Bank of Ireland Group plc Pillar 3 Semi-Annual Disclosures June 2024

Forward-looking statement

This document contains forward-looking statements with respect to certain of Bank of Ireland Group plc (the 'Company' or 'BOIG plc') and its subsidiaries' (collectively the 'Group' or 'BOIG plc Group') plans and its current goals and expectations relating to its future financial condition and performance, the markets in which it operates and its future capital requirements. These forward-looking statements often can be identified by the fact that they do not relate only to historical or current facts. Generally, but not always, words such as 'may,' 'could,' 'should,' 'will,' 'expect,' 'intend,' 'estimate,' 'anticipate,' 'assume,' 'believe,' 'plan,' 'seek,' 'continue,' 'target,' 'goal,' 'would,' or their negative variations or similar expressions identify forward-looking statements, but their absence does not mean that a statement is not forward-looking.

Examples of forward-looking statements include, among others: statements regarding the Group's near term and longer term future capital requirements and ratios, loan to deposit ratios, expected impairment charges, the level of the Group's assets, the Group's financial position, future income, business strategy, projected costs, margins, future payments of dividends, future share buybacks, the implementation of changes in respect of certain of the Group's pension schemes, estimates of capital expenditures, discussions with Irish, United Kingdom, European and other regulators, plans and objectives for future operations, and the continued impact of Russia's invasion of Ukraine and the Israeli-Palestinian conflict particularly on certain of the above issues and generally on the global and domestic economies. Such forward-looking statements are inherently subject to risks and uncertainties, and hence actual results may differ materially from those expressed or implied by such forward-looking statements.

Nothing in this document should be considered to be a forecast of future profitability, dividend forecast or financial position of the Group and none of the information in this document is or is intended to be a profit forecast, dividend forecast or profit estimate. Any forward-looking statement speaks only at the date it is made. The Group does not undertake to release publicly any revision to these forward-looking statements to reflect events, circumstances or unanticipated events occurring after the date hereof.

Introduction

The purpose of the Pillar 3 disclosures is to disclose information in accordance with the scope of application of Capital Requirements Directive & Regulation (CRD) requirements for the Group, particularly covering capital requirements and resources, credit risk, counterparty credit risk, information on securitisation activity, market risk, operational risk, liquidity risk, encumbered / unencumbered assets, leverage ratio and ESG risk. CRD in the context of this document describes the package CRR as amended, CRD as amended and regulatory and technical standards.

These disclosures represent the Pillar 3 disclosures of Bank of Ireland Group plc ('the Group) as at 30 June 2024. They have been prepared in accordance with the requirements of the CRD. In addition, we present disclosures as set out in Implementing Regulation (EU) 2021/763 relating to relevant information on Minimum Requirement for Own Funds and Eligible Liabilities (MREL).

It should be noted that while some quantitative information in this document is based on financial data contained in the Group's Interim Report 30 June 2024, the majority of the quantitative data is sourced from the Group's regulatory returns and is calculated according to regulatory requirements.

The difference between the accounting data and information sourced from the Group's regulatory returns is most evident for credit risk disclosures where credit exposure under CRD unlike financial statement information, includes potential future drawings of committed credit lines as well as other technical differences. Pillar 3 quantitative data is thus not always directly comparable with the quantitative data contained in the Group's Interim Report 30 June 2024.

Article 432(1) of the CRD and the EBA Guidelines on Materiality, Proportionality and Confidentiality and on Disclosure Frequency, allow for the omission of certain elements of information from Pillar 3 Disclosures on the basis of materiality.

Frequency

Under the CRD, the frequency of disclosures is now determined by the size of institution per Article 433. The Group is classified as a listed "large institution" as it meets certain conditions laid out in Article 4. The Group will disclose the requirements as outlined under Article 433a for a listed large institution and at the frequency required.

Verification

Information which is sourced from the Group's Interim Report 30 June 2024 may be subject to audit by the Group's external auditors and is subject to both internal and external review, along with appropriate governance procedures. The Pillar 3 document is subject to a robust governance process including final approval by the Group Audit Committee (GAC).

Media

Copies of the Group's Pillar 3 Disclosures can be obtained from the Group's website at www.bankofireland.com.

Policy

The Group Audit Committee has approved the Group's Pillar 3 Disclosure Policy which sets out how the Group complies with the Pillar 3 disclosure requirements. The policy sets out the overall approach to disclosure including inter alia frequency and method of disclosure, type of information to be disclosed, data sources and verification of disclosures, as well as setting out internal controls and procedures to be followed.

Attestation by Board member

"I confirm that Bank of Ireland Group's Pillar 3 Disclosures for 30 June 2024 to the best of my knowledge, comply with Part Eight of the CRD and have been prepared in accordance with the Group's Pillar 3 Disclosure Policy".

Mark Spain

Group Chief Financial Officer

1 The Group capital ratios have been presented including the retained profits in 2023, availing of the regulatory profit verification process.

2 In accordance with ECB guidance and EBA Q&A 2023_6887, no interim profits have been recognised under Article 26(2) of the Capital Requirements Regulation. The interim capital ratios for June 2024 have therefore been presented excluding the

benefit of H1 interim profits.

Key highlights

As per Article 473a and Article 468, Table 1.2 shows key metrics as required by the EBA/GL/2020/12 relating to the impact if the IFRS 9 transitional arrangements had not been applied. BOI elected to take advantage of the static and dynamic elements of the transitional capital rules in respect of expected credit losses introduced in 2018. The effect of this is to mitigate the impact on capital in adverse conditions.

	arrangements had not been applied	6.31%	6.38%	6.39%	6.54%	6.56%
17a	Leverage ratio (%) as if the temporary treatment of unrealised gains					
	and losses measured at fair value through OCI in accordance with					
	Article 468 of the CRR had not been applied ³	6.31%	6.39%	6.42%	6.55%	6.57%

1 The Group capital ratios have been presented including the retained profits in 2023, availing of the regulatory profit verification process.

2 In accordance with ECB guidance and EBA Q&A 2023_6887, no interim profits have been recognised under Article 26(2) of the Capital Requirements Regulation. The interim capital ratios for June 2024 have therefore been presented

excluding the benefit of H1 interim profits.

3 The Group has not availed of the Article 468 temporary treatment of certain unrealised gains and losses.

Capital

The Group's CET1 capital ratio (excluding the H1 audited profits) is 14.41% at 30 June 2024 (31 December 2023: 14.53%) calculated on a regulatory basis.

The decrease of c.10 basis points since 31 December 2023 is primarily due to CRD phasing of the deferred tax asset.

Capital

As per Article 438 point (d), Table 2.1 provides an overview of the total risk exposure amounts (TREA) forming the denominator of the risk based capital requirements calculated in accordance with Article 92 of the CRR. Total own funds requirements are calculated as 8% of TREA.

The decrease of €0.3 billion in RWA is primarily due to the benefit of a credit risk transfer transaction, partially offset by loan growth and the implementation of updates to internal ratings based models.

As per Article 437, points (a), (d), (e) and (f), Table 2.2 below provides a breakdown of the constituent elements of BOI's transitional own funds. Regulatory adjustments comprise deductions from own funds and prudential filters. It includes a cross reference to the corresponding rows in template EU CC2 (Tab 2.3) to facilitate full reconciliation of accounting and regulatory own funds.

Index

As per Article 440(a), Table 2.4 below sets out geographical distribution of credit exposures relevant to the calculation of the countercyclical capital buffer along with the overall additional capital requirement of €785 million at 30 June 2024 (31 December 2023) €604m). The increase in capital requirement is due mainly to the increase of the buffer in Ireland exposures during the year. CRD provides for a countercyclical buffer that could require banks to hold additional CET 1 capital of up to 2.5%. This requirement is expected to be imposed by the designated authority where credit growth is deemed to be excessive and leading to the build-up of system-wide risk.

Credit risk

Introduction

Under the standardised approach, risk weightings for rated counterparties are determined on the basis of the external credit rating assigned to the counterparty. For non-rated counterparties and certain other types of exposure, regulatory-determined standardised risk weightings are used.

Exposures rated under the standardised approach amount to €62,094 million (31 December 2023: €63,477 million). The exposure value is presented before credit risk mitigation ("CRM") and credit conversion factors ("CCF") and after credit impairment provisions but excluding counterparty credit risk exposures and securitisations.

Use of external credit ratings

Under CRD IV, institutions are permitted to determine the risk weight of an exposure with reference to the credit assessments of external credit assessment institutions ("ECAIs").

Risk weights are set out according to each exposure class. In many classes, risk weights are also determined by the credit quality of the exposure, with reference to the credit assessment of External Credit Assessment Institutions (ECAIs).

ECAI are used for the following standardised exposure classes:

- Exposures to central governments or central banks;
- Exposures to regional governments or local authorities;
- Exposures to public sector entities;
- Exposures to multilateral development banks; and
- Exposures to international organisations.

The Group uses external ratings provided by the ECAIs: Fitch Ratings, Moody's Investors Service and Standard & Poor's.

ECAI ratings are mapped to risk buckets or 'credit quality steps' in accordance with EU Commission implementing regulations.

Risk weights are set out in CRR tables according to these credit quality steps.

Analysis of credit risk Standardised approach

As per Article 453, points (g), (h) and (i) and Article 444 point (e), Table 3.1 below shows credit risk exposures net of specific credit risk adjustments under the standardised approach both before and after credit risk mitigation (CRM) and credit conversion factors (CCF) and the associated RWAs and RWAs density, split by exposure class. The template excludes counterparty credit risk and securitisation exposures.

As per Article 452, point (g)(i)-(v), Table 3.4 below presents the key parameters used for the calculation of capital requirements for credit risk exposures, under the Advanced IRB approach, split by PD range. Average maturity is not a component of the Advanced IRB RWA formula and is therefore not reported in the tables below. All exposures are presented both pre and post CRM and CCF (EAD). The template excludes counterparty credit risk and securitisations.

Table 3.4 EU CR6 - IRB approach - Credit risk exposures by exposure class and PD range (Advanced IRB)

Jun-24	On-balance sheet e exposures	Off-balance sheet exposures pre- CCF	Exposure weighted average CCF	EAD post CRM and post CCF	Exposure weighted average PD	Number of obligors	Exposure weighted average LGD	Exposure weighted average maturity (years)	Risk weighted exposure D amount after supporting factors	ensity of risk weighted exposure amount	Expected loss	Value adjustments ind provisions

1 Asset size: This represents movements in RWA driven by changes in the composition of the Group's existing portfolios. This includes, but is not limited to: constant currency growth in existing portfolios including new business and repayment of loans, changes in the product mix.

2 Asset quality: This can represent movements in RWA including but not limited to: PD Migration and LGD changes driven by economic conditions, changes in lending practices, demographics and model recalibrations and re-anchoring.

3 Model updates: This can represent movements in RWA including, but is not limited to: new model approvals, refinements and enhancements to improve model performance.

4 Methodology and policy: Updates to the RWA calculation methodology, communicated by the Regulator.

5 Acquisitions and disposals: This can represent movements in RWA due to changes in book sizes as a result of acquisitions and/or disposals.

6 Other comprises movements in non-credit RWA items and unconsolidated intragroup investments.

As per Article 442, points (c) and (e), Table 3.8 below presents gross carrying amount (including accrued interest) of performing and non-performing exposures and the related accumulated impairment, provisions, accumulated change in fair value due to credit risk, accumulated partial write-off, and collateral and financial guarantees received, according to the scope of regulatory consolidation. The Group's non performing loans (NPL) are 2.83% at June 2024 (3.05% December 2023).

.

Credit risk mitigation

Bank of Ireland Group plc

As per Article 453 point (f), Table 3.14 below includes all collateral, financial guarantees and credit derivatives used as credit risk mitigants for all secured exposures, irrespective of whether the standardised approach or the IRB approach is used for RWEA calculation. Any secured exposures by collateral or financial guarantees (eligible or not eligible as CRM techniques under Part Three, Title II, Chapter 4 of the CRD) have been disclosed.

Secured exposures are limited to those exposures against which eligible collateral which meets CRD definitions is held and has been used in the calculation of the Group's capital requirements. Haircuts are applied consistent with CRD requirements.

This table is not reflective of the total volume of exposures against which collateral and guarantees are actually held across the Group, nor does it reflect the full range of credit risk mitigation taken. A significant portion of the exposures included in Table 3.14 (exposures unsecured carrying amount) benefit from security taken to mitigate credit risk, but this security is not eligible for use in the regulatory capital calculations. For example, exposures in the Group's leasing business are included as unsecured exposures in the table, although the underlying assets financed are held to mitigate credit risk in this business.

The table excludes exposures where the Group nets derivative mark-to-market positions with certain interbank counterparties against cash collateral placed and received with those counterparties under credit support annex (CSA) agreements. For cash collateral held against derivative exposures refer to the counterparty credit risk section.

Debt securities are included in the relevant exposure classes in the table. Credit risk mitigation realised through the netting of on-balance sheet assets and liabilities is not reflected in the table. Certain customer loans and overdrafts are netted against deposits as permitted by the CRD subject to certain criteria including a legal right of offset. Effectiveness of netting techniques is achieved through the execution of industry standard legal agreements.

Collateral used to mitigate risk, both for mortgage and other lending is diversified. The main types of guarantors are corporates, individuals, financial institutions, sovereigns and multilateral development banks (MDBs). Their creditworthiness is assessed on a case- by-case basis.

Counterparty Credit Risk

Bank of Ireland Group plc

The Group determines exposure values for counterparty credit risk on derivatives primarily using the Standardised Approach (SA-CCR). The Original Exposure Method is used for derivatives transacted by entities in the newly acquired Davy Group. The Group determines exposure values for repurchase transactions using the Financial Collateral Comprehensive Method (FCCM).

In determining the EAD for derivative credit exposure, the Group recognises the credit risk mitigating impact of cash collateral received under CSAs. EAD for particular netting sets is reduced by the amount of cash collateral held in accordance with the relevant specific regulatory rules. Separately, where the Group posts collateral under a CSA, the net negative mark-to-market on the related netting set is used to reduce the EAD on the collateral exposure, once again in accordance with the relevant specific regulatory rules.

In addition, a Credit Valuation Adjustment (CVA) is applied to the Group's non- collateralised derivatives based primarily on the creditworthiness of the client and the fair value of the underlying transaction. The Group determines CVA under the Standardised method.

Securitisation roles and strategy

The Group has acted as originator under a number of securitisation structures, both traditional and synthetic. The purpose of these securitisations is typically to diversify the sources of funding for the Group or to transfer credit risk. Information on the exposures securitised under these transactions, and which qualify for Pillar 1 derecognition, are provided in the tables in this Annex.

The Group has also purchased positions in securitisation transactions. These positions have been purchased in transactions where the individual notes were originally highly rated and benefited from strong credit enhancement provided by lower ranking notes. The purchased positions cover a broad range of asset classes including Commercial Mortgage-Backed Securities (CMBS), Residential Mortgage-Backed Securities (RMBS), Consumer loans and loans to Corporates/ SMEs.

The Group has not acted as a sponsor in any securitisation transactions.

Calculation of risk weighted exposure amounts

At 30 June 2024 the Group's securitisation positions were risk weighted in accordance with the hierarchy of approaches set out in Article 254 of the CRR.

For the Group's synthetic securitisations, the SEC-IRBA method was used to risk weight the securitisation positions with retained junior positions deducted fully from CET1. The Group has recognised significant credit risk transfer for these transactions pursuant to Article 245 (2) of the CRR.

The risk weighted exposure amounts for the Group's purchased positions are calculated using the SEC-ERBA approach. The Group's purchased positions are all held in the Banking Book. A supervisory deduction is taken from CET1 for purchased positions which otherwise would have attracted a 1250% risk.

Market risk

Bank of Ireland Group plc

As per Article 445 Disclosure of exposure to market risk, Table 6.1 shows the RWEAs for standardised market risk split between outright products, options and securitisation. The Group uses the Standardised approach for its assessment of Pillar 1 capital requirements for trading book market risk, using the prescribed regulatory calculation method. Risk weighted assets for market risk arise predominantly from interest rate risk on the trading book and foreign exchange risk.

Table 6.1 - EU MR1 - Market risk under the standardised approach

Interest Rate Risk in the Banking Book (IRRBB)

The Economic Value of Equity (EVE) measures the changes in the net present value of interest rate sensitive instruments over their remaining life.

The Net Interest Income measures the impact of interest earnings due to shifts in the interest rate environment. The following table shows the estimated sensitivity of the Group's net interest income (before tax) to an instantaneous and sustained 2-2.5% parallel movement in interest rates. The sensitivity assumes (i) an instantaneous and parallel movement in all interest rates, with a starting point of an ECB deposit rate of 3.75%; (ii) a static balance sheet; (iii) assets and liabilities whose pricing is mechanically linked to market or central bank policy rates reprice immediately; (iv) certain other assumptions including pass throughs to assets and liabilities. The sensitivities should not be considered a forecast of future performance in rate scenarios as they do not capture potential management action in response to unexpected changes in the interest rate environment. Net interest income sensitivities will change depending on interest rate starting point.

In the EVE metrics, equity is excluded from the cash flows as it is treated as an overnight maturing item. EVE and NII sensitivity is calculated under the regulatory EBA prescribed scenarios and uses standard key modelling and parametric assumptions set by regulatory guidelines. Table 7.1 below outlines the changes in the economic value of equity and net interest income in the period.

		Jun-	24	Dec-23

Liquidity risk

As per Article 451a(2), Table 8.1 below provides qualitative information on the LCR ratio.

Table 8.1 - EU LIQB - Qualitative information on LCR Disclosures.

The Group is principally funded via granular retail customer deposits which are the primary driver of movements in the LCR over the period. Customer Deposits are originated in the Group's core franchises in ROI and UK with the top 20 deposits representing c.3% of the Group's deposit base.

