** Based on underlying performance, which excludes the impact of non-core items above

*** Capital Markets PBT +19% excluding impact of disposal of our 90.444% stake in J&E Davy Holdings Limited ("Davy") on 31 October 2006

"We have delivered a strong performance in the first-half of our financial year. Looking forward we are strongly positioned in our core markets and confident of our ability to maximise growth opportunities, albeit in an environment of moderating growth."

Brian Goggin, Bank of Ireland Group Chief Executive, commented

Group Performance Highlights (Underlying)*

- Strong business trends resulting in Group profit before tax growth of 12% (15% excluding disposal**)
- Investment strategies continue to deliver excellent growth
- Group income growth of 9% driven by strong lending and resources growth
- Excellent underlying cost / income jaws + 5%
- Further improvement in efficiency ratio (cost / income ratio down 2 percentage points to 51% due to firm cost management)
- Asset quality remains excellent annualised impairment charge 12bps
- Robust funding position underpinned by diversified programmes well-spread by product, geography, maturity and investor type
- Strong Capital ratios Total Capital and Tier 1 ratios at 11.1% and 7.6% respectively

Divisional Highlights (Underlying)*

- In Retail Republic of Ireland: PBT + 12%
 - o Leading franchise continuing to deliver strong volume growth
 - o Firm cost management driving significant efficiency gains
- In Bank of Ireland Life: Operating profit + 17%
 - o Excellent sales volume growth and effective cost-control driving performance
 - o PBT + 7% reflecting the negative impact of weaker stock markets and change in discount rate
- In Capital Markets: PBT + 8% (+19% excluding Davy**)
 - o Corporate Banking and Global Markets driving strong profit performance
 - Strong lending volumes in Corporate Banking well-spread across segments and geographies
 continuing excellent asset quality
 - o Customer Business contributing to excellent profit growth in Global Markets a strong performance in volatile markets
- In UK Financial Services: PBT + 16%
 - o Investment strategies delivering strong profit performance
 - o Business Banking delivering very strong lending and resource growth strong asset quality
 - o Maintaining excellent asset quality in our Mortgage Business while continuing to optimise returns in a challenging market
 - Our joint ventures with the UK Post Office are performing strongly excellent customer acquisition, sales growth and profit trends.

^{*} Underlying performance which excludes the impact of non-core items outlined on page 2 of this document

^{**} On 31 October 2006 we disposed of our 90.444% stake in Davy

Forward-Looking Statement

This document contains certain forward-looking statements within the meaning of Section 21E of the US Securities Exchange Act of 1934 and Section 27A of the US Securities Act of 1933 with respect to certain of the Bank of Ireland Group's ("the Group") plans and its current goals and expectations relating to its future financial condition and performance and the markets in which it operates. These forward-looking statements can be identified by the fact that they do not relate only to historical or current facts. Forward-looking statements sometimes use words such as 'aim', 'anticipate', 'target', 'expect', 'estimate', 'intend', 'plan', 'goal', 'believe', or other words of similar meaning. Examples of forward-looking statements include among others, statements regarding the Group's future financial position, income growth, business strategy, projected costs, estimates of capital expenditures, and plans and objectives for future operations. Because such statements are inherently subject to risks and uncertainties, actual results may differ materially from those expressed or implied by such forward-looking statements. Such risks and uncertainties include, but are not limited to, risks and uncertainties relating to profitability targets, prevailing interest rates, the performance of the Irish and the UK economies and the international capital markets, the expected level of credit defaults, the Group's ability to expand certain of its activities, development and implementation of the Group's strategy, including the ability to achieve estimated cost reductions, competition, the Group's ability to address information technology issues and the availability of funding sources. Any forward-looking statements speak only as of the date they were made. The Group does not undertake to release publicly any revision to these forward-looking statements to reflect events, circumstances or unanticipated events occurring after the date hereof. The reader should however, consult any additional disclosures that the Group has made or may make in documents it has filed or submitted or may file or submit to the US Securities and Exchange Commission.

Bank of Ireland will host a results presentation at 9.00am today, 14 November 2007 at the following venues:

Bank of Ireland Head Office, Lower Baggot Street, Dublin 2 UBS Investment Bank, 1 Finsbury Avenue, London EC2M 2PP

This presentation will be simultaneously webcast on our website: www.bankofireland.com/investor

This document constitutes the Interim Management Report required by Regulation 6 of the Transparency (Directive 2004/109/EC) Regulations 2007. It can also be found at our website: www.bankofireland.com/investor

INTERIM MANAGEMENT REPORT

Overview

Bank of Ireland Group has delivered a strong performance for the half-year to 30 September 2007. Group profit before tax (PBT) is up 24% to €1,091 million and basic earnings per share (EPS) up 26% to 95.8c. Excluding non-core items (outlined on page 17 of this document), Group underlying PBT is up 12% to €951 million and underlying EPS is up 10% to 80.1c. This performance is broadly based across the Group with our investment strategies continuing to deliver strong volume growth across all Divisions. Our efficiency drive continues to deliver excellent results with our cost / income ratio down a further 2 percentage points to 51% and a positive cost / income jaws of 5%. Loan losses remain low and asset quality continues to be excellent.

