ends; and
- for items relating to the income statement, by reference to the current and prior period average rates.

Liquid assets are comprised of cash and balances at central banks, loans and advances to banks, debt securities at amortised cost, financial assets at FVOCI and certain financial assets at FVTPL (excluding balances in Wealth and Insurance).

Liquidity Coverage Ratio (LCR) is calculated based on the Commission Delegated Regulation (EU) 2015/61 and is prepared on a regulatory group basis, in accordance with the Capital Requirements Directive (CRD IV), which comprises banking and other relevant financial institutions within the Bank of Ireland Group, but excludes non-banking related institutions such as insurance entities. For further information, see the Group's Pillar 3 disclosures (tab 1.3), available on the Group's website.

Loan to Deposit Ratio is calculated as being net loans and advances to customers divided by customer deposits.

Net Stable Funding Ratio (NSFR) is prepared on a regulatory group basis, in accordance with the EU Capital Requirement Regulations and Directive, as amended, which requires the maintenance of a NSFR ratio greater than or equal to 100%, effective June 2021. For further information see the Group's Pillar 3 disclosures (tab 1.3) available on the Group's website.

Net organic capital generation primarily consists of attributable profit after impairment and movements in regulatory deductions, and is calculated with reference to RWAs at the end of the period.

New lending volumes

- Net new lending volumes represent loans and advances to customers drawn down during the period (including revolving credit facility activity) and portfolio acquisitions, net of repayments and redemptions.
- Gross new lending volumes represent loans and advances to customers drawn down during the period and portfolio acquisitions.

NPEs

- credit-impaired loans which includes loans where the borrower is considered unlikely to pay in full without recourse by the Group to actions such as realising security and / or loans where the borrower is greater than or equal to 90 days past due and the arrears amount is material; and
- other loans meeting NPE criteria as aligned with regulatory requirements.

NPE ratio is calculated as NPEs on loans and advances to customers at amortised cost (including loans and advances to customers measured at FVTPL) as a percentage of the gross carrying value of loans and advances to customers at amortised cost.

Return on assets is calculated as being statutory net profit / loss after tax (annualised) divided by total assets, in line with the requirement in the EU (Capital Requirements) Regulations 2014.

Underlying excludes non-core items which are those items that the Group believes obscure the underlying performance trends in the business. See page 4 for further information.

Underlying divisional contribution reflects the underlying financial contribution of each division towards the consolidated Group underlying profit or loss, before tax, excluding non-core items which obscure the underlying performance of the business.

Wholesale funding is comprised of deposits by banks (including collateral received) and debt securities in issue.

For any abbreviations used in this document please refer to the abbreviations listing on pages 468 to 470 of The Governor and Company of the Bank of Ireland's 2024 Annual Report.