The Group expects to remain a substantially deposit funded institution with loan portfolios principally funded by granular retail customer deposits and modest term wholesale funding issuance primarily to meet the Group's MREL requirements.

The Group maintains a strong LCR ratio derived from deposit funding.

The Group's liquidity buffer is comprised primarily of unencumbered High Quality Level 1 Liquid Assets.

The Group has modest net derivative exposures which primarily relate to the hedging of its own interest rate & currency risk. The outflows related to derivative and other collateral requirements are primary potential outflows under the adverse market scenario included in LCR per Article 423(3) of Regulation (EU) No 575/2013.

The Group manages its liquidity by jurisdiction with separate liquidity centres for each:

• GovCo is the Group's principal operating entity and one of the Group's two liquidity centres incorporating BOIMB and all subsidiaries except BOI UK.

• BOI UK is the Group's UK regulated subsidiary and the second liquidity centre. As such, it is separately managed from a liquidity perspective though there are intragroup flows between the two entities with GovCo providing unsecured wholesale funding to BOI UK.

From an LCR perspective, the Group holds GBP denominated liquid assets sufficient to meet GBP denominated outflows.

23 Liquidity coverage ratio (%)					1 92.61%	191.20%	187.44%	196.33%

The Group calculates additional liquidity outflows corresponding to collateral needs resulting from the impact of an adverse market scenario on the Group's derivative transactions using the Historical Look Back Approach (HLBA) as guided by the EBA. In preparing the LCR, the Group recognises restrictions on the transferability of liquidity between jurisdictions with surplus liquid assets in one jurisdiction not transferable to another jurisdiction.

Liquidity risk

As per Article 451a(3), Table 8.3 below sets out the NSFR ratio detail of BOI Group.

Leverage ratio

The leverage ratio measures the level of Tier 1 capital against both on and off balance sheet exposures. As at 30 June 2024, the leverage ratio was 6.31% on a regulatory basis (31 December 2023: 6.42%).

The purpose of monitoring and managing this metric is to enable Regulators to constrain the build-up of excessive leverage, which was considered to be one of the drivers of the banking crisis.

Tables 9.1, 9.2 and 9.3 illustrate the leverage ratio calculated in accordance with Articles 429 and 499 of the CRR and a breakdown of the Group's leverage ratio exposure as at 30 June 2024 on a regulatory basis.

The European Commission has introduced a binding leverage requirement of 3%. The Group expects to remain well in excess of this requirement.

Leverage ratio exposures

As per Article 451(1), points (a) and (b) and Article 451(3) (taking into account, where applicable, point (c) of Article 451(1) and Article 451(2) CRR), Table 9.2 below provides a detailed breakdown of the components of the LR denominator, as well as information on the actual LR, minimum requirements and buffers. This information is on a transitional basis.

Table 9.2 - EU LR2 - LRCom: Leverage ratio common disclosure

ESG Risk

Bank of Ireland Group plc

As per Article 449a CRR, the following tabs cover the qualitative and quantitative information associated with Environmental, Social and Governance risks (ESG risks).

Previous Index Next	Previous	Index	Next	
---------------------	----------	-------	------	--

Table 1 - Qualitative information on Environmental risk in accordance with Article 449a CRR

w iber	Business strategy and processes
	Institution's business strategy to integrate environmental factors and risks, taking into account the impact of environmental factors and risks on institution's business environment, business model, strategy and financial planning
	Sustainability a core strategic pillar
	In 2023, sustainability was embedded as one of Bank of Ireland Group's three core strategic pillars, Sustainable Company, and we continued to turn our ambitions into action, delivering practical sustainability solutions that make a difference. Sitting below the Group's Sustainable Company pillar is our 'Investing in Tomorrow' Sustainability strategy. Our focus is on our material Environmental, Social and Governance (ESG) impacts and opportunities aligning to science and best practice, starting with the UN Sustainable Development Goals (SDG), the blueprint for a more sustainable future for all. Our Sustainability strategy and approach centres on three pillars: supporting the green transition, enhancing financial wellbeing and enabling our colleagues to thrive, supported by a number of foundational topics.
	Strategy The Group continues to make progress in achieving its objectives under its Sustainability strategy through the application of the Five-Point Action Climate Plan for the 'Supporting the Green Transition' strategic pillar.
	For further details on the Group's Five-Point Action Climate Plan, please refer to pages 17-18 of the Group's 2023 Annual Report.
	The Group conducts ongoing assessments of climate-related opportunities which informs our business plans and strategic approach to sustainable finance. The 2022 output of these assessments was factored into the Strategic refresh to 2025 announced in March 2023. In 2023, in preparation for the upcoming Corporate Sustainability Reporting Directive (CSRD), a refreshed materiality assessment, using the double materiality concept was conducted across environmental, social ar governance dimensions. The Double Materiality Assessment (DMA) will be further refined in 2024. These materiality assessment refreshes will continue to inform the Group's strategic direction and ensure that its Sustainability strategy continues to align with the views and needs of its stakeholders.
	In 2022, the Group set decarbonisation science-based targets (SBTs), validated by the Science-Based Targets Initiative (SBTi), that cover 76% of its lending portfolio, and have reported our progress against these targets for the first time in FY2023. In line with our decarbonisation ambitions, in 2023 we set targets for sustainable financing: c.€15 billion by 2025 and c.€30 billion by 2030. For further details on progress towards these targets, please see the Group's answer to (b) below.
	The Group ESG Risk Management Framework The Group recognises ESG factors (including climate-related risks) represent a common risk driver across the Group's Principal Risk types. The Group ESG Risk Management Framework sets out the approach to the management of ESG risk factors in the Group. ESG risk management is relatively immature across the industry and continues to evolve. Implementation to date, in the Group and across the industry, has largely focused on climate-related risk drivers. Informed by the 2023 materiality assessment this focus is expanding to include non-climate environmental risks.
	The Group has a detailed multi-year (2021-2024) Climate Risk Implementation Plan in place to address the ECB guidance on how banks should manage climate-related and environmental risks (November 2020). The guidance sets out expectations for institutions when formulating and implementing their business strategy, governance and risk management frameworks and disclosures.
	Integration of Environmental risks at a Group level
	The Group defines ESG factors as environmental, social or governance matters that may have a positive or negative impact on the Group and represent a common driver across the Group's Principal risk types. The Group defines ESG risks are risks that stem from the current or prospective impacts of ESG factors on the Group that, could cause an actual or potential material negative impact on: • the Group's earnings, franchise value or reputation; • the Group's regulatory standing; • the long-term sustainability of our customers' operations and financial wellbeing; and
	• the communities and environment in which we and our customers operate. Furthermore, in line with the ECB's guidelines on climate-related and environmental risks and the recommendations of the TCFD, the Group defines two key sub-categories of climate-related risks and environmental risks that impact our

(a) business. These are the risks associated with the transition to a low carbon economy and from climate-related physical events.

Per the Group's Risk Management Framework and its Group Risk Library, ESG risk factors such as climate-related risks are managed within the framework the Group has in place for its established risk types. Therefore, the Group is integrating the management of climate risk into its existing policies, controls, reporting and operating procedures, in accordance with the ECB guidelines on the management of climate and environmental-related risk.

The Group has dedicated resources Risk function in the Group Risk divis	s to lead the coordination of the Group's approach to ESG risk management, both in 1LOD (Group Sustainability function in the Group Finance division) and in 2LOD (Business, Strategic and Sustainabili sion).
Identification and assessment of	climate-related risks
Guided by the Group's ESG Risk Mount of the Group our mitigating actions, and next step	lanagement Framework, the Group is progressively embedding climate risk into the Group's key risk processes. We continue to improve how we assess climate risk drivers taking into account potential im os for each risk type.
In the Group's key planning process years).	s, the Internal Capital Adequacy Assessment Process (ICAAP), the potential impact of climate risk drivers is assessed for each key risk type over the short (< 3 years), medium (3-5 years) and long-term (
· · · · · · · · · · · · · · · · · · ·	for these risks was established in 2022 and has now been embedded into the Group's annual internal capital adequacy assessment process (ICAAP). This assessment is disclosed in our 2023 Sustainal climate-related risk impacts can be summarised as follows:
 Credit risk: Increased costs association through higher probability of default 	iated with physical and transition risks may impact financial soundness of households and businesses reducing their ability to service debt and impairing asset values, resulting in financial loss to the Grou and higher losses given default.
Business and Strategic risk: Long-	-term franchise impacts if strategic commitments are not achieved by the Group and the Group's product offering does not adapt to changing market dynamics.
 Operational risk: Physical risks cou 	uld impact continuity of the Group's operations or operations of its material suppliers, resulting in sustained disruption of the supply chain and ultimately our ability to service customers.
Conduct risk: Potential impact if fai	ilures in product design, market practice or customer engagement lead to greenwashing claims or poor customer outcomes.
Climate risk considerations are being	nal capital adequacy assessment process (ICAAP) og embedded in key processes where investment decisions and associated climate risks are material. The setting of Science Based Targets is ensuring that the Group's lending portfolios are aligned with t lignment mitigating and reducing transition risk over the period to 2030.
••••••	ss for the Group and facilitates the Board and senior management in identifying, measuring and monitoring the Group's risks and ensures that the Group holds adequate capital to support its risk profile. (h climate change, scenario analysis is considered a key tool to inform strategic direction and risk management.
its broader scenario analysis framew	ate to the standard ICAAP Base and Stress analysis that focusses on longer term impacts out to 2050, beyond the standard three year time horizon of ICAAP. We have integrated climate into the ICAAP work to assess the impacts of climate on different risk types (e.g. credit, business, operational, conduct and regulatory). The potential impact of transition and physical risk drivers is assessed for each key lium (3-5 years) and long-term (> 5 years). This scenario analysis informs climate risk materiality assessments to quantify the potential impacts across the Group's risk types that is integrated into the Group nt.
Objectives, targets and limits to a in the design of business strateg	assess and address environmental risk in short-, medium-, and long-term, and performance assessment against these objectives, targets and limits, including forward-looking informa y and processes
•	ciples for Responsible Banking (UNPRB), the Group has committed to aligning its strategy and processes with the Paris Agreement and is actively contributing to three specific Sustainable Development (i) SDG 7: Affordable and clean energy; (ii) SDG 11: Sustainable cities and communities; and (iii) SDG 13: Climate action.
•	the following: Istainability strategy 'Investing in Tomorrow', via periodic updates. Indations to the Board on the proposed short and long-term objectives, and ESG metrics and targets.
2023 updates on key targets and lim	nits set as part of the Group's Five-Point Action Climate Plan are as follows:
Science Based Targets (SBTs)	
targets. The Group has set a target of 48% reduction in mortgage portfolio	30 greenhouse gas emission reduction targets were formally validated by the SBTi. Targets validated by SBTi cover the Group's own operations and 76% of its loan book, with 2020 as base year for the of a 49% reduction in greenhouse gas emissions from its own operations (Scope 1 and 2) by 2030. Reduction targets have also been set for emissions arising from the Group's lending activities (Scope 3 emissions (Ireland & UK) and a 56% reduction in commercial real estate portfolio emissions by 2030, which are consistent with the levels required to meet the goals set by the Paris Agreement. In addition portfolio will have SBTi-validated targets by 2025.
0	agement's expectations and is reflective of progress at a national level in terms of decarbonisation and the early stage of the Group's Sustainability strategy implementation. By FY2023 we have achieved rget and over 90% of 2025 target for long-term corporate lending:
Science Based Targets Progress Re	eport FY2023
1	

Absolute Scope 1 & 2 emissions (Green - down 42% versus 2030 target reduction of 49%)
Sourcing renewable electricity (Green - c.100% versus 2025 target of 100%)
Lending decarbonisation: Emissions intensity reduced across:

Residential Mortgages (Amber - down 6% versus 2030 target reduction of 48%)
Commercial Real Estate (Amber - down 11% versus 2030 target reduction of 56%)
Electricity Generation Project Finance (Green - down 28%% versus 2030 target reduction of 63%)
SBT lending coverage:

% Corporate customer base to have set SBTs when weighted by emissions

(Green - up 23% versus 2025 target of 25%)
% Corporate bons to have set SBTs when weighted by investment value
(Amber - up 7% versus 2025 target of 25%)

(b) Our progress is benchmarked against convergence pathways that in general reflect a linear progression to the targets. Where our progress to date is ahead or in line with the convergence pathway, we have assigned a green RAG rating. Where our progress is lagging the convergence pathway, we have assigned an amber RAG rating as we deem the lag to be recoverable by the target date. As property retrofit activity and the anticipated effect of our strategic interventions increase, reductions are expected in the medium term, with the full impact of decarbonisation of the energy grid expected in the back end of the decade. For further details on progress against each target please refer to pages 13-17 of the Group's 2023 Sustainability Report.

The achievement of these targets is informing our strategic interventions in terms of portfolio management, credit policy products and customer engagement and credit policy. By using these targets to align our lending portfolios to the Paris Agreement, the SBTs can help mitigate the climate-related credit risks associated with the green transition and ensure that we can address the opportunities to support the transition with measurable impact.

•Own operations:

Sustainable Finance Targets

We are at the heart of the movement towards sustainability in Ireland, particularly in supporting the green transition in line with Ireland's Climate Action Plan. Our goal is to help our customers adapt to this change. A key part of our commitment is to develop financial products that support the transition. This aligns with our dedication to the UNPRB.

Our range of sustainable finance products is carefully designed to help our customers make real, impactful changes. This includes green mortgages, loans for eco-friendly cars, and business loans for small and medium-sized enterprises (SMEs) and farmers, focusing on renewable energy, capital expenditure, and sustainability-linked lending. This year, we introduced the innovative Enviroflex loan, a new funding option for farmers to encourage sustainable farming practices. In H1 2024 we published our Sustainable Finance Framework to provide transparency to our stakeholders on our approach to Sustainable Financing. Within this framework, we are disclosing the criteria we are using to classify financial commitments and products as sustainable. For the latest information on our product offerings and supports please refer to pages 18-24 of the Group's 2023 Sustainability Report.

As part of our commitment to the Green Transition, we are constantly reviewing and expanding our range of Sustainable Finance solutions and in 2024 we launched the EcoSaver Mortgage, which is representative of the practical and meaningful product interventions we are taking for our customers across key sectors and highlights the collaborative partnerships central to our ecosystem approach. The EcoSaver Mortgage is available to new customers and also to existing customers who move to the new product from another Bank of Ireland mortgage product. In addition, customers with EcoSaver Mortgage will be rewarded for energy upgrades made to their property, with each EPC (Energy Performance Certificate) improvement bringing a larger discount to the EcoSaver rate. An online hub helps customers understand their current energy rating, as well as the work required and costs to achieve a better EPC. An online retrofitting calculator shows the cost of retrofitting and the potential savings due to lower EcoSaver mortgage rates. Bank of Ireland has partnered with SSE Airtricity to provide EPC assessments to its customers, as well as assessments of works, quotes and home retrofitting services via their one stop shop.

Our approach to sustainable finance supports meeting our SBTs by reducing the greenhouse gas emissions that our business finances. With this science and policy-based approach, we can focus our resources where it matters to support credible action. We offer a growing portfolio of sustainable financing products and services, supported by our Green Bond programme. Through these offerings, we seek to not only align with the national climate action plans in both Ireland and the UK, as well as the Paris Agreement, but also to provide tangible benefits to our customer base in a more sustainable way.

In line with our ambitions, in 2023 we set targets for sustainable financing: c.€15 billion by 2025 and c.€30 billion by 2030. We've made significant strides towards these goals and are on track to meet our targets. By the end of 2023, our sustainable finance portfolio grew by c.35% in the year, reaching c.€11.1 billion. At the end of H124 ee have now provided sustainable finance of c.€12.5 billion, which represents an increase vs H123 of 24%.

The Group has a Sustainability Exclusion list that sets out its ESG risk appetite for lending to potentially sensitive sectors which the Group believes cause environmental and/or social harm to society and the community. In addition during 2023, the Group Limits on property energy ratings across its Commercial Real Estate and Buy to Let Residential Real Estate portfolios, with these credit policy amendments supportive of both the national agenda to retrofit existing property stock and the Group's decarbonisation Science Based Targets.

The Group has an Environmental Policy that is reviewed annually as part of the ISO 14001 Environmental Management System certification process. which the Group is currently certified against. Current investment activities and (future) investment targets towards environmental objectives and EU Taxonomy-aligned activities

Under the 'Supporting the Green Transition' pillar of the Group's Sustainability Strategy, we commit to 'providing sustainable finance' as one of the focus areas of our Five Point plan. To help realise this, in March 2023, as part of our Strategic refresh, the Group announced sustainability-related finance targets of €15 billion by 2025 and €30 billion by 2030.

By the end of 2023, our sustainable finance portfolio grew by c.35%, reaching about €11.1 billion. At the end of H124 ee have now provided sustainable finance of c.€12.5 billion, which represents an increase vs H123 of 24%. We are on track to meet our targets, thanks in part to the popularity of our green mortgages, which represented c.50% of all new mortgage lending in the Republic of Ireland in 2023. Additionally, we have seen considerable annual growth in financing for renewable energy projects and electric vehicles in Ireland. The Sustainability-Linked Loan amounts disclosed in the table below are the drawn figures.

Sustainable Finance All figures €bn GCA – Gross Carrying Amount

		FY2023 H1	2024
	Total	€11.1bn €1	2.5bn
	Of which		
(-)	Rol Green Mortgages	€6.5bn €	7.4bn
(c)	UK Green Mortgages	€1.3bn €	1.3bn
	Green CRE	€1.7bn €	1.9bn
	Renewables Project Finance	€0.3bn €	0.3bn
	Electric Vehicles	€0.1bn €	0.2bn
	Sustainability-Linked Loans	€1.2bn €	1.4bn

The Group has disclosed its EU Taxonomy Green Asset Ratio (GAR) KPIs for the first time in our 2023 Annual Report on pages 42-44. It should be noted that for this first round of disclosures we have taken a conservative application of the qualifying criteria underpinning the GAR based on the guidance provided to date and currently available data. Due to these current limitations across the industry changes in this ratio in future reporting periods will be driven in part by increased data availability.