This strong Group performance was delivered in an increasingly challenging environment.

Since August global financial markets have been experiencing one of the most significant dislocations in recent decades. Financial institutions are facing higher funding costs, more limited access to funding and concerns regarding exposures to US sub-prime mortgages.

Bank of Ireland has managed its funding effectively through this period of volatility, its asset quality remains excellent, and the negative impact on our profit of the higher funding environment is modest in this half-year reporting period. Funding costs, while improved somewhat from their extreme positions in early August, remain at significantly higher levels and will likely negatively impact our rate of profit growth in the second half of our financial year.

In Ireland the recent very high rate of economic growth is moderating, primarily reflecting the anticipated housing market correction which in turn is having a negative impact on consumer and business sentiment. This slowing level of economic growth, which still remains well above the eurozone average, is expected to prevail into next year and will likely result in a lower growth in demand in the second half of our financial year to March 2008.

Outlook

Looking to the second half of our financial year underlying momentum in our business remains positive but is moderating in line with reduced economic growth in our main markets.

Against this less favourable global economic backdrop, and the continuing volatility in financial markets, we are guiding high single digit underlying EPS growth for the year to 31 March 2008 (from a base of 144.6c for the year to 31 March 2007).

_

¹ On 31 October 2006 we disposed of our 90.444% stake in Davy. Excluding the profit contribution of Davy in the prior comparative period, underlying PBT grew by 15% and underlying EPS grew by 13% in the half-year to 30 September 2007 on an adjusted EPS of 70.9c for the half-year to 30 September 2006.

Review of Group Performance

Group Income Statement

The following commentary is based on the Group's performance excluding the impact of non-core items. A reconciliation of the impact of these non-core items on the income statement line items is shown on pages 17 and 18 of this document.

Income

Total income increased by 9% to €2,047 million driven by strong volume increases in both lending and resources across the Group, together with the excellent performance from our fee-earning activities. Total income after adjusting for the impact of the Davy disposal increased by 13% half-year on half-year.

Total Income

	Half-Year 30 Sept 2007 €m	Half-Year 30 Sept 2006 €m	Change %
Total operating income Trading impact of disposal	2,047	1,881 (77)	9
Total income excluding trading impact of disposal	2,047	1,804	13

^{**} Excludes the impact of non-core items after tax €129m (September 2006: €8m)

Net Interest Income and Other Income growth is distorted by the trading impact of the Davy disposal together with the classification of certain interest expense under IAS 39. Excluding both of these factors, **Net Interest Income** grew by 14% to €1,421 million and **Other Income** by 13% to €626 million.

Net Interest Income

	Half-Year 30 Sept 2007 €m	Half-Year 30 Sept 2006 €m	Change %
Net interest income	1,532	1,287	19
Trading impact of disposal	-	(1)	
IAS 39 impact	(111)	(36)	
Net interest income excluding trading impact of disposal & IAS 39	1,421	1,250	14

The strong performance in net interest income was driven by the continued strong growth in loans and resources across the Group. Loans to customers increased by 14% and resources grew by 8%. A number of drivers contributed to this volume growth: the strength of our franchise in Ireland; supported by the scale of our multichannel distribution network; the further delivery from our investment in our UK Business Banking and international Corporate Banking teams.

Net Interest Margin

	Half-Year 30 Sept 2007	Half-Year 30 Sept 2006	Change
Average interest earning assets (€Billion)	173	149	16%
Net Interest Margin (%)	1.77	1.73	4bps
IAS impact on Net Interest Margin (%) Net interest margin excluding impact of IAS 39 IAS 39 impact	1.64 0.13	1.68 0.05	(4bps) 8bps
Net Interest Margin	1.77	1.73	4bps

Net interest margin increased by 4bps to 1.77% for the half-year to 30 September 2007 from 1.73% for the half-year to 30 September 2006. Net interest margin is increased by the classification of certain interest expense under IAS 39 which relates to the designation of certain financial instruments under the fair value option, excluding this impact in the current and prior period, margin attrition was 4bps.

The primary drivers of margin attrition are balance sheet structure with loan growth outpacing resource growth, competition in pricing for lending products, partly offset by improved resource margins.

Other Income

	Half-Year 30 Sept 2007 €m	Half-Year 30 Sept 2006 €m	Change %
Other income	515	594	(13)
Trading impact of disposal	-	(76)	
IAS 39 impact	111	36	
Other income excluding trading impact of disposal			
& IAS 39	626	554	13

Other income growth drivers include: strong sales growth in our Life business; higher arrangement fees in Corporate Banking; increased sales of insurance products in Post Office Financial Services (POFS); increased fees from our broad product range in Retail Republic of Ireland.

Operating Expenses

Total Operating Expenses increased by 4% in the half-year to 30 September 2007 or by 9% excluding the impact of the Davy disposal. Efficiency improvements remain a core focus and we continue to make significant progress in this regard. Our cost / income ratio continues to improve with a further reduction of 2 percentage points from 53% in the half-year to September 2006 to 51% in the half-year to September 2007.