Given these current limitations and the recency of implementation the Group has not yet set targets for EU Taxonomy-aligned activities. The adoption of CSRD and European Sustainability Reporting Standards (ESRS) will support the further

implementation of the EU Taxonomy Regulation into our business strategy, systems, and investment and lending processes.

Policies and procedures relating to direct and indirect engagement with new or existing counterparties on their strategies to mitigate and reduce environmental risks

The Group has put in place specific procedures outlined in its Corporate and Business Banking ESG Risk Lending Procedures for engaging with its customers. Credit submissions and review papers are required to critically assess environmental risk factors and their impact on the financial condition of the borrowers and are addressed in the same context as any business risk or financial input. The Group requires credit submissions to explicitly comment on a borrower's ESG policies, how it is incorporated into its strategic objectives and whether these are measured and evidenced. The Group acknowledges that each industry has its own specific ESG risk factors with varying impacts on borrowers, and relationship managers apply their analysis commensurate with the challenges identified. This adds relevance where a sector appears more vulnerable and potentially faces material costs associated with transitioning to achieve wider ESG objectives. For new business/corporate customers, the Group examines environmental considerations as part of its customer onboarding due-diligence process. This process is also conducted on an annual basis for existing customers.

In addition during 2023, the Group set limits on property energy ratings across its Commercial Real Estate and Buy to Let Residential Real Estate portfolios, with these credit policy amendments supportive of both the national agenda to retrofit existing property stock and the Group's decarbonisation Science Based Targets.

(d)

(e)

(

As the Group continues to further review and update its credit risk policies and procedures, it has rolled out specific sustainability training programmes based on a multi-level curriculum to deliver core, foundational sustainability training to all colleagues as well as more targeted and technical skills development for select groups. Training solutions are tailored across three colleague cohorts at (1) All-Colleague, (2) Divisional; and (3) Board and Leadership levels to meet the different training outcomes being targeted. This includes all colleague training on climate concepts and processes, as well as role specific training on sustainable finance and ESG risk management tailored to the various customer facing divisions. This customer facing training covers key activities such as ESG risk management and sustainable finance, as well as sectoral deep dives on key transitional sectors such as Food & Agri, Energy and Real Estate.

In addition the Group has a Code of Supplier Responsibility which outlines its expectations of their suppliers across human rights, health and safety, supply chain, inclusion and diversity, business integrity, doing business responsibly and environmental and energy management. The Group ensures suppliers' compliance with its Code through the Financial Supplier Qualification System (FSQS) process.

Governance

Responsibilities of the management body for setting the risk framework, supervising, and managing the implementation of the objectives, strategy, and policies in the context of environmental risk management covering relevant transmission channels

ESG Governance

Sustainability at Board-level

The Board is collectively responsible for the long-term sustainable success of the Group and for ensuring there is a strong corporate structure in place, which is aligned with the Group's strategy and purpose. It provides leadership of the Group, setting strategic aims, within the boundaries of the Group's risk appetite and a framework of prudent and effective controls.

Responsibilities in respect of Sustainability and ESG strategy are delegated to the Group Sustainability Committee (GSC), which, jointly with the Board Risk Committee (BRC), is also responsible for ensuring ESG risks have been integrated into the Group Risk Management Framework.

Group Sustainability Committee (GSC)

On behalf of the Board, the GSC oversees the development and implementation of the Group's Sustainability strategy and, together with the BRC, oversees related risks, including monitoring the Climate Risk Implementation Plan. As part of that role, the GSC oversees progress against ESG targets, review of ESG-related commitments and the publication of the Sustainability Report.

Board Risk Committee (BRC)

On behalf of the Board, the BRC is responsible, jointly with the GSC, for inter alia ensuring that ESG risks are integrated into the Risk Management Framework.

Group Audit Committee (GAC)

On behalf of the Board, the GAC is responsible for inter alia monitoring the quality and integrity of the financial statements, including sustainability disclosures. The level of GAC involvement in sustainability related matters is intended to increase over the course of 2024, given enhanced disclosure requirements under CSRD.

Group Executive Committee (GEC)

The most senior executive committee in the Group, the GEC, acts in an advisory capacity to the CEO and assists the CEO in the management and leadership of the Group on a day-to-day basis. The GEC has overarching responsibility for delivery and operationalisation of the Group's Sustainability strategy, with specific executive responsibility for sustainability (including climate change) delegated to the Chief Sustainability and Investor Relations Officer (CSIRO), who reports to the Group Chief Financial Officer (CFO). Members of the GEC include the CFO, Divisional CEOs and the Chief Risk Officer (CRO).

Executive Risk Committee (ERC)

The ERC supports both the GEC and the BRC, in overseeing the material risks of the Group, taking a holistic approach to overseeing the effective management of risk, including climate and environmental risks.

Sustainability Decision Group (SDG)

The SDG brings together senior business and functional management across the Group to enable a coordinated approach to sustainability objectives across the 3 pillars and to provide a discussion and decision making forum to deliver on the Group's sustainability agenda. The SDG is chaired by the CSIRO and regularly updates the GEC on progress against key initiatives.

The Board continued to oversee the progress on the Group's sustainability strategy, targets, risk management, resourcing and disclosures. In addition, the Board monitored the Group's identification and management of climate-related risks. Methods used included our risk identification and assessment processes, integration into the Internal Capital Adequacy Assessment Process (ICAAP) and ESG and climate risk reporting.

Terms of reference for the GSC and BRC are available on the Group website.

Divisional and Subsidiary ESG Working Groups

Divisional and Subsidiary ESG Working Groups

All materially impacted business divisions and businesses have in place dedicated ESG leads and ESG working groups to ensure ESG strategy and operational aspects are integrated into the Group's business model.

ESG Risk Working Group

The ESG Risk Management Framework sets out the approach to the management of ESG risk factors in the Group. Coordinated by Group Risk, the ESG risk working group brings together Second Line of Defence (2LOD) risk management from across the principal risk types (with representation from the First Line of Defence (1LOD Sustainability team) to ensure there is a coordinated, cohesive and challenging approach to the management of ESG risks (including climate-related and wider ESG risks) within the Group.

The Board comprises of 11 Directors: 2 Executive Directors, the Chairman and 8 independent Non-Executive Directors (NEDs). For further information on the number of directorships, including external directorships, held by the Group's Board, please refer to page 79 – 84 in the Annual Report 2023. The Group Nomination & Governance Committee undertakes a rigorous and transparent procedure when considering candidates for appointment to the Board and maintains oversight of the Board's composition to ensure it remains appropriate.

	Management body's integration of short-, medium- and long-term effects of environmental factors and risks, organisational structure both within business lines and internal control functions
	The Board monitors the Group's identification and management of climate-related risks. Methods used include our risk identification and assessment processes, integration into the Internal Capital Adequacy Assessment Process (ICAAP) and
	ESG and climate risk reporting. The Group's oversight and management responsibilities in relation to our Sustainability and climate commitments in 2023 are outlined on page 24 of the 2023 Annual Report. The Group has continued to increase its understanding of the risks and opportunities that climate change and environmental risks presents to our business strategy. In Q4 2023, we conducted an assessment involving business leaders and
	subject matter experts from across the Group to assess the materiality of climate change and environmental risk drivers on different risk types (e.g. credit, strategic, operational, conduct and regulatory). The potential impact of climate transition and physical risk drivers is assessed annually for each key risk type over the short (< 3 years), medium (3-5 years) and long-term (> 5 years) in the ICAAP process. An overview of key risk types is set
	out on page 31-32 of the 2023 Annual Report.
(f)	The Group recognises ESG factors represent a common risk driver across the Group's Principal Risk types. The Group ESG Risk Management Framework sets out the approach to the management of ESG risk factors in the Group, which is aligned with the approach to risk management in the Group Risk Management Framework. Co-ordinated by Group Risk, an ESG Risk Working Group brings together second line of defence risk management from across the Principal Risk types (with representation from the Group first line of defence) to ensure that there is a coordinated, cohesive and challenging approach to the management of ESG and climate-related risks within the Group.
	Per the Group's Risk Management Framework and its Group Risk Library, ESG risk factors such as climate-related risks are managed within the framework the Group has in place for its established risk types. Therefore, the Group is integrating the management of climate risk into its existing policies, controls, reporting and operating procedures, in accordance with the ECB guidelines on the management of climate and environmental-related risk. •First Line of Defence (1LOD): The business divisions or functions taking on risk have the primary responsibility for managing the risk generated by their actions and this includes managing ESG factors. •Second Line of Defence (2LOD): 2LOD has the responsibility for ensuring the ESG risk factors are considered when executing second line responsibilities as set out in the Group Risk Management Framework. This includes consideration as part of policy setting and taking reasonable steps to ensure the Group does not suffer outcomes outside of Risk Appetite. •Third Line of Defence (3LOD): 3LOD is responsible for ensuring the first and second lines of defence assess whether all significant risks are identified and appropriately reported by management to the executive and board of management, as well as assessing whether risks are adequately controlled.
	Integration of measures to manage environmental factors and risks in internal governance arrangements, including the role of committees, the allocation of tasks and responsibilities, and the feedback loop from risk management to the management body covering relevant transmission channels
(g)	Refer to the Group's answers to: (a) above for details on the Group's Board tasks and responsibilities in managing environmental factors and risks within internal governance arrangements.
	(e) above for details on the Group's organisation of Board committees (BRC and GSC) related to environmental risk and allocation of tasks and responsibilities within those committees to monitor and manage environmental risk. The Group has a reporting line between the BRC, GSC and the Board covering environmental factors and risks. The GSC and BRC receive quarterly updates related to environmental risks and the Board receives monthly updates via the Board Risk Report. The BRC/GSC holds a joint meeting on at least an annual basis and the Board is updated accordingly on ESG Risk.
	Lines of reporting and frequency of reporting relating to environmental risk
	There is Board-level oversight of climate-related risks within the Group, provided by the Board and its GSC and BRC. The Board, GSC and BRC are supported by: - Sustainability and climate advisory forums comprising the Sustainability Decision Group and the ESG Risk Working Group - Sustainability and climate executive oversight is provided by the GEC and the Executive Risk Committee (ERC) For further details on the Group's governance arrangements, please refer to the Group's TCFD report (page 24) in the Annual Report 2023. For further details on internal reporting frequency, refer to the Group's answers to (a) and (g) above.
(h)	The Board Risk Report (BRR) is used by the Group to review and monitor the Group's risk profile across all Principal risks, compliance with risk appetite and risk policies. ESG risk in the Group is reported on through the BRR on a monthly bas and is the primary source of reporting for the impact of ESG related risks on the Group's risk profile. Key risk metrics on the lending portfolio are monitored by the Group Sustainability Committee on a quarterly basis aligned to Pillar 3 ESG Reporting to ensure transparency and comparability.
	In addition Climate KPI and Risk Management Reporting is also provided to the GEC and GSC on a quarterly basis, with the reporting also considered by the Board Risk Committee (BRC) as part of joint sessions of the GSC/BRC. This facilitates key risk metrics on the lending portfolio to be monitored by the Board on a quarterly basis, aligned to Pillar 3 ESG Reporting to ensure transparency and comparability. These include the following key metrics on the credit lending portfolio including credit concentrations: -Credit concentrations to sectors most sensitive to climate change; -The energy efficiency profile of property lending portfolios (RRE and CRE); -Geographical credit concentrations exposure to physical climate risks; -Emission reduction progress against Science Based Target pathways; and -Sustainable Finance Lending Volumes progress against Strategic Targets.
	Alignment of the remuneration policy with institution's environmental risk-related objectives
	In November 2022, the Irish Government announced that a number of crisis-era restrictions related to remuneration were being lifted in respect of the Group, including the blanket prohibition on variable pay. Reintroducing an element of variable pay will allow us to better link remuneration to delivery for customers and the achievement of our long term strategic and commercial goals.
(i)	As announced in the Group's strategy refresh in March 2023, 'Sustainable Company' is now one of the core strategic pillars of the Group, of which supporting wider society is a key focus area. With 'Sustainable Company' now a core strategic
	pillar, ESG is mainstreamed into our performance management system. The Group introduced a performance-related Profit Share Scheme which will see colleagues rewarded based on both the financial and operating performance of the company and individual performance during 2023. The appropriateness of the annual profit share is assessed against a mix of financial and non-financial criteria, including profit and related metrics, affordability, customer, and ESG, with the pool as a whole subject to risk adjustment. Environmental criteria include progress on our Green Transition strategic targets. The appropriateness of the final profit share will be assessed against a mix of financial and non-financial criteria, including profit and related metrics, affordability to risk adjustment.
	Risk management Integration of short-, medium- and long-term effects of environmental factors and risks in the risk framework
(j)	On an ongoing basis, through its risk management frameworks and processes, the Group identifies and assesses risks to which the Group is exposed to, including climate risks. Due to the longer timeframes associated with climate impacts, a short, medium, and long-term horizon, as referenced in (e) above, is being applied to the consideration of impacts.
	The Group continues to embed climate-risk considerations into key risk reporting, as referenced in (g) above.
	Definitions, methodologies and international standards on which the environmental risk management framework is based
	The Group ESG Risk Management Framework This framework sets out the approach to the management of ESG risk factors in the group. ESG risk management is relatively immature across the industry and continues to evolve. Implementation to date, in the Group and industry, has largely focused on climate-related risk drivers. During 2023, the focus of ESG risk management in the Group has expanded to include non-climate environmental risks.
(k)	Our strategic commitment to supporting our customers' green transition is underpinned by our management of the risks associated with climate change. We do this by embedding climate-related impacts in key decision making processes.
	The Group has a detailed multi-year (2021-2024) Climate Risk Implementation Plan in place to address the ECB guidance on how banks should manage climate-related and environmental risks (November 2020). The guidance sets out expectations for institutions when formulating and implementing their business strategy, governance and risk management frameworks and disclosures. Execution of the plan has seen the Group progressively aligning to the ECB guidelines, embedding climate risk and ESG considerations in business and risk management processes in line with the Board approved plan
	Processes to identify, measure and monitor activities and exposures (and collateral where applicable) sensitive to environmental risks, covering relevant transmission channels
	Supporting the green transition also requires the Group to assess its own resilience to climate change. To address this requirement, the Group is taking steps to develop scenario analysis and stress testing capabilities in-line with emerging industry methodologies. Forward-looking climate scenarios are being used to manage climate-related risks and explore the resilience of the Group to physical and transition risks. We have further built on initial methodology developments and in 2023 developed scenarios internally to assess these impacts. As these methodologies continue to develop, we will be progressively drawing on our scenario analysis to inform our corporate strategy, business model and financial plans.
	During 2023, we continued to develop and test scenario analysis methodologies to quantify the potential impact of climate related risks across our commercial and retail customer lending portfolios from transition and physical risk drivers. Climate scenario analysis is integrated within the ICAAP in order to increase our understanding and insights into the potential impacts of climate risk.
	The ICAAP is a key planning process for the Group and facilitates the Board and senior management in identifying, measuring and monitoring the Group's risks and ensures that the Group holds adequate capital to support its risk profile.
	We have integrated climate into the ICAAP and its broader scenario analysis framework to assess the impacts of climate on different risk types (e.g. credit, business, operational, conduct and regulatory). The potential impact of transition and physical risk drivers is assessed for each key risk type over the short (< 3 years), medium (3-5 years) and long-term (> 5 years). An overview of key risk types is set out on page 31-33 of the 2023 Group's Annual Sustainability Report.
	The Group has continued to increase its understanding of the risks and opportunities that non-climate environmental risks presents to our business strategy. In Q4 2023, the Group conducted an initial Double Materiality Assessment (DMA) as part of the Group's CSRD preparations. We conducted an assessment involving business leaders and subject matter experts from across the Group to assess the materiality of climate change and environmental risk drivers on different risk types (e.g. credit, strategic, operational, conduct and regulatory). The DMA will be further refined in 2024.