Total Operating Expenses

	Half-Year	Half-Year	Change
	30 Sept	30 Sept 2006	%
	2007	€m	
	€m		
Operating expenses	1,050	1,010	4
Trading impact of disposal		(51)	
Operating expenses excluding trading impact of disposal	1,050	959	9

The main drivers of the increase in total operating expenses (excluding the trading impact of disposal) were:

- Investment costs of 2% relating to the continuing international development of our Global Markets and Corporate Banking activities together with the costs associated with the launch of new products in UKFS.
- Business as usual cost growth of 9% where 4% is due to volume growth and performance related compensation and 5% is due to inflation.
- Cost savings of (2%) arising from the continued successful implementation of the Strategic Transformation Programme in the current period.

We have continued to make excellent progress in the implementation of the Strategic Transformation Programme and are confident of delivering annualised savings of €140 million by March 2008 and thus complete the Programme at that date, one year ahead of schedule and delivering savings in excess of our original target of €120 million.

Impairment of Loans and Advances

Asset quality remains excellent.

The impairment charge for the half-year to 30 September 2007 amounts to €79 million or 12bps, when expressed as an annualised percentage of average loans, 3bps higher than the half-year to September 2006. We continue to maintain a satisfactory level of provisions against impaired loans, with a coverage ratio of 44%. We are comfortable with this coverage ratio, particularly as residential mortgages represent 46% of our total lending. Total balance sheet provisions were €482 million at September 2007, compared with €398 million in September 2006. Impairment provisions as a percentage of actual loans are 36bps, the ratio being 3bps for the Group mortgage book and 64bps for non-mortgage lending.

Asset Quality

	Half-Year 30 Sept 2007	Half-Year 30 Sept 2006	Change
Loans and advances to customers (net of provisions) (€Billion)	133	114	17%
Total average customer advances (€Billion)	132	109	21%
Impaired loans (€Million)	1,101	844	30%
Impaired loans as a percentage of loans and advances (bps)	82	74	8
Impairment provision (€Million)	482	398	21%
Coverage ratio (%)	44	47	
Impairment losses on loans and advances (€Million)	79	48	65%
Impairment losses on loans and advances (annualised bps)	12	9	3

Share of Associates and Joint Ventures

Profit after tax from associated undertakings and joint ventures, which mainly relates to First Rate Exchange Services, increased from €29 million in the half-year to 30 September 2006 to €33 million in the half-year to 30 September 2007, supported by robust margin performance and increased overseas travel.

Balance Sheet – Capital and Funding

Total assets increased by 12% from €178 billion to €200 billion in the year to 30 September 2007. The rate of growth of customer lending and total resources moderated compared to the prior period, with increases of 14% and 8% respectively.

Pre-securitisation risk weighted assets grew by 16% (18% on a constant currency basis). Post-securitisation risk weighted assets grew by 12% from €109 billion to €122 billion.

	% Growth September 2007 over September 2006		
	Risk Weighted	Customer Lending	Resources
	Assets		
Retail Republic of Ireland	21	18	4
Capital Markets	15	23	4
UK Financial Services (Sterling)	15	16	31
Group	16	14	8

Capital

The Group has strong capital resources and our proactive approach to capital management ensures that we have adequate capital to support our business plans.

	30 Sept 2007	30 Sept 2006
Risk Weighted Assets (€Billion)	122.2	109.3
Total Capital Ratio (%)	11.1	10.9
Tier 1 Ratio (%)	7.6	7.7
Equity Tier 1 Ratio (%)	4.9	4.5

During the reporting period the Group implemented a number of capital management initiatives. We raised US\$600 million (\$\epsilon\)22 million) of Lower Tier 2 Capital. In addition, the Group completed the sale and leaseback of a second tranche of 30 retail branches in Ireland.

In October 2007, we completed a €400 million embedded value securities issue, which references the future cash flows from our life assurance business. Had this transaction been completed at the end of September 2007, this would have increased the September 2007 Tier 1 and Equity Tier 1 ratios from 7.6% and 4.9% to 8.0% and 5.3% respectively.

Funding

Wholesale funding at 46% of the total balance sheet (excluding Bank of Ireland Life assets held on behalf of policyholders) compares to 46% at 31 March 2007 and 44% at 30 September 2006.

Balance Sheet Funding	30 Sept 2007	30 Sept 2006
	%	%
Deposits by banks	10	18
CP/CDs	14	12
Securitisations	6	-
Senior Debt / ACS	16	14
Wholesale Funding	46	44
Customer Deposits	41	43
Capital / Subordinated Debt	8	8
Other	5	5
Total	100	100

Wholesale funding is managed to ensure optimum diversification across maturity, investor type and geography and to minimise the concentration of funding within each particular market segment. Having significantly lengthened the maturity profile of wholesale funding in recent years, including the two mortgage securitisations undertaken in March 2007, the Group was very well placed when the current market turmoil commenced. Over 80% of our loan book at September 2007 was funded by customer deposits and term funding with a maturity profile greater than one year. The Group's position was further underpinned by the introduction of the new liquidity regime for Irish banks in July 2007, which moved from a stock to a maturity mismatch approach. During the half-year to 30 September 2007 the Group issued its third US Extendible Note Transaction raising US\$1.75 billion.

The Group remains well placed to access wholesale funding sources. The Group's funding strategy remains to grow core customer deposits and to access wholesale funding in a prudent, diversified and efficient manner. The Group is confident that our funding strategy continues to support both our immediate business needs and our planned growth over the medium term.

Effective Tax Rate

The taxation charge for the Group was €164 million in the half-year to 30 September 2007 compared to €154 million in the half-year to 30 September 2006.

Excluding the effect of non-core items, the effective tax rate for the half-year to 30 September 2007 was 16.0% compared to 15.8% (restated) for the half-year ending 30 September 2006.

Dividend

In accordance with Group policy, the Interim Dividend is set at 40% of the prior year total distribution per unit of Ordinary Stock. The Court has therefore declared an Interim Dividend of 24.2 cent per unit of Ordinary Stock, (circa €233 million); which results in an increase of 15% over the corresponding period last year. This dividend will be paid on or after 15 January 2008 to Stockholders who are registered as holding Ordinary Stock at the close of business on 23 November 2007.

Return on Equity

Return on equity, excluding the impact of non-core items (set out on pages 17 and 18) was 22% for the half-year to 30 September 2007, compared to 25% for the half-year to 30 September 2006 and 23% for the year to March 2007.

Divisional Performance

Divisional Profit Before Tax

	Half-Year 30 Sept 2007	Half-Year 30 Sept 2006	Change %
	€m	€m	, -

Non-core items*	140	27	
Profit before tax	1,091	879	24

^{*} Restated for change in accounting policy - see page 24

Retail Republic of Ireland

Retail Republic of Ireland delivered a strong performance for the half-year to 30 September 2007 with profit before tax growth of 12% to €381 million. Total operating income grew by 14% and operating expenses rose by 10%, a 4% positive cost / income jaws. While markets were generally less buoyant, the continued strength of our leading franchise in Ireland underpinned the strong performance – broad distribution platform, comprehensive suite of retail and business products and services, commitment to service excellence and operating efficiency.

Retail Republic of Ireland: Income Statement

	Half-Year 30 Sept 2007 €m	Half-Year 30 Sept 2006 €m	Change %
Net interest income	708	632	12
Other income*	226	189	20
Total operating income	934	821	14
Total operating expenses	(496)	(449)	10
Operating profit before impairment losses	438	372	18
Impairment losses on loans and advances	(57)	(33)	73
Profit before tax	381	339	12

^{*} Includes share of associates / joint ventures (September 2007 €nil; September 2006 €0.9m)

The impact of rising interest rates in the past eighteen months and poorer consumer and business sentiment has had a moderating impact on lending and deposit growth with lending and resources volumes at the end of September 2007 up by 18% and 4% respectively. Growth in our mortgage book slowed to 16% while the Business Banking loan book grew by 22%. A lower net interest margin resulted from loans growing faster than deposits, more rapid growth in lower margin lending business and residential mortgage competition, partly offset by improved resource margins.

Other income increased by 20% driven mainly by an excellent performance in our Private Banking business and strong growth in Credit Card activity together with the benefit from the disposal of Mastercard shares which accounted for 5 percentage points of this increase.

Costs grew by 10%. This was driven broadly in equal measure by salary / general inflation and by business growth, with further efficiency gains reducing the cost / income ratio from 55% to 53%.

While impairment losses on loans and advances increased from €3 million to €7 million (16bps to 23bps annualised of the average loan book) the charge remains low by historical standards and asset quality continues to be strong.

Bank of Ireland Life

Bank of Ireland Life, the Group's life assurance business, continues to perform strongly with impressive sales growth and effective cost control the main drivers of performance.

The Life business achieved excellent growth in new sales volumes in the half-year to 30 September 2007 with a 27% increase to €254 million on an annual premium equivalent basis. New sales of regular premium and single premium investment products have been particularly strong in the period, driven in part by the maturity of the government SSIA contracts. The business has benefited from economies of scale following investment in its life administration platforms and is now investing to enhance processing capability for individual pensions. Improved efficiencies led to the cost / income ratio falling from 41% in the prior comparable period last year to 39% in the half-year to 30 September 2007.

Bank of Ireland Life has a leading position in the Irish market resulting from the combination of our multichannel distribution platform and industry leading bancassurance sales model. This combination leaves the Life business well positioned to compete in a market place that remains very attractive over the medium term.

IFRS Performance

AS L erjormunce	Half-Year 30 Sept 2007 €m	Half-Year 30 Sept 2006 €m	Change %
Operating income	137	121	13
Operating costs	(54)	(50)	8
Operating profit	83	71	17
Investment variance	(5)	(4)	
Discount rate change	(6)	-	
Profit before tax	72	67	7

Operating profit grew by 17% to €3 million. Profit before tax at €72 million was 7% higher than the half-year to September 2006. Investment markets were volatile in the period and the business recorded a negative investment variance of €5 million. Continuing investment market volatility will impact both investor sentiment and revenues in the second half of our financial year. Consistent with increases in the long-term bond yields, the discount rate applied to future cashflows was increased by 0.5% to 8.0% in the period. This was significantly offset by an increase of 0.75% to 6.25% in the future growth rate assumption on unit linked assets resulting in a net cost of €6 million.