Classified as Public (Green)

(I)

	In addition Climate KPI and Risk Management Reporting is also provided to the GEC and GSC on a quarterly basis, with the reporting also considered by the Board Risk Committee (BRC) as part of joint sessions of the GSC/BRC. This facilitates key risk metrics on the lending portfolio to be monitored by the Board on a quarterly basis, aligned to Pillar 3 ESG Reporting to ensure transparency and comparability. These include the following key metrics on the credit lending portfolio rotuling credit concentrations: -Credit concentrations to sectors most sensitive to climate change: -The energy efficiency profile of property lending portfolios (RE and CRE); -Geographical credit concentrations exposure to physical climate risks; -Emission reduction progress against Science Based Target pathways; and Sustainable Finance Lending Volumes progress against Strategic Targets. In terms of portfolio mix, the Group's 2023 Annual Report shows the current composition of our commercial lending portfolio and the percentage of lending to sectors the Group considers most sensitive to climate change. This assessment also highlights that the Group's direct exposure to fossii fuels and to commercial lending segments with high emissions is relatively low (with the exception of the agricultural sector, which due to its specific challenges will require broader support in which we will play an active role. This year, we continue to roll out across the sector the innovative Enviroffex loan, a new funding option launched in 2023 for farmers to encourage sustainable farming practices. In terms of the Group's property lending portfolios the energy efficiency of the property stock is monitored quarterly — see table on page 34 of the Group's 2023 Annual Report. Quarterly monitoring of physical risks is also conducted with a property level assessment of property collateral exposure to heightened flood risk - see pages 35-36 of the Group's 2023 Annual Report.
	Activities, commitments and exposures contributing to mitigate environmental risks
(m)	The Group's key risk miligation strategy is as follows: (i) The Group has committed to Science Based Targets aligning our lending portfolios on a pathway to the Paris Agreement and reducing the carbon emissions that we finance. This portfolio alignment will additionally build resilience against climate-related risks as we progressively embed climate-related considerations into our lending strategies: and (ii) The Group has committed to supporting our customers' transition to the green economy with sustainable financing to improve the energy efficiency of their properties, vehicles and business operations and adapting to climate change. In 2022, the Group's 2030 greenhouse gas emission reduction targets were formally validated by the Science Based Targets initiative (SBTI). For more information, refer to (b) above. The Group finances the development of renewable energy assets, green mortgages, sustainable transport, and the national decarbonisation agenda that aligns with the SDGs identified in (b) above. The Group has aligned its lending strategy, which includes the Sustainability Exclusion List, to minimise its exposures to environmental high-risk sectors. In addition during 2023, the Group's decarbonisation Science Based Targets. The Group continues to develop methodologies to enable climate and environmental risk to be actively measured and monitored in a similar manner to other key risk types. These methodologies are being developed collaboratively with peer institutions through engagement in industry initiatives (such as the UNEP FT ICFD Working Group and climate-focused European Banking Federation Working Groups). The Group has continued to increase its understanding of the risks and opportunities that non-climate environmental risk presents to our business strategy. In Q4 2023, we conducted an assessment involving business leaders and subject matter experts from across the Group to assess the materiality of climate change and environmental risk drivers on different risk types (e.g. credit, strategi
	This assessment was undertaken as part of our preparation for our first CSRD compliance report for 2024, using a Double Materiality (DMA) assessment approach which takes both an "inside-out" approach (i.e. Impacts (I) that the Group has on sustainability matters) and an "outside-in" approach (i.e. Risks (R) and Opportunities (O) that may be generated by sustainability matters that can have financial effects on the Group). The DMA will be further refined in 2024. To progress further action on nature, through 2023, we participated in several key initiatives to help us improve our understanding of our impacts, dependencies, risks and opportunities. This included participation in the Taskforce for Nature-Related Financial Disclosures (TNFD) Forum, the Partnership for Biodiversity Accounting Financials (PBAF), and the UNPRB Nature Target setting working group. We were also one of six inaugural partner organisations that supported the development of the first Irish Business and Biodiversity Platform.
	The Group has integrated climate KPIs in its strategic planning framework to ensure its progress against objectives laid out under the Sustainability strategy is measurable.

These activities form the foundation of the Group's future risk analysis and target setting activities, leading to mitigation activities to help reduce future environmental risks to the Group, as well as to improve the Group's impact on the external environment.

(n)	Implementation of tools for identification, measurement and management of environmental risks In identifying, measuring and managing environmental risk, the Group uses the following tools: -Scenario Analysis - Given the long time horizon associated with climate change, scenario analysis is considered a key tool to inform strategic direction and risk management. The Group is developing scenario analysis capabilities on an iterative basis, leveraging improvements in climate data and methodologies as they become available. Climate scenario analysis is integrated within the ICAAP process in order to increase our understanding and insights into the potential impacts of climate riskTransition Pathways – Our decarbonisation Science Based Targets are independently validated based on their alignment to internationally recognised transition pathways. We RAG rate our progress towards our targets based on these transition pathways as a key assessment tool of our level of progressThird Party Data Models – We integrate third party data sources and models to ensure coverage and insight on key climate risk factors including physical risks, primarily flood risk and transition risk – company emissions and property energy ratingsCredit Procedures - Corporate and commercial lenders are required to implement the requirements of the ESG screening process and incorporate ESG and climate change as a key credit risk which should be formally noted / documented where applicable in the credit rating and application process in the same way as other credit risks relevant to a transaction are highlighted and mitigants detailedThrough our membership of the Financial Supplier Qualification System (FSQS), our on-line portal enables suppliers to submit environmental information and compliance data about their organisation.
(0)	Results and outcome of the risk tools implemented and the estimated impact of environmental risk on capital and liquidity risk profile See response to (I) above which addresses how we have integrated climate into the ICAAP and its broader scenario analysis framework to assess the impacts of climate on different risk types. For each Principal risk type the potential impact of transition and physical risk drivers is assessed for each key risk type over the short (< 3 years), medium (3-5 years) and long-term (> 5 years), with materiality categorised across four buckets (Negligible; Low; Moderate; and Significant). An overview of key risk types is set out on page 32-33 of the Group's 2023 Sustainability Report. The impact on capital adequacy is from the risk of increased capital depletion from the aggregated impact of climate risks across the Group's other Principal risks. It is categorised as significant and is incorporated into the quantitative assessment of the Group's capital adequacy under the ICAAP Economic Perspective. Climate risk scenario analysis for funding & liquidity risk integrated into the Group's internal liquidity adequacy assessment process (ILAAP) as well as the ICAAP. The Group's liquidity risk profile does not include instruments where climate concerns may significantly impact funding and liquidity pools. Based on ongoing scenario analysis, impact materiality is classified as negligible.
(p)	Data availability, quality and accuracy, and efforts to improve these aspects Given the criticality of data to the climate risk management agenda, a multi-year data and technology roadmap was developed as part of the 2022 planning cycle to support delivery of the data needed to meet the evolving requirements on an agile and iterative basis. The roadmap saw an initial focus in 2022 on aggregating a golden source of data to support upcoming external and regulatory reporting requirements and to support progressive enhancements to risk management methodologies and reporting. Third party data has been onboarded from Moody's and JBA Risk Management to provide data insights on physical risks, including flood risk assessments across residential and commercial property in the Republic of Ireland and the United Kingdom. Modelled estimates by ICE Data Services on emissions and transition risk impacts have been integrated during 2023 to supplement internal data collection and analysis on the Group's portfolios. This developing capability was strengthened further in 2023 with the development focus moving to integrate ESG/climate data in front-end systems to aid credit and pricing decisions and support customers' transition plans. Climate KPI and Risk Management Reporting is centrally produced on a quarterly basis by the Group Sustainability function within Group Finance, with internal reporting definitions and data structures aligned to external Pillar 3 ESG Reporting to ensure transparency and comparability. This centralised reporting dataset also forms the basis for forward looking scenario analysis to assess climate and environmental risk drivers. The Group is continually developing its capabilities in this space given the expanding data requirements to meet the needs of stakeholder and the Group's reporting obligations under CSRD. As part of our preparation for our first CSRD compliance report for 2024, the results of the Double Materiality assessment (DMA) undertaken in Q4 2023 is shaping our future ESG data c
	Description of limits to environmental risks (as drivers of prudential risks) that are set, and triggering escalation and exclusion in the case of breaching these limits The Group's Corporate & Commercial Banking division has published a Sustainability Exclusion List that sets out the Group's risk appetite for lending to potential environmentally sensitive sectors. This List applies to all new lending and

customer service arrangements ensuring that the Group does not provide financing to customers who are deemed to engage in a defined list of excluded business activities. Any cases considered a heightened ESG risk during initial review will be subject to 'Enhanced Review' and will be considered by an ESG Risk Forum in addition to Corporate & Commercial Credit. The Group embeds these exclusions at the origination stage to ensure that these criteria continue to evolve in line

(q) with the Group's Sustainability strategy.

The Group has aligned its Screening Criteria to its Sustainability Exclusion List. For further details on this process and its governance arrangements, please refer to the Group's disclosure in Governance Risk Template. In addition during 2023, the Group set limits on property energy ratings across its Commercial Real Estate and Buy to Let Residential Real Estate portfolios, with these credit policy amendments supportive of both the national agenda to retrofit existing property stock and the Group's decarbonisation Science Based Targets. Any breaches to these restrictions are escalated in the same manner as any credit exception as set out in the Group's Risk Management Framework.

	Description of the link (transmission channels) between environmental risks with credit risk, liquidity and funding risk, market risk, operational risk and reputational risk in the risk management framework
	Both transition and physical risks can affect the creditworthiness of our customers and the stability of our lending portfolios, as well as the value of assets in the medium to long term. These climate risk drivers can intensify risks to the Group, impacting across existing key risk categories including, but not limited to:
	 Credit risk: Increased costs associated with physical and transition risks may impact financial soundness of households and businesses reducing their ability to service debt and impairing asset values, resulting in financial loss to the Group through higher probability of default and higher losses given default.
	Business and Strategic risk: Long term franchise impacts if strategic commitments are not achieved by the Group and the Group's product offering does not adapt to changing market dynamics
(r)	 Operational risk: Physical risks could impact continuity of the Group's operations or operations of its material suppliers, resulting in sustained disruption of the supply chain and ultimately our ability to service customers. Conduct risk: Potential impact if failures in product design, market practice or customer engagement lead to greenwashing claims or poor customer outcomes.
	Climate risk can also have reputational impacts if the Group fails to meet investor, customer, community and regulatory expectations.
	On an ongoing basis, through its risk management frameworks and processes, the Group identifies and assesses risks to which the Group is exposed. The Group ensures appropriate identification of risk through both top-down and bottom-up risk identification processes. A standard risk library is used to define all of the Group's risks in a consistent manner. Principal Risks are the highest-level categorisation used to assist with identifying, assessing, monitoring and mitigating risks to which the Group is exposed. ESG factors represent a common risk driver across the Group's Principal Risk types. The Group ESG Risk Management Framework sets out the approach to the management of ESG risk factors in the Group.

day-to-day spending, stay in control of their finances, and enhance their financial wellbeing.

	Business strategy and processes
	Adjustment of the institution's business strategy to integrate social factors and risks taking into account the impact of social risk on the institution's business environment, business model, strategy and financial planning
\$	Strategy and processes
ŀ	As noted above, social factors have been considered within the Group's Sustainability strategy. The Group's Sustainability strategy takes into account changes in technology, business, environmental and stakeholder preferences, reflecting key social factors, under the 'Enhancing financial wellbeing', 'Enabling colleagues to thrive' and 'Foundations' pillars.
ŀ	The activities below demonstrate the ongoing implementation of the Group's Sustainability strategy to integrate social factors and risks. In addition the Group conducted an initial Double Materiality Assessment (DMA) in the second half of 2023 as part of the Group's CSRD preparations. The DMA will be further refined in 2024. The results will also help inform our continuing actions on social factors and risks in addition the Group inform our continuing actions on social factors and risks. In addition the Group conducted an initial Double Materiality as the second half of 2023 as part of the Group's CSRD preparations. The DMA will be further refined in 2024. The results will also help inform our continuing actions on social factors are risks thereby ensuring our strategy implementation continues to support the requirements of our stakeholders and society.
	'Enhancing financial wellbeing':
•	•Fostering financial inclusion – The Group's ambition is to ensure inclusive and effective access to products and services for priority groups, striving to leave no one behind on the journey to financial health • Improving financial literacy and capability – The Group's ambition is to empower people (including colleagues) with the knowledge and skills to help improve their financial literacy and capability which are key building blocks on the journey to financial health.
•	• Building a more financially resilient and confident Ireland - The Group's ambition is to increase the number of customers and colleagues who have the resilience to withstand the financial impact of an unexpected day-to-day expense or a major life event.
4	'Enabling Colleagues to Thrive':
•	Build a future ready workforce - An essential part of our people strategy is developing growth skills and capabilities.
	 Create a differentiated colleague experience - We continue our journey to be an employer of choice through leading edge colleague supports, flexibility and an enhanced reward proposition. Simplify our ways of working - Our hybrid work model recognises that one size does not fit all enabling teams and leaders to interpret hybrid working for their unique needs and purposes.
S	'Foundations': To enable the Group to operate as a sustainable company, it is crucial that we have solid foundations. Transparently managing, monitoring and disclosing against these foundational topics supports the Group's efforts to build and maintain the trust we have with our key stakeholders. Our Foundation topics consist of: Sourcing responsibly, Business ethics, Financial Crime, Health & Safety, Culture, Human Rights, Cyber Security, Data protection and Community Investment.
(Outcomes 2023: We made significant progress on our social commitments in 2023 with examples of key Group activities under each of our key strategic headings below.
	Financial Wellbeing: Under the 'Enhancing financial wellbeing' pillar of the Group's Sustainability strategy, the Group strives to leave no one behind on the journey to financial health. We continue to be the #1 bank for financial wellbeing in the Irish market and have made the following progress during 2023:
	 Fostering financial inclusion - Our ambition is to ensure inclusive and effective access to products and services for priority groups, striving to leave no one behind on the journey to financial health. Our Vulnerable Customer Unit (VCU) has supported c.33,000 customers since its establishment in 2019. It is fundamental to promoting financial inclusion amongst prioritised groups and provides enhanced expert banking support to customers in vulnerable circumstances or situations.
	- In 2023, we launched our 'Extra Help Hub' which centralizes information on our website on all the additional supports available to customers, families, carers and advocates across a range of topics e.g.
	safeguarding people, accessibility and assistance The Assisted Decision Making Capacity Act came into effect in Ireland in April 2023 ensuring that every person is treated individually and that certain groups of people are not automatically deemed to la
C	capacity. We are currently working with the Irish Alzheimer's Society and the Health Service Executive (HSE) to build a training and education programme, so all branches can become 'Dementia Friendly the end of 2024.
	• Improving Financial Literacy - Our ambition is to empower people with the knowledge and skills to help improve their financial literacy and capability which are key building blocks on the journey to
	financial health Championing youth financial education is a key focus for us. Our award winning financial literacy programmes continue to grow year-on year with more than 100,000 students participating in the 2022/2
	school year. During 2023, we provided financial education to over 17,700 customers, colleagues and communities. - Through Mi365, our in-app money management tool, we have delivered over 133 million personalised insights and tailored nudges to customers since launch enabling them to understand and manage
L	- mough wisos, our in-app money management tool, we have delivered over 155 million personalised insights and tailored houges to customers since ladition enabling them to understand and manage

• Building a more financially resilient and confident Ireland – Our ambition is to increase the number of customers and colleagues who have the resilience to withstand the financial impact of an unexpected day-to-day expense or a major life event.

- We strengthened our commitment even further by publishing our United Nations Principles for Responsible Banking (UNPRB) Financial Health and Inclusion targets, one of 23 banks globally to do this (Please see published targets: https://www.unepfi.org/wordpress/wp-content/uploads/2023/07/PRB-Fin-Health-progress-report-1.pdf#page=15). This sets out our commitment to support universal financial inclusion and a banking sector that supports its customers' financial health (for further details see Section (b) below). Our commitment focuses on supporting our customers' day-to-day and life event financial resilience.

- In 2023, to support customers with 'money worries' we launched a 'Money Worries Hub' on our website and set up a dedicated helpline. This will continue to be a key focus area for 2024. We also continued to build awareness and protect customers against the growing threat of fraud, encouraging customers not to immediately react to potentially fraudulent texts or click on suspicious links but instead 'Stop, Think, Check'.

• Fraud Prevention: The Group runs a comprehensive consumer fraud awareness programme in Ireland as a central part of its commitment to safeguarding the financial wellbeing of its customers. Across the Group 225 colleagues are now solely dedicated to fraud prevention and protection, the provision of 24/7 phone support to customers every day of the year, and the detection of financial crime. In February 2024 the Group announced an investment of €50 million on customer fraud prevention and protection. The investment includes €15million on new fraud prevention technology, along with a range of high-profile consumer awareness campaigns and support for customers who are targeted by fraudsters. The majority of members of the Irish public surveyed see Bank of Ireland as the financial institution most associated with educating the general public about fraud (Red C, Feb '24). This latest investment enhances the Bank's response to this important social issue, and includes a nationwide series of free fraud awareness events for consumers.

Colleague Wellbeing

Inclusion and Diversity

- As part of our commitment to transparency around Inclusion and Diversity (I&D) at Bank of Ireland, we have voluntarily published a **Gender Pay Gap** figure since 2020. In 2022, Bank of Ireland Group and its subsidiaries reported under the new 'Gender Pay Gap Information Act 2021' which came into law in Ireland on 31 May 2022. Gender imbalance at senior levels is a significant contributor to the gender pay gap at Bank of Ireland, which was 21% for 2022. This means we have proportionately more female colleagues in junior roles and proportionately fewer female colleagues in senior roles. For this reason, in 2018 Bank of Ireland announced a target to establish 50:50 gender balance in appointments to senior management and leadership. We saw 46% female leadership appointments in 2023 (40% in 2022) with an ongoing commitment to achieve a 50:50 ratio.

- In 2023, we launched our refreshed three year I&D strategy and made strong progress against our gender, ethnicity, sexual orientation and disability diversity ambitions. We achieved the **Gold Investors in Diversity EDI Mark**. 14% of new joiners self-declared as ethnic minority against the 2022 Irish CSO data of 7%. This progress is also evident through our '**Investors in Diversity' Gold Employer** and '**Investing in Ethnicity'** accreditations.

- We progressed our inclusive education journey through targeted initiatives for the Board and Group executives focusing on unconscious bias training.

- We also introduced an Inclusion Passport allowing colleagues with health conditions, disabilities, and caring responsibilities to communicate their unique needs and preferences to colleagues and managers.

- Neuroinclusion strategy - We aim to create a working environment where everyone can thrive. We partnered with Auction, a social enterprise that supports organisations to become more neuroinclusive. In Q2 2023, we commenced delivery of our 3 year neuroinclusion strategy to create a better experience for neurodiverse colleagues and customers, which focuses on Neurodiversity education and improvements to processes, policies and accommodations.

• Family Matters - We offered further enhanced supports to women and families through our Family Matters initiative including, Surrogacy and Adoptive leave, 6 weeks paid paternity leave, and paid provisions for early pregnancy loss. Additionally, we launched progressive policies covering domestic violence, fertility and menopause leave.

• Wellbeing - We are committed to being an employer that promotes opportunities to connect and improve social fitness, leveraging the flexibility of our hybrid working model. In 2023, colleagues participated in a number of social connection and engagement activities across the business including c.2,500 participants in Bank of Ireland's fittest teams, a 3 week fitness programme and further investment in mental health training for all colleagues.