Embedded Value Performance

The alternative method of presenting the performance of our Life business is on an Embedded Value basis. This method is widely used in the life assurance industry and also shows a very strong performance with operating profits up 23% to €100 million. New business profit has grown strongly in line with strong sales growth and existing business profits have also performed well as a result of a rapidly growing portfolio, continuing favourable experience variances and some changes to the actuarial assumptions in line with experience.

Profit before tax grew by 23%, which included a higher negative investment variance in the half-year to 30 September 2007 compared to the half-year to 30 September 2006. Under the Embedded Value methodology, the negative impact of increasing the discount rate by 0.5% to 8.0% is offset by an increase of 0.75% to 6.25% in the future growth rate assumption on unit linked assets.

Embedded Value Performance	Half-Year 30 Sept 2007 C m	Half-Year 30 Sept 2006 €m	Change %
New business profits	56	45	24
Existing business profits			
- Expected return	47	39	
- Experience variance	8	8	
- Assumption changes	6	4	
Inter-company payments	(17)	(15)	
Operating profit	100	81	23
Investment variance	(18)	(15)	
Discount rate change	(1)	· -	
Profit before tax	81	66	23

The key assumptions used in the Embedded Value methodology are a discount rate of 8.0% (September 2006: 7.5%), future growth rate on unit linked assets of 6.25% (September 2006: 5.5%) and the rate of tax assumed to be levied on shareholder profits of 12.5% (September 2006: 12.5%). Actuarial assumptions are also required in relation to mortality, morbidity and persistency rates and these have been derived from the company's experience.

Capital Markets

Capital Markets Division comprises Corporate Banking, Global Markets, Asset Management Services and IBI Corporate Finance. Profit before tax increased by 8% to €309 million for the half-year to 30 September 2007. The Divisional performance for the half-year to 30 September 2007 is not directly comparable with the half-year to 30 September 2006 as the disposal of Davy in October 2006 impacts the half-year on half-year analysis of profit, income and cost growth. Excluding the impact of this disposal, profit before tax increased by 19%.

Capital Markets: Income Statement

	Half-Year 30 Sept 2007 €m	Half-Year 30 Sept 2006 G m	Change %	Change % excluding impact of IAS 39 & disposal
Net interest income	419	285	47	26
Other income	100	229	(56)	8
Total operating income	519	514	1	18
Total operating expenses	(199)	(224)	(11)	14
Operating profit before impairment losses Impairment losses on loans	320	290	10	21
and advances	(11)	(4)	175	175
Profit before tax	309	286	8	19

Total operating income was 1% higher in the half-year to 30 September 2007 against the prior year comparable period. Excluding the trading impact of the Davy disposal, total operating income increased by 18% driven by an excellent performance in Global Markets and strong lending volume growth in Corporate Banking.

The growth in net interest income and other income is distorted by the trading impact of the disposal as outlined above, together with the classification of certain interest expense under IAS 39 which relates to the designation of certain financial instruments under the fair value option. Excluding both of these factors, net interest income increased by 26% and other income increased by 8%.

The 26% growth in net interest income was driven by strong volume growth and improved margins reflecting the mix of the loan book. Other income growth of 8% has been impacted by lower assets under management in Asset Management Services.

Total operating expenses decreased by 11% to €199 million. Excluding the trading impact of the Davy disposal, total operating expenses increased by 14%. There were three main drivers of operating expenses within the

Division: investment costs (5%), volume related growth (4%) and inflation (5%).

Operating income has continued to exceed cost growth notwithstanding significant investment being made in the ongoing expansion of our product and distribution capabilities in our Corporate Banking and Global Markets businesses.

Credit quality remains strong with impairment losses on loans and advances of €11 million or 8bps annualised compared to 4bps in the half-year to September 2006.

Profit before tax	309	286	8

Corporate Banking has maintained its strong momentum with profit growth of 18% for the half-year to 30 September 2007. The loan book increased by 23% across a broad range of portfolios to September 2007 compared to September 2006. We continue to closely manage our asset quality and continue to see good opportunities for growth in both Europe and the US. We are beginning to see a trend towards improved pricing and risk structures across our business segments which augers well for the growth outlook for our portfolios.

Global Markets delivers a comprehensive range of risk management products to the Group's customer base and acts as Treasurer for the Group. Profit for the half-year to 30 September 2007 increased by 31%. The performance of our markets / trading teams has been very strong in volatile market conditions and our customer businesses globally have delivered an excellent performance.

Asset Management Services profit before tax for the half-year to 30 September 2007 was €3 million, which is in line with the comparable period last year. Assets under Management in BIAM are €39 billion at September 2007, compared to €43 billion at September 2006.

Division centre includes central management costs for the Division, together with IBI Corporate Finance (and Davy in the half-year to 30 September 2006). IBI Corporate Finance continues to perform well.

UK Financial Services (Sterling)

The UK Financial Services Division (UKFS), which incorporates Business Banking, our Mortgage business and our joint ventures with the UK Post Office, delivered a strong performance during the half-year to 30 September 2007 building on the excellent momentum shown in the comparable period last year. Profit before tax increased by 15% to £175 million (16% on a euro equivalent basis).

UKFS: Income Statement (Sterling)

Profit before tax	175	152	15	15

^{*} Includes share of associates / joint ventures (September 2007 £23m; September 2006 £19m)

Total operating income rose by 12% to £364 million for the half-year to 30 September 2007. The growth in net interest income and other income is distorted by the classification of certain interest expense under IAS 39. Excluding this, net interest income grew by 12% and other income by 14%. Net interest income growth was due to excellent volume growth for both lending (+16%), and resources (+31%). Other income grew on the back of a strong performance in our joint ventures with the Post Office, notably increasing fee income from the sales of insurance products in Post Office Financial Services (POFS) and higher profits in First Rate Exchange Services (FRES).

Operating expenses increased by 10% to £181 million for the half-year to 30 September 2007, due to higher regulatory, restructuring and compliance costs and volume related expenses across the Division. Further efficiency gains reduced the cost / income ratio from 51% to 50%.

Asset quality remains excellent with impairment losses on loans and advances of 4bps annualised compared to 5bps in the half-year to 30 September 2006.

The performance of Business Banking is a particular highlight, with profit before tax increasing by 33% to £93 million. Our continued investment in building a high-performing team of business bankers is delivering very strong results. Volume growth is strong with loan book growth of 28% and resource growth of 21% compared to 30 September 2006. Margins remain stable and asset quality is strong.

The Mortgage business delivered a profit of £72 million, similar to the performance in the second half of our 2006 / 2007 financial year and marginally lower than the comparable prior period. There are a number of factors influencing this outcome: the impact of the rising yield curve and base rate increases, the cost of securitisation and funding, and the impact of competition on both new business and margins. In this environment, we have sought to optimise returns and this has kept margin attrition to 7bps but has impacted volumes. The residential mortgage book increased by 9% to £25 billion with good growth in the buy-to-let specialist portfolio being offset by a slowdown in self-certified and standard business. Credit performance remains excellent with our arrears levels significantly below the industry average and the loan loss charge for mortgages showed no change from September 2006.

Our Consumer Financial Services businesses which are run on a joint venture basis with the UK Post Office delivered a strong performance with profits almost doubling. POFS has made good progress with customer numbers increasing to 1.2 million at 30 September 2007 with the business continuing to add approximately 50,000 new customers every month. We are still growing market share in insurance products and continued to experience strong volume growth in Instant Saver accounts. Total resources in POFS were £2.5 billion at 30 September 2007. Policy renewals on insurance products and retentions after the initial incentive period on savings accounts are both at industry leading levels. FRES, our second joint venture with the UK Post Office for the provision of personal foreign exchange services, delivered profit growth of 21%, as a result of robust margin performance and increased overseas travel.

Division centre reported a net loss of £14 million compared to £5 million in the prior comparable period. This increase reflects a number of items including the costs associated with the corporate restructuring of Bristol & West to obtain the optimum capital and funding treatment for the Group under Basel II.

Group Centre

Group Centre, which comprises earnings on surplus capital, unallocated support costs and some smaller business units, had a net loss of €68 million in the half-year to 30 September 2007, compared to €62 million in the half-year to 30 September 2006. The key driver behind the higher net loss is increased funding costs of additional capital raised between September 2006 and September 2007.

Statement of Directors' Responsibilities

The Directors are responsible for preparing the Interim Statement in accordance with International Accounting Standard 34 (IAS 34) and the Transparency (Directive 2004/109/EC) Regulations 2007 and the Transparency Rules of the Irish Financial Services Regulatory Authority.

The Directors confirm that the condensed set of financial statements have been prepared in accordance with IAS 34 and that they give a true and fair view of the assets, liabilities, financial position and profit of the Group and that as required by the Transparency (Directive 2004/109/EC) Regulations 2007, the Interim Statement includes a fair review of:

- important events that have occurred during the first six months of the year;
- the impact of those events on the condensed financial statements;
- a description of the principal risks and uncertainties for the remaining six months of the financial year (see page 5); and
- details of any related party transactions that have materially affected the Group's financial position or performance in the half-year to 30 September 2007.

^{*} Restated for change in accounting policy - see page 24

1 ACCOUNTING POLICIES AND PRESENTATION OF FINANCIAL INFORMATION

The accounting policies applied by the Group in the preparation of the interim financial statements for the half-year ended 30 September 2007 are in accordance with the recognition and measurements principles of International Financial Reporting Standards as adopted by the EU and are the same as those set out in the Annual Report and Accounts for the year ended 31 March 2007. The following standards / amendments to standards have been adopted by the Group from 1 April 2007:

IFRIC 9 – Reassessment of Embedded Derivatives. This interpretation requires an entity to assess whether a contract contains an embedded derivative at the date an entity first becomes party to a contract and prohibits reassessment unless there is a change to the contract that significantly modifies the cash flows. The adoption of this interpretation has not had a material impact on the Group.