• Culture Embedding and Engagement - Through colleague feedback, we also refined our values to better align with our updated strategy. We have embedded our values across the Group and we have seen a year on year increase in colleague score for Culture Embedding and Engagement.

Future Ready Workforce

- Our Emerging Careers programme continues to mature, providing people from all backgrounds with opportunities to enter the workforce. In 2023, we grew our community engagement initiatives in collaboration with Business in the Community Ireland.

- We launched 11 new programmes as part of our Delivering Equality of Opportunity in Schools programme, specifically designed to enhance numeracy and literacy skills and aid in planning for future careers.

(a)

Foundational: In terms of its foundational activities, the Group has made the following progress during 2023:

Community investment: We recognise our role in supporting the local communities where our customers live and work and it is an important part of our sustainable business activity. Our approach is focused on providing financial support to local not-for-profits, community groups and social enterprises who are working to address social issues and make a lasting change in their communities.
 Social Housing: In addition, in support of the social need in Ireland and our UN PRB objectives, in February 2024 the Group announced it is increasing available funding for housing development to €2.5

billion by 2026. This announcement represents a 40% increase in funding available for home building, with the ambition to support the construction of 25,000 units of all types including houses and large and smaller scale apartment developments. As part of this package, available funding for social and affordable housing will more than double, from €400 million currently to €1 billion.

- First Home Scheme: Bank of Ireland joined the First Home Scheme in 2022, a joint venture between the Irish State and the Irish retail banking sector. As a founding participant this will see the bank invest €70m into the scheme designed to help qualifying first time buyers purchase their own home by bridging the affordability gap between their deposit and mortgage, and the price of their first home.

- Begin Together: In 2023, we provided support to a range of local initiatives working to foster inclusion and build capability amongst underserved groups across the island of Ireland through our Begin Together platform.

- In 2023, the Community Fund in partnership with Community Foundation for Ireland distributed c.€500,000 to 20 organisations delivering initiatives spanning financial literacy and wellbeing, mental health, inclusion and diversity.

- Our 2023 community activity brings our total community investment to c.€7.1 million since 2020.

- We also recognise that sometimes there is a need for direct support. That is why in 2023 we provided a further c. <1.0 million of funding to support those most impacted by the cost-of-living crisis through a dedicated fund. This was fast tracked to organisations working directly with impacted groups.

•Financial crime: Protecting the integrity of the financial system from financial crime risks including money laundering, terrorist financing, bribery and corruption is of paramount importance to us. We are committed to playing our part in safeguarding the financial systems and our customers from the impact of financial crime. The Group's Financial Crime Framework, including our policies and procedures support this objective. All colleagues complete mandatory training and assessments annually, so that the Group's policies and procedures are embedded in operational activities.

•Sourcing responsibly: It is important that our supply partners who deliver goods and services to the Group, share our values and ambition to create a sustainable future. For this reason, we continue to review and update our Code of Supplier Responsibility which sets out the responsible business practices we expect of all our suppliers. This Code is further supported by our Group Procurement and Group Environmental policies.

•Human rights: Several policies and initiatives, including our Code of Supplier Responsibility, Modern Slavery Statement and Vulnerable Customer Unit, guide our approach to ensure that modern slavery and human trafficking does not affect our business or our supply chain. We have put in place Human Trafficking Awareness training and all staff have a legal obligation to report any suspicious activities that may indicate possible human trafficking, including modern slavery and sexual exploitation.

•Through the work of our Financial Crime Compliance team, in partnership with global non-governmental organisation (NGO), 'Stop the Traffic' and An Garda Siochána Protective Services Bureau, we are active in helping to identify and disrupt money flows from human trafficking and in improving the accessibility of financial services to victims of human trafficking.

•Cyber security: We continue to invest in our cyber capability across people, process and technology. We apply a 'security by design' approach to business and technology-driven change. We recognise the importance of a strong security culture within the Group, with annual mandatory web-based training for all colleagues coupled with a well-established and growing Cyber Community of Practice. The 'Security Zone' page on our website supports customer security awareness, including fraud alerts and information on how to report suspicious online activity, emails or phone calls.

•Data Protection: Our customers, clients and colleagues trust us with their data, including giving them the control they need while being fully committed to keeping their information private. Our Data Privacy Notices explain how we hold and use personal information and outline people's rights in relation to the collection of personal information.

Further detail on the initiatives delivered under these strategic pillars and foundations is available on pages 19-22 of the 2023 Annual Report.

Business environment & model

We have been progressively aligning our business model to address social factors and risks informed by the UN Principles for Responsible Banking across areas including Financial Wellbeing, digitalisation customer service, credit and supplier agreements.

The Group is a signatory to the following UN frameworks - the UNPRB, the UN Principles for Responsible Investment (UNPRI) and the UN Principles for Responsible Banking 'Commitment to Financial Health and Inclusion'. The Bank's Financial Health and Inclusion targets were submitted to the UNEP FI in June 2023 and were published by the UNEP FI in July 2023. Details of these targets are included in the Group's answer to (b) below. These initiatives support and complement the ambitions set out in our Group Sustainability strategy.

Reflecting the increased digitalisation of the banking services, the Group are delivering more digital and tailored touchpoints across our business and provide simpler, more effective servicing with reduced customer complaints. The Group offers a wide range of digital banking services through the mobile app, as well as local counter services a network of 169 branches across the island of Ireland. This is complemented by access to local counter services in c.900 post office locations through a partnership with An Post, the Irish postal service. This ensures that customers can bank with the Group in a way that is most convenient to them, while also protecting access to banking for communities in every part of the country and those who prefer to complete their banking in person.

Putting customers first is a core value and integral to our purpose of helping customers thrive. We bring this to life by making it easier to interact, as evidenced by our Relationship Net Promoter Score (RNPS) of +5 points, 1 point higher vs 2022, and a 5% reduction in complaints vs 2022 (and down 49% since 2018). In 2023, we saw ongoing evidence of increased digitalisation with improved customer metrics. Active digital users increased 18%, our mobile app customer effort score increased 3 points and complaints about our mobile app reduced 35%.

The Group has a Code of Supplier Responsibility which outlines its expectations of their suppliers across human rights, health and safety, supply chain, inclusion and diversity, business integrity, doing business responsibly and environmental and energy management. The Group ensures suppliers' compliance with its Code through the Financial Supplier Qualification System (FSQS) process. The Group indicates its consideration for social factors and risks as it has the following policies in places such as Modern slavery and human trafficking statement; Code of Supplier responsibility (noted above); the vulnerability requirements of the Group Customer Protection Risk policy; Group procurement policy; Group Data Privacy policy; Board diversity policy; Group code of conduct; Inclusion and diversity policy; and Group health and safety policy. The Group's Modern Slavery and Human Trafficking statement is approved by the Group Sustainability Committee, a sub-committee of the Group's Board. The Group has published its Sustainability Exclusion List which sets out its risk appetite for lending to potentially sensitive sectors which the Group believes causes environmental and/or social harm to society and the community. The Group has integrated this List into its processes as part of its Corporate and Credit ESG Risk Lending Procedure as it has aligned its Screening Criteria to its Sustainability Exclusion List. Financial planning Currently the Group does not explicitly consider social risk within its ICAAP. However, the Group plans to integrate social risks into its ICAAP process over time, in line with industry practice by linking its mitigation to the investments we are making in Financial Wellbeing and Foundational activities. Objectives, targets and limits to assess and address social risk in short-term, medium-term and long-term, and performance assessment against these objectives, targets and limits, including forward-looking information in the design of business strategy and processes The Group's Sustainability strategy includes a number of target outcomes across social topics, in particular within the 'Enhancing Financial Wellbeing', 'Enabling colleagues to thrive' and Foundation pillars. These strategic pillars align to a number of Sustainable Development Goals: Quality Education, Gender Equality, Decent work & economic growth, Reduced inequalities and No Poverty. We disclosed a number of metrics in the Group Sustainability Related Reporting and Assurances 2023 report (pages 27 and 28), which demonstrate the progress made against our strategic objectives and targets across these areas. In March 2023, as part of our strategic refresh, we announced updated social targets: Retain the #1 brand position for financial wellbeing (2023: retained #1 position) 50:50 gender ratio in appointments to management and leadership positions (2023: 46% female senior appointments to management and leadership positions). The Group, as a founding signatory of the UNPRB 'Commitment to Financial Health and Inclusion', is committed to promoting financial health and inclusion through its products, services and customer engagement. In July 2023, the UN published the commitments made by 20 banks globally (including Bank of Ireland) to support universal financial inclusion and a banking sector that supports its customers' financial health. The Group's UNPRB commitment focuses on supporting its customers' day-to-day and life event financial resilience. The Group's goal is to contribute to the creation of a more financially resilient and confident Ireland by increasing the number of customers who have the resilience to withstand the financial impact of an unexpected day-to-day expense and/or a major life event by: Increasing from 62% (April 2023) to 70% the percentage of customers who are confident (strongly or somewhat) that they have funds available to cover an unexpected day-to-day expense by 2030 (b) Increasing from 44% (April 2023) to 50% the percentage of customers who are confident (strongly or somewhat) that they have funds (Savings or Insurance) available to cover a major unexpected event by 2030 These impact targets address a priority in Ireland in line with: Ireland's National Implementation Plan for the Sustainable Development Goals 2022–24 Adult Literacy for Life Strategy Education for Sustainable Development—National Strategy The Financial Wellbeing of adults in Ireland The Financial Literacy of adults in Ireland • The Financial Resilience of adults in Ireland To monitor progress towards achieving its targets, the Bank will periodically track the following: Number of Adults supported with Financial Education Initiatives, starting from a baseline value of 9,643 in 2022 Based on survey data the percentage of customers who state that they have a long term (greater than 12 months) savings and or investment plan in place, starting from a baseline value of 35% in 2023 Based on survey data, the percentage of customers who state that they always have some money put aside to cover day-to-day unexpected expenses, starting from a baseline value of 60% in 2023 Number of active partnerships to achieve financial health targets, starting from a baseline value of zero in 2023 Please see response to (a) above for further detail on our objectives with respect to social housing and the First Home Scheme.

	Policies and procedures relating to direct and indirect engagement with new or existing counterparties on their strategies to mitigate and reduce socially harmful activities						
	The Group has a number of policies and procedures in place which mitigate/ reduce social risk.						
	The Group examines ESG considerations as part of its customer onboarding due-diligence process and for lending ESG considerations are outlined in the Corporate and Business Banking ESG Lending Procedures. The Group requires credit submissions to explicitly comment on a borrower's ESG policies, how it is incorporated into its strategic objectives and whether these are measured and evidenced.						
(c)	The Group's Sustainability Exclusion List clearly sets out our risk appetite for lending to potentially sensitive sectors which we believe cause both environmental and/ or social harm to society and our communities.						
	Please see response to (a) above for further detail on our engagement with respect to social housing and the First Home Scheme.						
	Governance						
	Responsibilities of the management body for setting the risk framework, supervising and managing the implementation of the objectives, strategy and policies in the context of social risk management covering counterparties' approaches to: (i) Activities towards the community and society (ii) Employee relationships and labour standards (iii) Customer protection and product responsibility (iv) Human rights						
	The Group's Board provides oversight over the Group's alignment with key regulations, as well as the objectives under the Sustainability strategy by engaging in communication with the Group Executive Committee (GEC), the BRC and the GSC on progress against key climate commitments and delivery of the Sustainability strategy, which includes social dimensions as indicated in the Group's answers to (a) and (b) above.						
	The Board comprises of 11 Directors: 2 Executive Directors, the Chairman and 8 independent Non-Executive Directors (NEDs). For further information on the number of directorships, including external directorships, held by the Group's Board, please refer to page 79 – 84 in the Annual Report 2023. The Group Nomination & Governance Committee undertakes a rigorous and transparent procedure when considering candidates for appointment to the Board and maintains oversight of the Board's composition to ensure it remains appropriate.						
	On behalf of the Board, the GSC oversees the development and implementation of the Group's Sustainability strategy and, together with the BRC, oversees related risk. In the context of social factors and risks this includes -Oversee progress against ESG targets the UN Principles for Responsible Banking Commitment to Financial Health & Inclusion, and other social related targets,						
	 -Review and challenge material key sustainability policies of the Group in the context of the Group's sustainability strategy and ensure they are aligned to the Group's Purpose and support the long term success of the Company, including approval, on an annual basis, of the Group Modern Slavery and Human Trafficking Statement. -Receive periodic updates on the Group's diversity and inclusion activity, as it relates to the sustainability strategy. -Receive periodic updates on the status and effectiveness of supplier relations and related supplier topics, particularly with regard to ESG matters. 						
	Please see its terms of reference for further details: https://www.bankofireland.com/app/uploads/assets/GSC-Terms-of-Reference-Approved-14-December-2023.pdf						
(d)	The Board is fully committed to diversity in all forms and believes that diversity is an essential ingredient of sound decision-making. The Board's approach to diversity in all its forms is set out in the Board Diversity Policy which has retained the specific gender target of maintaining a minimum of 40% female representation on the Board. The Policy was enhanced to reflect the commitment to ensure the inclusion of at least one Director that is from an ethnic minority, which has been met, and the appointment of a female to one of the four senior Board roles of CEO, CFO, Chairman and Senior Independent Director (SID).						
	As at the end of 2023, the Group's Board comprised 36% of female representation. While not yet achieving all diversity targets, the Board's searches for new Independent Non-Executive Directors (INEDs) has included a focus on growing the Board's profile in relation to all aspects of diversity. We intend to make further progress on our diversity targets through our current INED and Chair searches. The Board is committed to the application of recruitment and selection criteria that are explicitly informed by the relevant targets for ethnic minority and female representation.						
	The Group's Board level Group Sustainability Committee receives an annual update on Financial Wellbeing and a bi-annual update on UNPRB ((United Nations Principles for Responsible Banking) commitments. The GEC sponsor for Financial Wellbeing is the Chief Customer Officer.						
	The Group's Begin Together Fund is delivered annually in partnership with third party experts in the Community Foundation for Ireland (CFI), which enables the Group to focus its community investment on a wide variety of causes within an overarching strategic framework, designed to enable inclusion and build capability among vulnerable groups.						
	On an ongoing basis, through it risk management framework, policies and processes, the Group identifies and assesses risk to which the Group is exposed. The Group ESG Risk Management Framework						

On an ongoing basis, through it risk management framework, policies and processes, the Group identifies and assesses risk to which the Group is exposed. The Group ESG Risk Management Framework sets out that ESG factors represent a common risk driver and are managed through each of the Group's Principal risks. •Social risks, including employee relationships and labour standards, customer protections and product responsibility and human rights are managed through each of the Principal and sub risks.

	 Social risks, including employee relationships and labour standards, customer protections and product responsibility and human rights are managed through each of the Principal and sub risks. Re counterparty risk, the Group's credit policies and loan origination standards, as well as the Group's Third Party Risk Management and Outsourcing policies address social risk factors. Please refer to the Group's answer to (a) above regarding the Group's Code of Supplier Responsibility outlining its expectations of their suppliers across different social considerations. The Group has a Customer Protection Risk Policy that includes consideration of product design and delivery and outlines requirements that seek to ensure that in bringing products to the market we consider and address potential or actual negative outcomes for clients, customers and markets. The Policy is aligned with applicable regulatory requirements and guidance including the Consumer Protection Code 2012 (Rol), European Regulations, including the Markets in Financial Instruments Directive (MiFID II), Insurance Distribution Directive (IDD) and the Financial Conduct Authority's (UK) rules and principles on product oversight and governance arrangements. As part of the recent policy refresh cycle, specific provisions were added to address the risk of 'greenwashing' in situations where the Group intends to sell, promote or distribute products or services on the basis of 'green' credentials. 					
	Integration of measures to manage social factors and risks in internal governance arrangements, including the role of committees, the allocation of tasks and responsibilities, and the feedback loop from risk management to the management body					
	The ESG Risk Management Framework is approved by the ERC and has been developed for senior management and committee members responsible for the management of risk and the implementation of the risk management process.					
(e)	The Group has identified Conduct Risk as a principal risk and has a focus on customer protection matters. For information on the Group's risk committees and their tasks and responsibilities for monitoring and managing ESG risks, please refer to the Group's answer to (d) above.					
	Progress on the Group's Inclusion and Diversity (I&D) strategy is reported biannually to the Board. The Group has appointed individual GEC Champions for each of the six I&D networks within the Group. The Group has a full-time I&D Lead responsible for delivering the I&D strategy for the Group.					
	Lines of reporting and frequency of reporting relating to social risk					
(f)	The Group's Sustainability Board Committee receives quarterly updates on ESG, which includes progress against the social aspects of the Sustainability Strategy under the pillars of 'Enabling colleagues to thrive', 'Enhancing financial wellbeing' and the 'Foundations'.					
	See response to (a) above for further detail.					
	Alignment of the remuneration policy in line with institution's social risk-related objectives					
	In November 2022, the Irish Government announced that a number of crisis-era restrictions related to remuneration were being changed in respect of the Group. These included removal of the blanket prohibition on variable pay and the introduction of a variable pay cap of €20,000.					
(g)	As a result of these changes the Group has implemented a regulatory compliant Group Profit Share scheme for all colleagues in all jurisdictions. This has enabled the Group to improve the links between remuneration, personal performance, delivery for customers and the achievement of our long term strategic and commercial goals. The appropriateness of the final profit share is assessed against a mix of financial and non-financial criteria, including profit and related metrics, affordability, customer, and ESG, with the pool as a whole subject to risk adjustment. The Bank currently does not have an Employee Stock Option Plan and did not operate a Stock Incentive Plan in 2023.					
	With 'Sustainable Company' now a core strategic pillar, ESG is mainstreamed into our performance management system. This puts it on every colleague's 'to do' list.					
	Risk management					
	Definitions, methodologies and international standards on which the social risk management framework is based					
(h)	The Group manages ESG risks through its Principal risk categories (credit risk, market risk, funding & liquidity risk, capital adequacy risk, life insurance risk, business and strategic risk, conduct risk, regulatory risk and other operational risk).					
	As outlined in (a), the Group leverages the UNPRB, UNPRI and the UN Principles for Responsible Banking 'Commitment to Financial Health and Inclusion', to help determine relevant ESG factors.					
	Social risk factors and risks have been referenced in the ESG Risk Management Framework, but are subject to further ongoing development.					
	Processes to identify, measure and monitor activities and exposures (and collateral where applicable) sensitive to social risk, covering relevant transmission channels					
(i)	The Group ESG Risk Management Framework sets out the approach to the management of ESG risk factors in the Group. ESG risk management is relatively immature across the industry and continues to evolve. Implementation to date, in the Group and industry, has largely focused on climate-related risk drivers. The focus from stakeholders (investors, regulators, customers, colleagues etc.) and wider societal expectations is seeing an expanding of expectations to the wider ESG agenda with increasing emphasis on a fairer and inclusive society. Consequently, the Group does not yet specifically identify, measure and monitor activities and activities under the social risk lens. However the Group does address social risk factors through the risk policies attached to each of its Principal risks including Conduct Risk, Operational Risk (including Third Party Risk Management), and Credit Risk. The Group uses the definitions set out in the Principles for Responsible Investment (PRI) Reporting Framework as a guide when considering Social risk factors. Through the Group's Sustainability Exclusion List, the Group has aligned its lending strategy to minimise its exposures to environmentally and socially high-risk sectors.					