IFRIC 10 – Interim Financial Reporting and Impairment. This interpretation clarifies that any impairment losses on goodwill and equity instruments recognised in an interim period may not be reversed in subsequent interim periods. This does not have a material impact on the Group.

Amendment to IAS 1 – Capital Disclosures. This amendment requires disclosure, both quantitative and qualitative, of an entity's objectives, policies and processes for managing capital. The financial statements for the year ended 31 March 2008 will include some additional disclosures as required by this standard.

IFRS 7 – Financial Instruments: Disclosures. This standard updates and augments the disclosure requirements of IAS 30, IAS 32 and IFRS 4 and requires additional qualitative and quantitative disclosures relating to risk management policies and processes. These additional disclosures will be included in the financial statements for the year ended 31 March 2008.

The full IFRS 7 disclosures and the Capital disclosures required by the amendment to IAS 1 will be given in the Group's Annual Report and Accounts.

These interim financial statements comply with IAS 34 'Interim Financial Reporting'. The Group has adopted IAS 34 during this period as part of its adoption of the EU Transparency Directive.

These interim financial statements do not comprise statutory accounts within the meaning of Section 19 of the Companies (Amendment) Act 1986. The statutory accounts for the financial year ended 31 March 2007 were approved by the Court of Directors on 30 May 2007 and contained an unqualified audit report and have been filed with the Companies Office on 14 August 2007.

Following a change in the Group's method of assessing materiality, the income statement for the half-year to 30 September 2006 and the balance sheet as at 30 September 2006 have been restated. Further detail on this change in method of assessing materiality is set out on page 86 of the Group's Annual Report and Accounts for the year ended 31 March 2007. The impact of this restatement on the half-year to 30 September 2006 has been as follows: Life assurance investment income and gains has been reduced by €4 million from €44 million, as previously reported in September 2006, to €40 million. Other operating income has been reduced by €4 million from €121 million, as previously reported, to €17 million. This results in a total restatement of profit before tax for September 2006 from €87 million to €879 million. Basic earnings per share for September 2006 have been reduced from 76.7c to 75.9c. Assets at fair value through p / 1 as at 30 September 2006 have been reduced by €138 million from €10,984 million to €10,846 million, with a corresponding reduction in retained profits from €3,669 million to €3,531 million as at that date.

2 ACQUISITIONS AND DISPOSALS

To 30 September 2007

There were no acquisitions or disposals in the half-year to 30 September 2007.

To 30 September 2006

Paul Capital Investments:

On 20 June 2006 the Bank entered into a joint venture partnership with Paul Capital Partners, a leading US private equity specialist, establishing Paul Capital Investments LLC providing private equity fund of funds products and advisory services to institutional and other investors worldwide. The consideration at the time of acquisition was US\$25 million. The acquisition is currently being accounted for as a joint venture using the equity method of accounting.

Guggenheim Advisors:

On 20 January 2006 the Bank acquired a 71.5% interest in Guggenheim Advisors. The final cash consideration for the transaction was US\$148 million.

Profit on Disposal

On 21 April 2006 the Bank completed the sale of Enterprise Finance Europe GmbH for a consideration of €0 million giving rise to a profit on disposal of €8 million.

To 31 March 2007

On 31 October 2006 the Bank completed the sale of its 90.444% equity stake in Davy Stockbrokers to the management and staff of J&E Davy Holdings Limited. The profit on disposal was €229 million.

In addition, €6 million was written back to the Group income statement in relation to costs provided, at 31 March 2006, against anticipated expenses in exiting certain contracts relating to the disposal of the Bristol & West branch network.

3 SEGMENTAL ANALYSIS

The segmental analysis of the Group's results and financial position is set out below by business class and by geographic segment. For the geographic analysis Ireland (excluding Northern Ireland) includes profits generated in the International Financial Services Centre. Revenue is defined as gross interest income, non interest income, insurance net premium income, net of insurance claims and income from associates and joint ventures. The Group has five business classes detailed in the table below. In October 2006, the Wholesale Financial Services and Asset Management Services divisions were combined to form the Capital Markets Division. Prior period results have been adjusted to reflect this change. These segments reflect the internal financial and management reporting structure. The analysis of results by business class is based on management accounts information. Transactions between the business segments are on normal commercial terms and conditions. Internal charges and transfer pricing adjustments have been reflected in the performance of each business. Revenue sharing agreements are used to allocate external customer revenues to a business segment on a reasonable basis.

Certain of the Group's customer liabilities and debt securities issued have been designated at fair value. Both the interest expense and the fair value movement relating to these are included above. The impact of this is to reduce net trading income by €64 million (2006: (€54 million)) of which interest expense amounts to €11 million (2006: €36 million).

Net trading (expense) / income also includes the profits and losses arising both on the purchase and sale of trading instruments and from the revaluation to market value, together with the interest income earned from these instruments and the related funding cost.

17 RETIREMENT BENEFIT OBLIGATIONS

The Group operates a number of defined benefit and defined contribution schemes in Ireland and overseas. The defined benefit schemes are funded and the assets of the schemes are held in separate trustee administered funds. The most significant defined benefit scheme is the Bank of Ireland Staff Pension Fund which accounts for approximately 80% of the pension liability on the Group balance sheet.

The financial assumptions used in deriving the valuation are set out in the table below:

	Half-Year 30 Sept 2007	Half-Year 30 Sept 2006	Year 31 March 2007
Financial assumptions	% pa	% pa	% pa
Irish schemes			
Inflation rate	2.35	2.25	2.25
Discount rate	5.70	4.65	4.95
Rate of general increase in salaries	3.48	3.38	3.38
UK schemes			
Inflation rate	3.25	2.75	3.00
Discount rate	5.70	5.00	5.30
Rate of general increase in salaries	4.75	4.22	4.22

The mortality assumptions used in estimating the actuarial value of the liabilities for the Bank of Ireland Staff Pension Fund are set out below.

	30 Sept 2007	30 Sept 2006	31 March 2007
Post-retirement mortality assumptions (Main scheme)	years	years	years
Longevity at age 70 for current pensioners			
Males	14.9	14.0	14.0
Females	17.3	16.8	16.8
Longevity at age 60 for Active Members currently aged 60			
Males	25.0	24.5	24.5
Females	27.8	27.5	27.5
Longevity at age 60 for Active Members currently aged 40			
Males	27.4	24.5	24.5
Females	30.2	27.5	27.5
	30 Sept	30 Sept	31 March
	2007	2006	2007
Defined benefit pension plans	€m	€m	€m
Present value of obligations	4,910	5,105	5,092
Scheme assets	4,559	4,254	4,505
Deficit within schemes	351	851	587

The change in assumptions has reduced the defined benefit pension deficit in the balance sheet from €587 million at 31 March 2007 to €351 million at 30 September 2007. This change net of deferred tax has been reflected in the statement of recognised income and expense.

22 AVERAGE BALANCE SHEET AND INTEREST RATES

The following tables show the average balances and interest rates of interest earning assets and interest bearing liabilities for each of the half-years ended 30 September 2007 and 2006 and the year ended 31 March 2007. The calculations of average balances are based on daily, weekly or monthly averages, depending on the reporting unit. The average balances used are considered to be representative of the operations of the Group. Rates for the half-years are annualised.

²⁵ The interim financial statements were approved by the Court of Directors on 13 November 2007.

Independent review report to the Governor and Company of the Bank of Ireland

Introduction

We have been engaged by the Governor and Company of the Bank of Ireland (the "Bank") to review the condensed set of financial statements in the Interim Statement for the six months ended 30 September 2007, which comprises the Consolidated Income Statement, Consolidated Balance Sheet, Consolidated Statement of Recognised Income and Expense, Consolidated Condensed Cash Flow Statement and related notes 1 to 21. We have read the other information contained in the Interim Statement and considered whether it contains any apparent misstatements or material inconsistencies with the information in the condensed set of financial statements.

Directors' responsibilities

The Interim Statement is the responsibility of, and has been approved by, the directors. The directors are responsible for preparing the Interim Statement in accordance with the Transparency (Directive 2004/109/EC) Regulations 2007 and the Transparency Rules of the Irish Financial Services Regulatory Authority.

As disclosed in note 1, the annual financial statements of the group are prepared in accordance with International Financial Reporting Standards as adopted by the European Union. The condensed set of financial statements included in this Interim Statement has been prepared in accordance with International Accounting Standard 34, "Interim Financial Reporting", as adopted by the European Union.

Our responsibility

Our responsibility is to express to the Bank a conclusion on the condensed set of financial statements in the Interim Statement based on our review. This report, including the conclusion, has been prepared for and only for the Bank for the purpose of the Transparency (Directive 2004/109/EC) Regulations 2007 and the Transparency Rules of the Irish Financial Services Regulatory Authority and for no other purpose. We do not, in producing this report, accept or assume responsibility for any other purpose or to any other person to whom this report is shown or into whose hands it may come save where expressly agreed by our prior consent in writing.

Scope of review

We conducted our review in accordance with International Standard on Review Engagements (UK and Ireland) 2410, 'Review of Interim Financial Information Performed by the Independent Auditor of the Entity' issued by the Auditing Practices Board, for use in the United Kingdom and Ireland. A review of interim financial information consists of making enquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with International Standards on Auditing (UK and Ireland) and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Conclusion

Based on our review, nothing has come to our attention that causes us to believe that the condensed set of financial statements in the Interim Statement for the six months ended 30 September 2007 is not prepared, in all material respects, in accordance with International Accounting Standard 34 as adopted by the European Union and the Transparency (Directive 2004/109/EC) Regulations 2007 and the Transparency Rules of the Irish Financial Services Regulatory Authority.