	Activities, commitments and assets contributing to mitigate social risk
(j)	Please refer to the Group's answer to (a) and (b) above, for the Group's objectives regarding social factors such as the Financial Wellbeing Programme (FWP) including: - Special assistance for vulnerable customers; - Enhancing learning and development opportunities for customers and colleagues; and - The Group's commitment to achieving 50:50 gender ratio within its management and leadership.
	As noted in the Group's answer to (d) above, the Group's Begin Together Fund is delivered annually in partnership with third party experts in the Community Foundation for Ireland (CFI), which enables the Group to focus our community investment on a wide variety of causes within an overarching strategic framework.
	The Customer Protection Risk Policy Part III (Customer Engagement Risk) also mandates the establishment of various risk mitigating measures aimed at protecting the Group's vulnerable customers.
	Implementation of tools for identification and management of social risk
	The Group has aligned its lending strategy to minimise its exposures to environmentally and socially high-risk sectors through the Group's Sustainability Exclusion List and through the requirement to address E, S and G risks as part of individual credit applications (Corporate & Commercial Banking).
(k)	Furthermore the Group has leveraged behavioural science and digital tools to deliver its financial wellbeing behavioural campaigns. Behavioural science helps us understand why and how people make financial decisions and what works well. To support this work we continue to collaborate with behavioural science experts to bring best in class expertise to support customers' decision making and promote positive behaviours to support customers financial wellbeing. We are continuing our partnership with Harvard's Sustainability, Transparency, and Accountability Research (STAR) Lab.
	In 2022 the Group launched Money Insights 365 (Mi365), an in-app money management tool that delivers personalised insights and tailored nudges to enable customers to understand and manage day-to- day spending, stay in control of their finances, and enhance their financial wellbeing. It was launched to all mobile app users with 47 insights across a number of categories ranging from subscriptions to cash- flow tracking.
	Description of setting limits to social risk and cases to trigger escalation and exclusion in the case of breaching these limits
	The Group's Corporate & Commercial Banking has published a Sustainability Exclusion List that sets out the Group's risk appetite for lending to potential socially sensitive sectors. This List applies to all new lending and customer service arrangements ensuring that the Group does not provide financing to customers who are deemed to engage in a defined list of excluded business activities. Any cases considered a heightened ESG risk during initial review will be subject to 'Enhanced Review' and will be considered by an ESG Risk Forum in addition to Corporate & Commercial Credit. The Group embeds these exclusions at the origination stage to ensure that these criteria continue to evolve in line with the Group's Sustainability strategy.
	Any cases deemed a heightened ESG risk during initial review by the relationship manager will be subject to 'Enhanced Review' and will be considered by an ESG Risk Forum during the credit process. The Group has aligned its Screening Criteria to its Sustainability Exclusion List. For further details on this process and its governance arrangements, please refer to the Group's disclosure in Governance Risk Template.
	Key policies addressing to social factors including (1) bribery and corruption; (2) respect for human rights; and (3) other social and employee matters include:
	 (1) Bribery and Corruption • Group code of conduct • Speak up policy
	 Group anti-money laundering policy Group anti-bribery and corruption policy
	Social and financial inclusion policy Respect at work policy
	Recruitment policy
	Corporate affairs statement Financial crime compliance statement
(I)	 (2) Respect for human rights Modern slavery and human trafficking statement Code of supplier responsibility Group procurement policy
	Group data protection and privacy policy
	(3) Social and employee matters

	Group code of conduct				
	• Equal opportunities policy				
	Group health and safety policy				
	Employee data privacy				
	Group vulnerable customers policy				
	Group learning policy				
	Third party policy				
	Responsible and sustainable sector statement				
These policies are referenced in the Non-Financial statement on page 45 in the 2023 Annual Report. Key Performance Indicators (KPIs) reflecting key social factors under the 'Enhancing financial wellbeing', 'Enabling colleagues to thrive', and 'Foundations' pillars are disclosed in t Sustainability Report. The latest Social KPIs on pages 27-28 of the Group Sustainability Related Reporting and Assurances 2023 report include:					
	 Enhancing financial wellbeing – national financial wellbeing index score and number of vulnerable customers supported Enabling colleagues to thrive - % Female senior leadership appointments and % of colleagues who graduated from future skills pathways Foundation – Completions rates for mandatory training on Code of Conduct, Speak Up, Information Security and Anti-bribery and Corruption. 				
(m)	Description of the link (transmission channels) between environmental risks with credit risk, liquidity and funding risk, market risk, operational risk and reputational risk in the risk management framework				
	Currently, the Group has integrated climate-related (environmental) risk into its credit risk, liquidity risk, market risk and operational risk policies. The Group plans to develop the integration of social risks into its Principal risk categories over time in line with market and regulatory developments.

Inclusion and diversity policy

r

Environmental, Social and Governance risks (ESG risks)

Table 3 - Qualitative information on Governance risk in accordance with Article 449a CRR

Row number	Governance
	Institution's integration in their governance arrangements governance performance of the counterparty, including committees of the highest governance body, committees responsible for decision-making on economic, environmental, and social topics
	The Group has integrated governance considerations as part of its implementation of E, S and G factors across the business through adopting ESG considerations into its existing governance model, with strong internal controls and governance through the relevant committee(s) and management body, in line with EBA guidelines on Internal Governance.
	The Group's Credit Policy is approved by the Board. The policy is aligned with and has regard to, the Group's Risk Appetite Statement, which is approved annually by the Board. The Group's credit risk management systems operate through a hierarchy of lending authorities which are related to internal loan ratings. Governance criteria have been integrated within the Group's procedures, as part of the Customer Due Diligence and Credit Process.
	With respect to counterparties, the Group assesses general governance arrangements of counterparties as part of due diligence requirements, both as part of ESG risk assessments but also as part of standard credit rating assessments. ESG risk due diligence includes assessment of counterparties' general risk management and sustainability performance, including sustainability commitments and efforts. As part of our credit rating process the general governance arrangements, including quality of management body and sound financials of the counterparty, are considered as part of the credit rating and PD (Probability of Default) assessments.
(2)	The Group has in place specific procedures outlined within its Corporate and Business Banking ESG Lending Procedures for engaging with its counterparties. These procedures outline that credit submissions and review papers, submitted by the relationship managers on behalf of counterparties, are critically assessed with regard to its ESG-related governance arrangements. The Group assesses the governance considerations of its counterparties as part of its Customer Due Diligence process and the ongoing monitoring and review process. The Group requires credit submissions to explicitly comment on a borrower's ESG policies, how it is incorporated into its strategic objectives and whether these are measured and evidenced.
(a)	
	The Group has published a Sustainability Exclusion List, approved by Group Credit Risk Committee, that sets out its ESG risk appetite for lending to potentially sensitive sectors which the Group believes cause environmental and/or social harm to society and the community. The Group has aligned its ESG Screening Criteria, within its lending procedures, to its Sustainability Exclusion List. The Group's current portfolio is materially aligned as ESG considerations have been embedded in these procedures at the point of origination and the procedure will continue to evolve in line with the Group's Sustainability strategy.
	In relation to the Group's internal governance on evaluating cases for corporate and commercial lending, any cases considered a heightened ESG risk during initial review by the relationship manager will be subject to enhanced review and consideration by the ESG Risk Forum, prior to consideration by credit risk transaction governance or committees. The ESG Risk Forum brings together relevant senior leaders on an ad-hoc basis, to consider the potential impact of ESG and reputational-sensitive issues/business decisions referred to it during the credit origination and review process based on the screening criteria.
	In order to evaluate the governance performance of its counterparties and integrate it into its internal governance arrangements, the Group's ESG Risk Credit Forum considers the following factors:
	 ESG track record of the business Internal ESG governance/ policy – including any ESG management credentials, for example ESG pledges, industry memberships, accreditations Industry regulation ESG Rating – from ESG or other rating agencies, if relevant ESG media profile of the business.
	Institution's accounting of the counterparty's highest governance body's role in non-financial reporting
(b)	As part of its customer onboarding process and ongoing customer due diligence process conducted annually, the Group conducts an assessment of its customers' non-financial reporting. The assessment is conducted in line with the Group's Sustainability Exclusion List and the Group's Corporate and Business Banking ESG Risk Lending Procedure. In cases where a fully extensive ESG Risk analysis may not be practical, due to limitations on available information and maturity of its counterparties ESG programme, relationship managers use best efforts to assess their counterparties' ESG risk.
	Institution's integration in governance arrangements of the governance performance of their counterparties including:
	(i) Ethical considerations

	 (i) Ethical considerations (ii) Strategy and risk management (iii) Inclusiveness
	(iv) Transparency (v) Management of conflict of interest (vi) Internal communication on critical concerns
	The Board is collectively responsible for the long-term sustainable success of the Group and for ensuring there is a strong corporate structure in place, which is aligned with the Group's strategy and purpose. It provides leadership of the Group, setting strategic aims, within the boundaries of the Group's risk appetite and a framework of prudent and effective controls.
	Responsibilities in respect of Sustainability and ESG strategy are delegated to the Group Sustainability Committee (GSC), which, jointly with the Board Risk Committee (BRC), is also responsible for ensuring ESG risks have been integrated into the Group Risk Management Framework.
(c)	On behalf of the Board, the GSC oversees development and implementation of the Group's Sustainability strategy and, together with the BRC, oversees related risks, including monitoring the Climate Risk Implementation Plan. As part of that role, the GSC oversees progress against ESG targets, review of ESG-related commitments and the publication of the Sustainability Report. Both the GSC and the BRC are supported in their duties and oversight by a number of sub-committees and working groups, including the ESG Risk Working Group and the ESG Risk Credit Forum identified in the Group answer to (a) above. Counterparty governance flows from the business through the group risk owner, which reports into the relevant committees e.g. GCRC, ERC, and BRC.
	The GEC has overarching responsibility for delivery and operationalisation of the Group's Sustainability strategy, with specific executive responsibility for Sustainability (including climate change) delegated to the Sustainability and Investor Relations Officer (CSIRO) who reports to the Group Chief Financial Officer (CFO). Members of the GEC include the CFO, Divisional Chief Executive Officers (CEOs) and the Chief Risk Officer (CRO).
	The Sustainability Decision Group (SDG) brings together senior business and functional management across the Group to enable a coordinated approach to sustainability objectives across the 3 pillars and to provide a discussion and decision making forum to deliver on the Group's sustainability agenda. The SDG is chaired by the CSIRO and regularly updates the GEC on progress against key initiatives.
	Through the Group's ESG Risk Lending Procedures and the Sustainability Exclusion List, the Group integrates the ESG governance performance of its counterparties into its governance arrangements. For customers and transactions in all sectors, cases are initially screened using the Group's ESG Screening Criteria with the evidence in the public domain. The issues covered during the screening are as follows: - Abuses of human rights, including displacement of indigenous peoples, child and forced labour, modern slavery, human trafficking, and exploitation of poverty - Operations in internationally protected conservation areas
	 Major or sustained environmental or socially related campaigns against the customer Major environmental or social incident or fine, for example, a pollution event or accident such as a mine explosion, or companies with a poor health and safety record, particularly repeated non-compliance with environmental or health and safety legislation.

Risk management

	Institution's integration in risk management arrangements the governance performance of their counterparties considering:
	i) Ethical considerations
	ii) Strategy and risk management
	iii) Inclusiveness
	iv) Transparency
	v) Management of conflict of interest
	vi) Internal communication on critical concerns
	ESG responsibilities extend across the Group, based on a 'Three Lines of Defence' approach, in line with the Group Risk Management Framework. Co-ordinated by Group Risk, an ESG Risk Working Group brings together second line of defence risk management from across the Principal Risk types (with representation from the Group first line of defence) to ensure that there is a co-ordinated, cohesive and challenging approach to the management of ESG and climate-related risks within the Group.
	The ESG Risk Credit Forum brings together relevant senior leaders on an ad-hoc basis, to consider the potential impact of ESG and reputational-sensitive issues/business decisions referred to it during the credit origination and review process based on the screening criteria (as outlined in the Sustainability Exclusion List).
	As noted in the Group's answer to (c), the issues covered during the relationship managers ESG screening process are as follows:
	- Abuses of human rights, including displacement of indigenous peoples, child and forced labour, modern slavery, human trafficking, and exploitation of poverty
	- Operations in internationally protected conservation areas
	 Major or sustained environmental or socially related campaigns against the customer
	- Major environmental or social incident or fine, for example, a pollution event or accident such as a mine explosion, or companies with a poor health and safety record, particularly
	repeated non-compliance with environmental or health and safety legislation
(d)	As noted in the Group's answer to (a), the Group's corporate and business banking lending strategy is aligned to the Sustainability Exclusion List. The Group's lending activities are
	governed by the Group Credit Policy.
	In addition to the screening for ESG governance issues described above the Group is dedicated to supporting the ongoing protection of the financial system and our customers from the impact of financial crime.
	Our comprehensive Financial Crime Framework includes, policies, and standards to manage financial crime risks. Through this framework, we comply with our regulatory obligations
	and align our strategy with industry best practices, ensuring we are supporting our customers and communities while also building our own resilience.
	We manage financial crime events through our Three Lines of Defence approach with the Group Board responsible for oversight of financial crime risk. Our Money Laundering Reporting Officer (MLRO) leads the Group's Financial Crime Compliance team and is responsible for undertaking annual Enterprise-Wide Risk Assessments. These assessments assess Anti-Money Laundering (AML) and Countering the Financial Crime (CFT) Risk, Sanctions Risk, and Fraud Risks and identifies enhancements to the Financial Crime
	Framework to ensure continued compliance with relevant regulations and legislative duties. The outcome of these assessments are reported to the Group Board. Our MLRO
	monitors and oversees financial crime controls across the Group, working with our assurance teams to regularly report on Key Risk Indicators to Senior Management and the Board.
	The Group Financial Crime policies are all essential to our framework and are informed by our engagement with law enforcement, regulators, and industry. All colleagues complete
	annual mandatory training and assessment on these topics so that these policies are embedded in our operational activities. The MLRO and wider team provide comprehensive annual training to the Board and issue bespoke training on AML and CFT risks to key business functions.
	We monitor customer transactions to identify unusual or suspicious activities. When we onboard new customers, we conduct due diligence and screen them against national and
	international sanctions or terrorism lists. Where customers present as high-risk, we complete enhanced due-diligence, requesting further information to understand the risk.
	Irrespective of risk rating, all our customers are screened on an ongoing basis to ensure continued compliance with screening obligations.

Environmental, Social and Governance (ESG) Risk Table 10.1 shows information on those assets more exposed to the risks that institutions may face from the transition to a low carbon and climate Table 10.1 - Template 1 - Banking book- Climate change transition risk: Credit quality of exposures by sector, emissions and residual maturity Sector/subsector а 19,774 1 Exposures towards sectors that highly contribute to climate change* 1,799 2 A - Agriculture, forestry and fishing 146 3 B - Mining and quarrying 4 B.05 - Mining of coal and lignite -5 B.06 - Extraction of crude petroleum and natural gas -6 B.07 - Mining of metal ores -105 7 B.08 - Other mining and quarrying 8 B.09 - Mining support service activities 41 9 C - Manufacturing 4,524 10 C.10 - Manufacture of food products 1,155 125 11 C.11 - Manufacture of beverages 12 C.12 - Manufacture of tobacco products -13 C.13 - Manufacture of textiles 47 95 14 C.14 - Manufacture of wearing apparel 15 C.15 - Manufacture of leather and related products 16 C.16 - Manufacture of wood and of products of wood and cork, except furniture; manufacture of articles of str 99 17 C.17 - Manufacture of pulp, paper and paperboard 33 115 18 C.18 - Printing and service activities related to printing 19 C.19 - Manufacture of coke oven products 1 244 20 C.20 - Production of chemicals 191 21 C.21 - Manufacture of pharmaceutical preparations 211 22 C.22 - Manufacture of rubber products 23 C.23 - Manufacture of other non-metallic mineral products 51 32 24 C.24 - Manufacture of basic metals 141 25 C.25 - Manufacture of fabricated metal products, except machinery and equipment 317 26 C.26 - Manufacture of computer, electronic and optical products 198 27 C.27 - Manufacture of electrical equipment 513 28 C.28 - Manufacture of machinery and equipment n.e.c. 29 C.29 - Manufacture of motor vehicles, trailers and semi-trailers 78 30 C.30 - Manufacture of other transport equipment

uantitative ESG Risk Templates - Narrative Disclosures

Template 1: Banking Book - Climate Change transition risk: Credit quality of exposures by sector, emissions and residual maturity

instruments to non-financial corporations, other than those held for trading.

Disclosure Basis This template provides information on exposures to non-financial counterparties operating in sectors that significantly contribute to climate change, including loans and advances, debt securities and equity **NACE Sector Classifications** For this disclosure, the rows of the template breakdown include the gross carrying amount of loans and equity instruments to non-financial corporates debt securities and equity instruments to non-financial corporations, other than those held for trading, by sector of economic activities using NACE codes based on the principal activity of the counterparty. This breakdown is reconciled to the equivalent FINREP tables at NACE Classification Level 1 (21 sections identified by alphabetical letters A to U), and incorporates debt securities and equity instruments. For this disclosure, the FINREP NACE breakdown has been extended through a central exercise to NACE Level 2 (further sub-classifications denoted by two-digit numerical codes) for the sectors identified by the EBA as major climate change contributors (73% – NACE A–I and L) and other, less polluting sectors (27% – NACE K, J, M–U). Paris-aligned benchmarks For the June 2024 disclosure, the Group has conducted a materiality-based exercise to identify counterparties which resulted in exposures being identified in column b of Template 1. The Group acknowledges the request from the regulator for this portion of the template to exclude companies that significantly harm one or more of the EU Taxonomy Environmental Objectives, however no significant testing against the DNSH criteria has taken place as of publication of this disclosure. The percentage of lending to non-financial corporates excluded from Paris-aligned benchmarks on this basis is <1%. Environmentally Sustainable Exposures (CCM) **GHG Emissions**

This column reflects NFC exposure identified as Environmentally Sustainable aligned with EU Taxonomy objectives regarding Climate Change Mitigation (CCM) in Template 7 (Table 10.7)

The Group continues to progress the development of its emissions reporting capabilities and for this June 2024 disclosure, GHG financed emissions are provided for all NACE sectors within the NFC (Non-Financial Counterparty) portfolio. This approach is informed by (i) ECB guidance on good practices for climate related and environmental risk management and disclosures and (ii) the International Standard for measuring GHG emissions Scope 3 - Category 15 by the Partnership for Carbon Accounting Financials (PCAF).

This sees the estimates reported in columns (i-j) with the percentage of the portfolio weighted by gross carrying amount (GCA) where the Group has been able to estimate the counterparties scope 1, 2 & 3 financed emissions based on: (i) information disclosed by the counterparties; (ii) proxy estimates provided by ICE Sustainable Finance when direct disclosed estimates are not available. These proxy estimates are inferred by ICE based on economic activity (NACE Sector), geographic location and revenue of counterparties (based on available data); (iii) emissions for the NACE Sector L - Real estate activities and D35.11 - Production of electricity are estimated in line with the Group's emission quantification methods applied for Science Based Targets. This sees the majority of the estimated emissions generated by the NFC portfolio in the Scope 3 category, and this proportionality is in line with ECB system level emissions studies. However the Group recognises that measurement methodologies and data availability remain at an early stage of development across the industry which means emissions intensity estimates are not necessarily comparable across different financial institutions. This is a particular consideration for Scope 3 estimates that accounts for incomplete coverage in reported emissions by counterparties. Furthermore as financial institutions are aggregators of emissions data for NFC acknowledges that, to date source". Due to this we have leveraged ICE's methodologies that infer Scope 3 estimates that accounts for incomplete coverage in reported emissions by counterparties. Furthermore as financial institutions are aggregators of emissions data for NFC acknowledges that infer Scope 3 estimates that accounts for incomplete coverage in reported emissions data for NFC acknowledges that infer Scope 3 estimates that accounts for incomplete coverage in reported emissions by counterparties. Furthermore as financial institutions are aggregators of emissions data for NFC acknowledges that infer Scope 3 estimates that accounts for incomplete coverage in reported emissions data still varies greatly per sector and data source". counterparties, the potential for double counting of emissions due to overlaps across company supply chains is a further inherent limitation of the current approach.

The Group acknowledges these current limitations and is continuing to develop its methodologies and data coverage in this space. In addition the level of direct estimates disclosed by counterparties will increase over time in line with the introduction of the Corporate Sustainability Reporting Directive (CSRD) and will reduce current levels of dependence on proxy estimates. In the meantime, variation in emission metrics may not always reflect changes in customers' emissions, but could result from changes in other factors, such as changes in revenue and production for various reasons such as global events, and new data sources and methodologies used to estimate emissions in the absence of externally published customer emissions.

Template 2: Banking book - Climate change transition risk: Loans collateralised by immovable property - Energy efficiency of the collateral

Disclosure Basis

The Group is committed as part of its sustainability ambitions to support its customers to increase their residential energy efficiency whilst encouraging the purchase of energy efficiency is represented by Energy Performance Certificate (EPC) rating, with A indicating the best and G the worst in terms of energy efficiency. The development of data capture capabilities for EPC and Energy Performance Scores was a key systems development focus area for the Group during 2023: - the Group has developed data capture capabilities within its Rol home buying customer journey, so that data based on specific BER certificates is being collected from the start of 2024. - the Group has developed data capture capabilities within its CRE lending business to progressively expand and enhance the collection of data based on specific EPC certificates. Data collection is being progressed in phases and this has seen coverage of the portfolio where specific EPC ratings are available, increase from 29% at FY2023 to 33% at HY2024. Further increases in coverage expected in 2024 as further phases of the data collection process are progressively rolled out across the CRE portfolio.

The processes for disclosing EPC and Energy performance (EP) information differ across the key EU and non-EU jurisdictions that the Group operates in – Republic of Ireland (ROI) and United Kingdom (UK). They are set out as follows:

ROI lending collateralised by immovable property

For the June 2024 disclosure, 4% of the EPC data for ROI household lending collateralised by residential immovable property is estimated, and not based on specific EPC labels. The Group has developed data capture capabilities in the ROI jurisdiction for BER (Building Energy Rating) Certificates (the Irish version of EPCs) and €1.4bn of exposure is profiled on this data in the table above. A national database maintained by the Sustainable Energy Authority of Ireland (SEAI) on domestic properties with recorded energy ratings has been used to provide a proxy view on the energy rating profile of ROI lending collateralised by residential property, based on key explanatory factors (namely year of build, property type and location).

For the June 2024 disclosure, c.33% of the EPC data for ROI commercial lending collateralised by commercial immovable property is based on specific EPC labels collected through internal processes. For the residual ROI located properties, SEAI national data on non-domestic properties is used to estimate the energy rating profile for those properties based on property type.

Energy Performance (EP) scores are estimated as a midpoint EP kWh/m² per annum value attaching to the energy rating per SEAI reference datasets.

UK lending collateralised by immovable property

In the UK jurisdiction, the Group has had procedures in place for the collection of EPC data for household lending collateralised by residential immovable property since 2020 and has extended the procedures to capture Energy Performance (EP) data from 2023. For the June 2024 disclosure, c.82% of the EPC ratings and EP data for UK household lending collateralised by residential immovable property is based on specific EPC labels. For the residual UK located properties, EPC ratings have been estimated based on key explanatory factors (namely year of build, property type and location).

For the June 2024 disclosure, c.21% of the EPC data for UK commercial lending collateralised by commercial immovable property is based on specific EPC labels collected through internal processes. For the residual UK located properties, UK national data on non-domestic properties was used to estimate the energy rating profile for those properties based on property type. Energy Performance (EP) scores and estimates are not currently available from the Group's data sources for UK commercial lending collateralised by commercial immovable property and this capability continues to be developed.

Other Jurisdictions

For the June 2024 disclosure, c.8% of the commercial lending collateralised by commercial immovable property is based outside of ROI and the UK, predominantly in the US. Energy Ratings and EP scores and estimates are not currently available from the Group's data sources for this cohort and this capability continues to be developed.

1. Values as of 31.12.2023, the table is only updated annually in line with annual disclosure on progress towards the Group's Science Based Targets.

2. Point in Time (PiT) distance to 2030 NZE2050 scenario in % (for each metric)

3. Linear interpolation based on the SBTi baseline year 2021 and the SBTi targets for 2030

emplate 3: Banking Book – Climate Change Transition Risk: Alignment Metrics:

In 2022 Bank of Ireland Group set Science based targets (SBTs) to set our portfolios and lending practices on a pathway that is aligned with the Paris Agreement goals.

These independently validated targets guide our emission reduction plans and are contingent on the current Irish and UK governments' Climate Actions. The majority of Bank of Ireland emissions stem from our economic lending activities. Achieving our ambitious Scope 3 SBTi targets necessitates significant progress in national climate action plans in both Ireland and the UK. Additionally, the successful realisation of these targets relies on the actions taken by our customers.

Our ambition is to actively assist them in transitioning to more sustainable practices, both in their lifestyles and business operations. Given the integral role of the financial services sector in our economies, we recognise our potential as a key facilitator of the low-carbon transition. By setting SBTi emission reduction targets, we underscore our commitment to facilitating tangible change for our customers and society.

In 2022, we became the first Irish bank to have our Greenhouse gas (GHG) emission reduction targets validated by SBTi, covering all the Group's operations and 76% of our FY2020 baseline loan book. This includes Scope 1 and 2 emissions present in our operations and Scope 3 emissions in our downstream value chain. Having our GHG targets validated by the global gold standard SBTi reinforces the credibility of our commitment to assisting Ireland in achieving its climate targets.

The SBTi validated our target of a 49% reduction in GHG emissions from our own operations by 2030. Reduction targets have also been set for emissions arising from the Bank's lending activities (Scope 3) which are consistent with levels required to meet the goals that are aligned to the 1.5°C Paris Agreement. Under the SBTi validated sector decarbonisation approach (SDA) targets, we are committing to a 48% reduction in residential mortgage portfolio emissions (Ireland and UK), a 56% reduction in commercial real estate portfolio emissions and a 63% reduction in electricity generation project finance portfolio emissions by 2030. The base year for the reduction targets is 2020. Under the SBTi validated portfolio coverage approach (PCA) targets, 25% of the Bank's corporate loan portfolio and corporate bonds will have SBTi validated targets by 2025.

Regarding the scope of counterparties included in this Template 3, it is important to note that this disclosure focuses on non-financial counterparties, while as a pre-dominantly retail based lender BOI's climate strategy encompasses all counterparties, including lending to households and SBTs on residential mortgages.

The Group's Annual Report (AR) serves as our primary disclosure, where we provide comprehensive updates on our progress in implementing our climate strategy. Individual SBT report cards in our FY2023 Annual Report track our progress against the six target categories (https://investorrelations.bankofireland.com/app/uploads/HoldCo-Annual-Report-2023-WEB.pdf, pages 37-40) and provide details on metrics, progress to date, convergence pathways and data quality. Targets have been validated by SBTi with reference to convergence pathways that are denoted in the report cards as follows: • SBTi 1.5°C: SBTi pathway designed to facilitate limiting warming to 1.5 degrees Celsius above pre-industrial levels. • ETP B2DS: Beyond 2 Degrees Scenario (B2DS) aims to limit with a 50% chance global temperature rise to 1.75 degrees Celsius above pre-industrial levels.

Progress to date is in line with management's expectations and is reflective of progress at a national level in terms of decarbonisation and the early stage of the Group's Sustainability strategy implementation.

Template 3 aims to capture the bank's alignment efforts with respect to the objectives of the Paris Agreement for a selected number of sectors with exposure to non-financial counterparties. The details disclosed in Template 3 for the Power Sector are aligned with those currently covered in Bank of Ireland's climate strategy where SDA targets have been set and are tracked in our Annual Report. If the other additional Template 3 NACE sectors come into scope for the Group's climate target setting strategy on a sector decarbonisation approach in the future, details will be included accordingly in this template (given low materiality these sectors are currently incorporated under the corporate lending portfolio coverage target approach).

For the power generation sector, the target scope is on project finance electricity generation activity, where the convergence pathway is SBTi 1.5°C and the choice of the alignment metric is emissions intensity (kg of CO2e/kWh). The basis of preparation utilises power output and associated emissions based on individual counterparty data gathered as part of the project finance customer engagement and credit assessment process.

The project finance electricity generation (Power sector) is primarily comprised of renewable energy assets and is therefore starting at a lower level of intensity of emissions in its 2020 baseline (0.155 kgCO2/kWh). BOI's targeted 2030 intensity of 0.058 kgCO2/kWh reflects a 63% reduction versus the BOI baseline and emissions intensity is reducing aligned to a linear path towards this 2030 target. This sees BOI's current carbon intensity below the IEA 2030 target of 0.138 kgCO2/kWh with further reductions planned in the next three years in line with the Group's convergence path to target.

Index

Table 10.4 below shows the exposures towards the top 20 carbon-intensive companies in the world.

Table 10.4 - Template 4 - Banking book - Climate change transition risk: Exposures to top 20 carbon-intensive firms

*For counterparties among the top 20 carbon emitting companies in the world

Template 4: Banking book - Climate change transition risk: Exposures to top 20 carbonintensive firms

The purpose of this disclosure is to show aggregate exposure to the 20 most carbon-intensive companies globally. The Group selected the following top 20 lists of carbon intensive counterparties globally from two sources referenced by the ECB guidance for this exposure assessment:

-Climate Accountability Institute (CAI) -Carbon Disclosure Project (CDP)

For the June 2024 disclosure, these top 20 lists were reviewed to determine if the Group had any exposure to any of the counterparties on the listings in the banking book. This assessment resulted in a nil exposure return.

Template 5: Banking book - Climate change physical risk: Exposures subject to physical risk

Physical Risk Assessment

The Group has developed capabilities to identify, measure and monitor the potential financial impacts emerging from climate-related physical risks. For this purpose, the Group has acquired date from Moody's to assess physical risks, also used by the ECB to provide physical risk assessments for the 2022 ECB Climate Stress Test.

The data provided by Moody's provides coverage at a NUTS 3 level (See Footnote 1) across six sub-types of physical risk that have been categorised into acute and chronic physical risk categories as follows:

Acute Physical Risks:

Floods

Hurricanes & Typhoons

Wildfires

Chronic Physical Risks:

Heat Stress

Sea Level Risk

Water Stress

For exposures collateralised by immovable property (residential and commercial), in line with guidance the collateral location is used to assign exposures to the NUTS3 regions level to assess the exposure to physical risk. Where the lending is not collateralised, the country of risk is used.

- If any of the three chronic risks together with any of the three acute risks are classed as "Highly Exposed" for that region – the exposure is classed as Sensitive to Impact from both Chronic and Acute Physical Risks – column (j), if applicable.

- Else if any of the three chronic physical risks are classed as "Highly Exposed" for that region – the exposure is classed as "Sensitive to Impact from Chronic Physical Risks" - column (h)

- Else if any of the three acute physical risks are classed as "Highly Exposed" for that region – the exposure is classed as "Sensitive to Impact from Acute Physical Risks" – column (i)

Additional Risk Assessment

As an additional step a more property specific physical risk assessment has been undertaken for properties in ROI and UK that are residential or commercial property collateral for lending exposures. The locations of these properties have been geo-coded for flood risk assessment. Using latitude and longitude, properties are matched to building and street based on address data available.

JBA Flood Risk Management are a leading provider of climate flood modelling in the Irish and UK market. Flood scores, based on JBA's flood damage to property dependent on the type, frequency and depth of flooding modelled across different return periods; for example, coastal flooding will involve salt water, which can cause more property damage than river flood score. The scoring ranges from 0 to 53, with 0 being lowest and 53 being the highest risk. The flood scores are projected forward based on the RCP 8.5 Pathway (See Footnote 2) where emissions continue to rise throughout the 21st century and global temperatures increase by 2100 by 3.2 to 5.4 degrees.

Properties classed at high risk of flooding are:
Properties in ROI with a score of 31 and above by 2050 on an undefended basis (See Footnote 3)
Properties in UK with a probability of a flood event occurring by 2030 of >5% (See Footnote 4)

Then if they have not already flagged as sensitive in the previous steps, the exposures collateralised by properties classed as high risk of flooding in 2050 are then classed as: • "Sensitive to Impact from Acute Physical Risks" – column (I); and • "Sensitive to Impact from both Chronic and Acute Physical Risks"" – column (j)."

Footnotes:

1 The Nomenclature of territorial units for statistics (NUTS 1, 2 and 3 respectively, moving from larger to smaller territorial units).

2 Representative Concentration Pathways for greenhouse gas concentration trajectories adopted by the IPCC (Intergovernmental Panel on Climate Change). The pathways describe different climate futures, all of which are considered possible depending on the volume of GHGs emitted in the years to come.

3 Undefended denotes that flood mitigating defences are not taken into account. The flood data provided is on an undefended basis in the Republic of Ireland as the Office of Public Works (OPW) currently only allows members of the Insurance Institute of Ireland access their defended areas data.

4 Probability based on projected JBA Flood Scores.

Table 10.6 below provides an overview of the KPIs calculated on the basis of the assets used for the calculation of the green asset ratio (GAR).

Table 10.6 - Template 6 - Summary of GAR KPIs (Turnover based¹)

		KPI		
	Climate change mitigation	Climate change adaptation	Total (Climate change mitigation + Climate change adaptation)	% coverage (over total
GAR stock	2.84	0.00	2.84	
GAR flow	6.31	0.00	6.31	

1 Based on the Turnover KPI of the counterparty.

2 Percentage of assets covered by the KPI over banks' total assets

Taxonomy KPIs

The Group reported on Taxonomy KPIs and green asset ratios (GAR) for the first time for 31 December 2023. The EU Taxonomy disclosures reported here as at 30 June 2024 in Pillar 3 are based on the turnover KPIs for counterparties. The total GAR covers the two climate-related (CCM and CCA) EU environmental objectives.

At 30 June 2024, the Group's total GAR based on turnover amounted to 2.8% of total covered assets (FY2023: 2.4%) with taxonomy-aligned activities amounted to €2.7 billion (FY2023: €2.4 billion). Gross carrying amount of total covered assets amounted to €96.1 billion as at 30 June 2024 (FY2023: €94.2 billion).

Total green asset ratio: Taxonomy-aligned activities as a proportion of total covered assets.

Total covered assets: Total assets excluding exposures to sovereigns and trading book. Total assets are defined according to the prudential consolidation of the Group per FINREP.

This template gives an overview of the KPIs calculated on the basis of templates 7 and 8.

- For the GAR stock, the figures reported correspond to the KPIs included in columns b, g and I respectively of template 8.

- For the GAR flow, the figures reported correspond to the KPIs included in row 1, columns r, w and ab of template 8.

Limitations in Data

When assessing Taxonomy-eligible and Taxonomy-aligned activities for financial and non-financial undertakings, actual published information provided by counterparties is required but is limited in scope at this point in time.

The Group's total GAR based on turnover amounted to 2.84% of total covered assets as at 30 June 2024. The Taxonomy-aligned activities amounted to €2.7billion at 30 June 2024 (FY2023: €2.3 billion). Gross carrying amount of total covered assets amounted to €96.1 billion as at 30 June 2024 (FY2023: €94.2 billion).

Reporting on Taxonomy-aligned activities for HY 2024 has been constrained due to current limitations on the availability of relevant information across key categories:

• When assessing Taxonomy-eligible and Taxonomy-aligned activities for financial and non-financial counterparties, actual information published by counterparties is required:

- published reporting on Taxonomy-alignment KPIs from financial undertakings is based on FY2023 reporting; and

- exposure to non-financial counterparties in the Group's corporate lending portfolio currently considered taxonomy eligible is limited at c.€321 million due to the eligibility criteria requiring counterparties to be large companies publicly listed in the EU. The alignment of this exposure is greater by €166 million based on the data reported by the eligible counterparties at FY2023

• One renewable energy project finance exposure of c. <43 million has been included as aligned in the GAR as it meets Local Government Financing eligibility criteria. Further cases will be under future consideration as reporting criteria regarding public-private joint ventures becomes more established.

• When assessing Taxonomy-eligible and Taxonomy-aligned activities for lending to households, other data limitations impact reporting:

Residential mortgage exposures of c. €2,648 million has been included in the GAR where they are not subject to high physical risk of flood and have been built before 31 December 2020. These exposures are aligned if collateralised by properties with an A EPC rating if Rol based and an A or B rating if UK based. Newly implemented EPC data collection processes in 2024 for ROI residential mortgages have had a positive impact on data availability - based on this information a further €323 million has been identified as taxonomy aligned ; and
 Electric Vehicle (EV) lending exposures originated since the beginning of FY2023 of c.€84 million are considered eligible per taxonomy criteria. However they are not classified as aligned due to the lack of available information in the industry to assess the vehicles against the Taxonomy DNSH (Do No Significant Harm) criteria.

Table 10.8 below provides information to show to what extend credit institutions' activities qualify as environmentally sustainable in accordance with Articles 3 and 9 of Regulation (EU) 2020/852 so that stakeholders can understand the actions put in place by the institutions to mitigate climate change transition and physical risks.

Index

Bank of Ireland Group plc

Table 10.9 below requires institutions to disclose in this template information and climate change mitigation and climate change adaptation. These mitigating actions and adaptation process for the objectives of climate change mitigation and climate change adaptation. These mitigating actions and activities shall include bonds and loans issued under standards other than the EU standards, like e.g. green loans; sustainability-linked to aspects on climate change; sustainability-linked loans that are linked to aspects on climate change; sustainability-linked loans that are linked to aspects on climate change; sustainability-linked loans that are linked to aspects on climate change; sustainability-linked loans that are linked to aspects on climate change; sustainability-linked loans that are linked to aspects on climate change.

Loans (e.g. green, sustainable, sustainability-linked under standards other than the EU standards)					ESG Template 7. The Group is an established provider of sustainable finance products which supports its customers in respect of climate change mitigation and
4	Other counterparties				climate change adaptation. The Group products include green mortgages, home loans to improve energy-efficiencies, electric vehicle finance through to green business loans for energy efficiency and the provision of sustainable linked loans to the Group's corporate customers.
		-	-	-	
	roup's Liquid Asset Portfolio, i.e. high quality liquid assets which can be s		-		

Green bonds disclosed in the template cover the Group's Liquid Asset Portfolio, i.e. high quality liquid assets which can be sold or pledged to facilitate the funding of unanticipated outflows. For a bond to be accepted as Green, a second party opinion (SPO) from a recognized provider must by maintained by the Portfolio Manager and independently validated by Group Market & Liquidity Risk (second line function). The Liquid Asset Portfolio Manager also utilises green bond indicators as provided by Bloomberg for cross-checking purposes.

The Group is an established provider of sustainable finance products which supports its customers in respect of climate change mitigation and climate change adaptation. The Group's products include green mortgages, home loans to improve energy-efficiency, electric vehicle finance through to green business loans for energy efficiency and the provision of sustainable linked loans to the Group's corporate customers.

Lending within the Green Eligible Assets Portfolio includes lending to green buildings (both residential and commercial), renewable energy and clean transportation (electric vehicles). The Group cumulatively to date has issued €4.75 billion in bonds through its Green Bond Framework with no new issuances in the half year to 30 June 2024.

For 31 December 2023, the Group first published the disclosures from its EU Taxonomy alignment exercise. The results for 30 June 2024 exercise has been disclosed in ESG Templates 6, 7 and 8. As a result of exercise, exposures of c.€2.7 billion from within the Green Eligible Assets Portfolio at 30 June 2024 have been recognised as EU Taxonomy aligned and therefore separately reported in ESG Template 6.

Glossary	Bank of Ireland Group plc
Advanced IRB Banking Book	Advanced Internal Ratings Based approach. The approach which allows banks to calculate their capital requirement for credit risk for their retail and non-retail portfolios using their own internally generated estimates of PD, LGD and CCF. These variables are then fed into a standard formula to calculate the capital requirement for the asset. Referred to as Retail IRB in this document. The Banking Book consists of all banking assets, liabilities and derivatives other than those held
Banking Book	with trading intent and booked on this basis in the Trading Book.
CRD	The CRD package transposes, via a Regulation and a Directive, the new global standards on bank capital (commonly known as the Basel III agreement) into the EU legal framework. The Capital Requirements Directive and the Capital Requirements Regulation were published in the Official Journal of the EU in June 2013 (also called CRD IV / CRR) and have been subsequently updated, including significantly in June 2021 (also called CRD V / CRR II). The legislation involves phased implementation.
Collateral	Property or assets made available by a borrower as security against a loan. Under a collateralisation arrangement, a party who has an obligation to another party posts collateral (typically consisting of cash or securities) to secure the obligation. In the event that the counterparty defaults on the obligation, the secured party may seize the collateral.
Counterparty Credit Risk	Counterparty credit risk (CCR) means the risk that the counterparty to derivatives and security finance transactions could default before the final settlement of the transaction's cash flows.
Credit Conversion Factor (CCF)	An estimate of the proportion of undrawn commitments expected to be drawn down at the point of default. The CCF is expressed as a percentage and is used in the calculation of Exposure at Default (EAD).
Credit Risk Standardised Approach	A method for calculating risk capital requirements using ECAI ratings (where available) and supervisory risk weights.
	A technique to reduce the credit risk associated with an exposure by the application of credit risk mitigants such as collateral, guarantees and credit protection.
Derecognition	The removal of a previously recognised financial asset or financial liability from an entity's balance sheet.
EBA	The European Banking Authority, formerly CEBS (the Committee of European Banking Supervisors).
Expected Loss	A regulatory calculation of the amount expected to be lost on an exposure using a twelve month time horizon and downturn loss estimates. Expected loss is calculated by multiplying the Probability of Default (a percentage) by the Exposure at Default (an amount) and Loss Given Default (a percentage).
External Credit Assessment Institution (ECAI)	An eligible External Credit Assessment Institution (ECAI) is an entity, other than an Export Credit Agency, that issues external credit assessments, and that has been determined by the competent authorities to meet the eligibility requirements set out in the Capital Requirements Directive. The credit assessment provided by the ECAI is used to provide a basis for capital requirement calculations in the Standardised approach for securitisation positions as well as an input into the IRB Institutions model. Further information on the use of ECAIs under the Standardised approach for other asset classes has not been disclosed due to immateriality.
Exposure at Default (EAD) Exposure Weighted Average (LGD)	The estimated value of the bank's exposure at the moment of the borrower's default determined under regulatory rules. Calculating the exposure weighted average LGD involves multiplying the exposure values by the relevant LGD, summing the answers and dividing by the total exposure values.
Exposure Weighted Average (PD)	Calculating the exposure weighted average PD involves multiplying the exposure values by the relevant PD, summing the answers and dividing by the total exposure values.

Average (PD)	relevant PD, summing the answers and dividing by the total exposure values.
Financial collateral comprehensive method	Takes into account price and volatility when valuing financial collateral for the purpose of credit risk mitigation.
Foundation IRB	The approach where institutions use their own estimates of PD to calculate risk weights for each exposure. Supervisory estimates of LGDs and EADs are used.
GMRA	Global Master Repurchase Agreements, are standard industry agreements that permit the netting and the collateralisation of repo type transactions.
Gross carrying amount	The gross carrying amount related to the exposures subject to impairment is the net of accumulated partial and total write-off.

Gross non- performing loans and advances (NPL) ratio	The gross NPL ratio is the ratio of the gross carrying amount of NPLs and advances to the total gross carrying amount of loans and advances subject to the NPE definition. For the purpose of this calculation, loans and advances classified as held for sale, cash balances at central banks and other demand deposits are to be excluded both from the denominator and from the numerator.
IFRS	International Financial Reporting Standards.
Internal Ratings Basel Approach (IRB)	Approach to credit risk under which a bank may use internal estimates to generate risk components for use in the calculation of their credit risk regulatory capital requirements. There are two approaches: Foundation and Advanced (including Retail).
Immateriality	The CRD permits non-disclosure where the information to be provided is not regarded as material. Information is deemed to be material under the CRD if its omission or misstatement could change or influence the assessment or decision of a user relying on that information for the purposes of making an economic decision. Any required items left out of this document due to immateriality are referenced in the relevant section of this document.
IRB Exposure Classes	• <i>Institutions:</i> Exposures to Financial Institutions authorised and supervised by the competent authorities and subject to prudential requirements. Includes exposure to Covered Bonds.
	• <i>Corporates:</i> CRD does not provide a definition of the corporate exposure class; it simply provides that any exposure not falling into any of the other exposure classes will be allocated to the corporate exposure class.
	• Secured by immovable property collateral: Residential mortgages.
	 Qualifying revolving: The exposures (to individuals) are revolving and unsecured. Primarily comprises of credit cards. Securitisation positions: Exposures belonging to a pool - as defined below under securitisation.
ISDA Leverage Ratio	ISDA is the International Swaps and Derivatives Association. ISDA Agreements are standard industry agreements issued by ISDA which permit the netting of derivative transactions. The leverage ratio is a monitoring tool which allows competent authorities to assess the risk of excessive leverage in their respective institutions.
Loss Given Default	The likely financial loss associated with default, net of collections / recovery costs and realised
(LGD) Mark-to-Market (MTM)	security. The act of recording the price or value of a security, portfolio or account to reflect its current market value rather than its book value.
Market Risk Standardised Approach	The Standardised approach to the determination of Pillar 1 capital for market risk in the trading book involves estimating a minimum required capital charge based on the difference in the re-pricing periods for assets, liabilities and derivatives (treated as equivalent on-balance sheet assets and liabilities). In addition, depending on the nature of the positions, it also provides for a specific risk charge. The total minimum capital charge is converted to a risk weighted asset equivalent for the trading book which is summed with other risk weighted assets in determining overall regulatory capital ratios.
Minimum capital	8% of RWA
requirements Net Value	Net value is the gross carrying value (pre CRM and CCF) of On and Off balance sheet exposures less specific credit risk adjustments (value adjustments and provisions per COREP including the Article 3 calendar provisioning).
Non-performing exposure (NPE)	'Non-performing exposures' (NPEs): These are: (i) credit-impaired loans which includes loans where the borrower is considered unlikely to pay in full without recourse by the Group to actions such as realising security, including FCR cases, and loans where the borrower is greater than 90 days past

	realising security, including FCR cases, and loans where the borrower is greater than 90 days past due and the arrears amount is material; and (ii) other / probationary loans that have yet to satisfy exit criteria in line with EBA guidance to return to performing.
Off Balance Sheet	Off balance sheet items include undrawn commitments to lend, guarantees, letters of credit, acceptances and other items as listed in Annex I of the CRR.
Operational Risk Standardised Approach	The Pillar 1 approach which allows banks to calculate their capital requirement in respect of operational risk by multiplying the gross income from each business line by the relevant factor specified in respect of that business line (as set out in CRD).
Originator	An entity which, either itself or through related entities, directly or indirectly, was involved in the original agreement which created the obligations or potential obligations of the debtor or potential debtor giving rise to the exposure being securitised; or an entity which purchases a third party's exposures onto its balance sheet and then securitises them.

Probability of Default (PD)	The likelihood that a debt instrument will default within a stated timeframe (For CRD this is a twelve month time horizon). For example, the probability of default of a certain loan is 2%; this means that there are 2 chances out of 100 that the borrower will default in the next 12 months.
Regulatory Basis	The application of the requirements in accordance with competent authority application of transitional provisions.
Risk Exposure Amounts (REA)	Risk Exposure Amount refers to an amount in respect of which capital requirements arise under CRR and is used interchangeably in this document with RWA. REA is used in the calculation of risk- based capital ratios. Total assets are calculated by applying predetermined calculations (set by the regulators) to the nominal outstanding amount of each on-balance sheet asset and the notional principal amount of each off-balance sheet item and incorporating risk weighted factors.
RWA Density (%) Securitisation	Total REA divided by Total EAD post CRM. Converting an asset such as a loan into a marketable commodity by turning it into securities. Assets are pooled and sold, often in unitised form, enabling the lender to reliquary the asset. Any asset that generates an income stream can be securitised - i.e. mortgages, car loans, credit-card receivables.
Settlement Risk	The risk to which a bank is exposed on certain transactions unsettled after their due date.
Stage 1	Stage 1 - 12 month Expected Credit Losses (ECL) (not credit-impaired). Financial instruments which have not experienced a significant increase in credit risk since initial recognition and are not credit-impaired. An impairment loss allowance equal Stage 1 - 12 month ECL is recognised, which is the portion of lifetime ECL resulting from default events that are possible within the next 12 months.
Stage 2	Stage 2 - Lifetime ECL (not credit-impaired). Financial instruments which have experienced a 'significant increase in credit risk since initial recognition' and are not credit-impaired. An impairment loss allowance equal to lifetime ECL is recognised, being the ECL resulting from all possible default events over the expected life of the financial instrument. 'Credit risk' in this context refers to the change in the risk of a default occurring over the expected life of the financial instrument.
Stage 3	Stage 3 - Lifetime ECL (credit-impaired). Credit-impaired financial instruments, other than Purchased or originated credit-impaired financial assets. An impairment loss allowance equal to lifetime ECL is recognised. The manner in which the Group identifies financial assets as credit- impaired results in the Group's population of credit-impaired financial assets being consistent with its population of defaulted financial assets (in accordance with Article 178 of the CRR) in scope for the impairment requirements of IFRS 9. This encompasses loans where: (i) the borrower is considered unlikely to pay in full without recourse by the Group to actions such as realising security (including 'forborne collateral realisation' (FCR) loans); and / or (ii) the borrower is greater than 90 days past due and the arrears amount is material.
SME	Small Medium Enterprise is defined as an enterprise which employs fewer than 250 people and
Specific Outlier Test (SOT) Standardised Exposure Classes	 whose annual turnover is less than €50 million, or annual balance sheet total less than €43 million. SOTs are a supervisory tool which assess whether exposures to IRRBB have an impact on an institution's economic value of equity or net interest income beyond specific thresholds. <i>Retail:</i> Exposures must be to an individual person or person or to a small or medium sized entity. It must be one of a significant number of exposures with similar characteristics such that the risks associated with such lending are substantially reduced and, the total amount owed, shall not, to the knowledge of the credit institution, exceed €1 million.
	• <i>Public Sector Entities:</i> Exposures to Public Sector Entities and non-commercial undertakings.
	 <i>Corporates:</i> In general, a corporate exposure is defined as a debt obligation of a corporate, partnership or proprietorship. <i>Exposures in default:</i> Where the exposure is past due more than 90 days or unlikely to pay.
	• <i>Exposures associated with particularly high risks:</i> Exposures associated with particularly high risks such as investments in venture capital firms and private equity investments.

Trading Book	 Institutions Corporates with short-term credit assessment: Exposures for which a short-term credit assessment by a nominated ECAI is available. Other items: Exposures not falling into the other exposure classes outlined. A trading book consists of positions in financial instruments and commodities held either with intent to trade, or in order to hedge other elements of the Trading Book. To be eligible for trading book capital treatment, financial instruments must either be free of any restrictive covenants on their tradebility.
Through-the-Cycle PI (TtC PD)	 tradability, or are able to be hedged completely. A version of the Probability of Default measure engineered to estimate the average one-year probability of default over an economic cycle. For example, if the TtC PD of a certain loan is 2% this means that there is, on average over an economic cycle, a 2 in 100 chance that the borrower will default in any given year.
